

# Guided Access and Passcodes

## General:

\*iPads-<https://support.apple.com/en-us/HT202612>

### Suggestions:

- Use iPad guided access versus in-app password options (below).
- Use feature to block activation of certain areas of the screen to prohibit access to menu/editing, when needed (step 3 of 'Start Guided Access session').
- Use the generic KTX password '112233' or make sure to document alternative passcodes!
