

This scale generally describes farts but may also be used to describe other kink stories I write if it applies.

★☆☆☆☆ 1 Star Rating-

Relatively normal farts. Nothing out of the ordinary, just realistic farts just like any human would do.

★★☆☆☆ 2 Star Rating-

Larger farts. Ones that will rattle furniture, make rooms vibrate, and make small rodents pass out. This can range from room clearing to house clearing.

★★★☆☆ 3 Star Rating-

Somewhat hyper farts. These farts cause buildings to shake, uproot trees, wilt plants, and cause small earthquakes. This can range from house destroying all the way to clearing out a city.

★★★★☆ 4 Star Rating-

Hyper farts. These will always cause catastrophic damage. Whether it be blowing entire cities away, turning oceans into polluted messes, coating an entire county in rancid smog, or creating large scale destruction that can be seen from space. These can range from destroying a whole city to wiping out a continent.

★★★★★ 5 Star Rating-

Apocalyptic Hyper Farts. These farts will destroy the planet. Whether it be from shattering it from the force or melting everything from the smell. The planet will not survive. Surrounding planet may not survive either. Jupiter might get caught up in a larger gas giant, the sun might be blotted out by a thick deadly fog, the entire solar system may be swept up in nothing but gas. These can range from planet destroying to galaxy destroying.

★★★★★★ 6 Star Rating-

Everything Else. This one might be rare since I'm usually scared to share my most extreme farting stories but if I do it will have this rating. These farts will cause destruction on a cosmic scale that can't really be comprehended well, but that doesn't stop me from writing them. Whether it be destroying a universe, multiverse, timelines, realities, existence, *everything*. They can and will succumb to these farts. These can range from universe destroying to ***All-Destroying***
