

## **Beyond One Size Fits All: Differentiation That Works for You**

*K-5 / 6-12*

Albert Einstein once said, "If you judge a fish by its ability to climb a tree, it will spend its whole life believing it is stupid." But too often, our educational system tries to make very different learners conform to a one-size-fits-all mold. Much of the art of teaching lies in the identification and implementation of appropriate scaffolds. What gaps in understanding are hindering student achievement? What is the next thing this student is ready to learn?

In this workshop, help level up your differentiation game by diving into the three research-backed ways to differentiate your instruction so that every single student can thrive. Teachers will also discover practical tips and tricks that they can use to help master the art of knowing how to structure interventions wisely to boost confidence and competence of struggling learners.

### **Learning Objectives**

- Learn three ways to differentiate instruction: for content, process, and product.
- Explore strategies to apply differentiation to address different levels of readiness and different interests.
- Discover tools to support struggling learners with interventions that don't bring harmful negative attention.
- Discover tools to challenge excelling students without it turning into punishing busy work.
