All these are combined together as a body of field work and knowledge base.

under an interactive smart program, that learns as it interacts with who ever plays this.

It will combine and apply this body of knowledge to find and treat all the underlying conditions it can.

It will learn by applying these varying knowledge bases to find the correct combinations of those approaches to heal you.

It will remember /save what works best to the knowledge base and reference it in future uses, in this way it gets better at what is done.
