

Dear Family,

For my final project in my technology class, Emerging Technologies, I have been asked to create a series of different types of presentations centered around my family and its history. Since this is a final project, which in this class is just like the final test, the projects I will have to do show the teacher what I have learned over the course of the entire semester. I have to make a family tree, design an infographic, create a five-framed storyboard, and make a presentation using Prezi. This is a lot of projects, to do these projects I will need a lot of information.

Any kind of information you can give me about the family would be very useful. For the historical side of the project, I need information about how the family arrived in the United States, when they arrived here, and why. I would also like about the "family tree" as far back as you can remember and how the family came to be at their current locations. As far as the current family, I would like to know about the extending family and some of your favorite memories or stories about the family.

Thank you so much for any information you can provide and I love you all.

Blessings,
Nathan
