

# Alexandria Code & Coffee - 09/21/24 @ Your Home

Instructions and links for our main video chat and Slack channels

Hello! I'm so excited you're here with us as we come together digitally for an inclusive, informal co-working session. Many people (optionally) bring projects to work on, and many other people (optionally) socialize the entire time. It's up to you!

## Getting started

Join us on Zoom, starting at **9:00am on Saturday, September 21st**. Please enable your video if possible, as it makes us all more human to each other.

### Introductions

For online version of the event please be ready to answer these 3 questions:

1. What is your name, what are you working on today, and what would you like help with and/or what can you help with?
2. If you have an event to mention
3. If you have a job to discuss

During introductions we will ask folks to use the Zoom Raise Hand feature to track who has not yet done introductions. We will popcorn from person to person so please make sure your name in Zoom is accurate so folks can pass it to you. If possible, having your video on will make introductions more personal and interactive.

## Breaking free

Please make sure you've [joined the DCTech Slack](#) and after you've completed the signup process, [join us in #alxcodecoffee](#). We'll use that channel to communicate with each other throughout the event.

- For general conversation and socialization, use the Zoom room linked above. We'll break into smaller breakout rooms if we're too large to have a single conversation.

- For creating a group chat about a topic, we will create breakout rooms that you can self organize.
- If you'd like to focus on work and would like to leave, that's perfectly okay, too!
- We would like to maintain the main room for general socializing, anything that gets more than social please move to a breakout room.

## Please use threads in Slack

Please use Slack threads in [#alxcodecoffee](#) to reply to specific messages to keep the channel easy to follow.

## What to do if you're lost or need help

We're here to help! Send a message to [John](#), [Robbie](#), [Sean](#) or [Dan](#)
