

Are Weed Vape Pens Worth It

Weed vape pens have shot in popularity over the past few years. As weed becomes legal in more and more locations around the world, they are only likely to get more popular too. So, are weed vape pens worth it? Are they better than the normal method of smoking weed? Let's take a look.

What is a weed vape pen?

Before we can establish whether a pen is worth it or not, we probably need to discuss a little bit about what a weed vape pen is, to begin with.

In the past, when you consumed weed, you would need to burn it. When weed is burned (in fact, when just about anything is burned), it would produce smoke. This smoke would be laden with chemicals that are simply not healthy to consume. Not to mention the damage it could do to your lungs.

A weed vape pen will heat up weed (and other materials) to the point where they release their chemicals but do not combust, and thus you do not get the awful tasting components of the smoke.

When you use a weed vape pen, you will be placing everything into a small chamber. This is known as the heating chamber. A battery will provide a power source for this heating chamber which, in turn, will heat up everything inside of it. It won't let it get too hot. It is just enough to produce that vapor. You can then draw the vapor in through your mouth...just like normal!

Is using a weed vape pen any better than smoking weed?

Most people would say that it is. We are going to go through a variety of reasons as to why in a short while. And no we are not just going to talk about the health benefits. You have probably heard those countless times before. There are a few other benefits when it comes to the actual experience of your weed too!

The weed tastes better

Sure, weed that has been combusted tastes alright. Many people love it. However, that is not going to compare to the taste that weed has when you vaporize it. Since you are not going to be having any of those 'smoky notes' added to the mix, you are getting that pure, raw taste of weed. It tastes marvelous.

People who hate the taste of smoking weed will love the taste of vaporizing weed. It is so much smoother, and you can really taste the full flavor profile in the various strains of weed that you can pick up.

It is cheaper

This is probably the main reason why people will decide that weed vape pens are worth it. It really is a whole lot cheaper to get your weed from a vape pen than it is to smoke your weed. This is because vaping releases a lot more THC and CBD. This means that you need to consume a lot less of it. So, if you are really enjoying the whole legal weed thing, then picking up a weed vape pen may be far better for your wallet. Sure, you have the extra cost of the weed vape pen, but everything will balance itself in the long term (assuming that you part with your cash on a quality weed vape pen!)

It is much more discreet

Don't want people to know that you are smoking weed? Well, a weed vape pen may be the route to go down for you. You will struggle to get an option that is more discreet than this. The vapor doesn't really give off any scent, and if you are consuming weed oils instead of straight herbs, then there may be a scent added which can completely mask the weed smell. People won't know you are smoking weed unless you tell them!

It is healthier

And, to cap it off, smoking weed is generally a lot healthier than smoking it. When you smoke, you are going to be burning weed. This creates all sorts of awful chemicals and substances that you really do not want in your lungs. Because weed vape pens do not burn, they just combust, you do not need to worry about any of that. You are probably going to smell better too as the smoke isn't there to stick to your clothes and in your mouth!

So, do these benefits sound good to you? Well, this may mean that a weed vape pen is going to be 100% worth it!

Company Description

Canada's largest selection of THC & CBD cannabis vape e-juice. Our marijuana vapes are smooth, extremely discreet, and full of flavour. We also carry small batch, premium craft weed flower, prerolled joints and edibles.
