PROFILE

Write a profile text about yourself. Include professional experience and achievements and briefly describe your educational background if relevant to the project. Relevant personal and social competencies – again matched to the requirements of the job you apply for.

Describe how you can contribute to the given project, and ideally, mention previous experience with successfully handling the same kind of project/tasks.

Sections should be made to structure the text and make it easy to read. Keep the profile text short and consistent with the job you're applying for, as a rule of thumb max. Half a page.
