

Child Check-Mate, CRS System Replacements for IC Bus

If you have purchased an IC, International, Navistar or Thomas Built Bus in the past few years, you may already have one of Child Check - Mate System's CRS replacements. These replacements operate almost exactly the same as the CRS replacement however, most will have Child Check-Mate System's standard operational tones & diagnostic tones. These are the beeps and chirps that come from all of our systems and they assist us greatly with installation, operation, and troubleshooting.
