

Worthington Independent School District 518

About the new applicant login

With the launch of the new applicant login experience, applicants will be able to access the jobs for different district job boards with a single login. The new login will remove the need for applicants to create and remember the login credentials for multiple district accounts during their job search.

With Auth0, the new login experience will make the accounts more **secure** and offer better **privacy** of data for the users. The latest **security protocols** and **standards** protect the platform against malicious attacks.

To set up your account with PowerSchool, Candidate Portal, click the link below to watch a help video with instructions. There will be two options for you to choose from, select the option that best fits your needs.
