

Having trouble logging in?

Using the Correct Portal

Oftentimes, merchants experiencing issues logging in may simply be using the wrong portal. Below, we've compiled the only two portals you should ever have to use on Groupon Goods Marketplace.

Logging into Gateway

Gateway is the central hub for merchant activity on Groupon Goods Marketplace. From here, you can create your product catalog, manage inventory, edit your profile information, respond to customer tickets, and more.

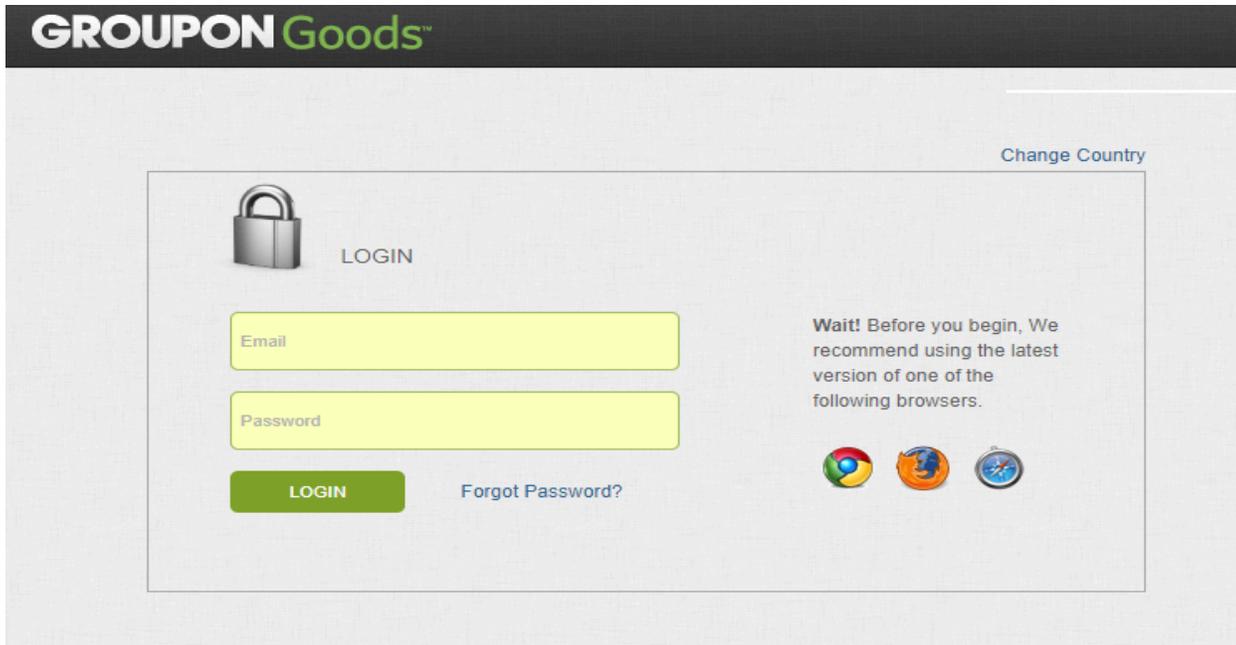

<https://www.groupon.com/goods-gateway/auth/login>

Your Gateway login should match the primary email assigned to your merchant account. Check your inboxes for emails from Goods Marketplace if you're not sure which email is associated.

Logging into Commerce Interface

Commerce Interface is your hub for order fulfillment, invoices, tracking uploads, refunds/cancellations, and more.

The screenshot shows the login page for Groupon Goods. At the top left, the logo reads "GROUPON Goods™". In the top right corner, there is a link that says "Change Country". The main content area is enclosed in a light gray box. On the left side of this box, there is a padlock icon followed by the word "LOGIN". Below this, there are two yellow input fields: the first is labeled "Email" and the second is labeled "Password". Underneath the password field is a green button with the word "LOGIN" in white. To the right of the input fields, there is a text message: "Wait! Before you begin, We recommend using the latest version of one of the following browsers." Below this message are three browser icons: Google Chrome, Mozilla Firefox, and Apple Safari. At the bottom right of the login box, there is a link that says "Forgot Password?".

<https://scm.commerceinterface.com/accounts/login>

Your Commerce Interface login information should match the login details used to login to Gateway, detailed above.
