PROJECTS

Bando - Multi vendor e-commerce (14 July 2021 – Present)

It's a Multi-vendor E-commerce web Application. It's an ongoing team project. Here my role is Full Stack Developer.

Technology: React, React-router, React-hook-form, Visa card payment, Node.js, Express.js, MongoDB, Mongoose, Bootstrap, MaterialUI, Tailwind CSS.

- In the Backend I maintained product management and order management. And maintain relation between collections validation Schema.
- In the Frontend I implemented cart system functionality, maintain context.
- In those both sectors I implemented code beautification and better organization.
