Jupiter's Welcome to Solana Page

Product Feedback

Issues & Suggested Improvements

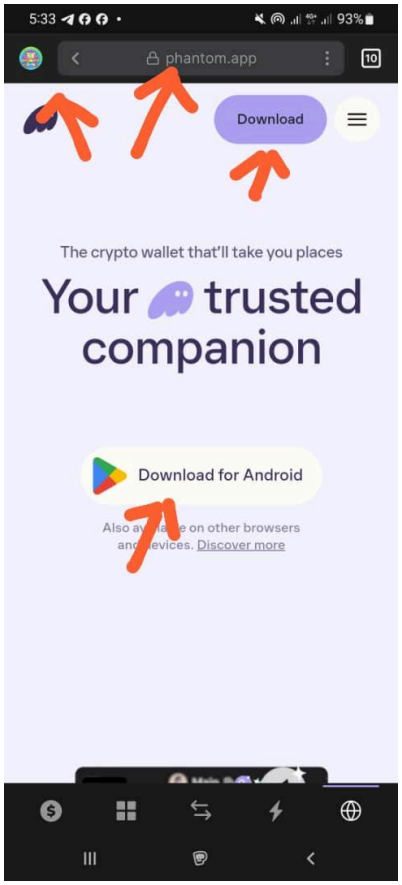

Complete the suggested flows, and mention any UI/UX issues you have or any suggestions on where you think there is scope for improvement. Include relevant screenshots and be direct in your feedback.

Flow #1: Connect any Solana wallet of your choice

1. Issue 1

Connecting wallet has bugs. If you try connecting from an android mobile device, it does not detect the phantom app installed on the phone. Even in the phantom browser, it sometimes does not detect>

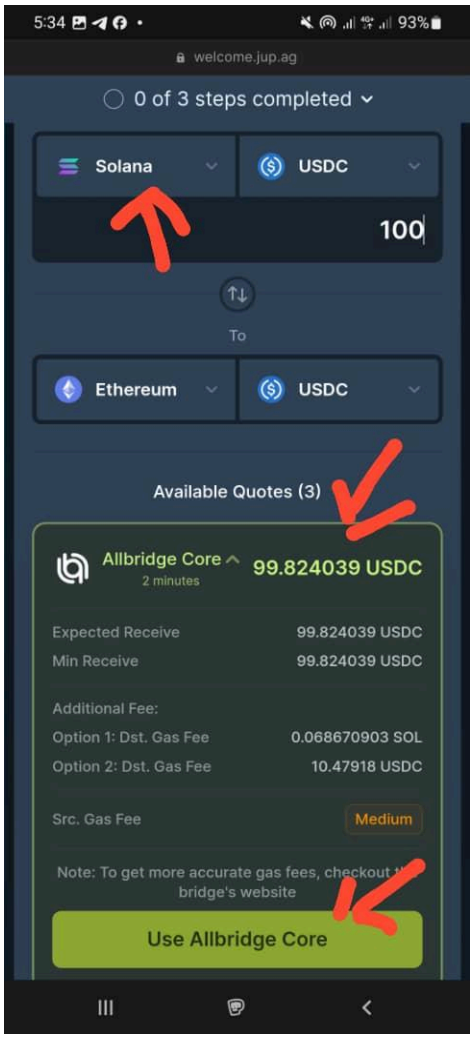

Screenshots

Flow #2: Bridge any amount of USDC from any chain of your choice to Solana using the:

2.1 "Comparator" method

1. When you select Ethereum or Solana it still shows quotes from allbridge core.

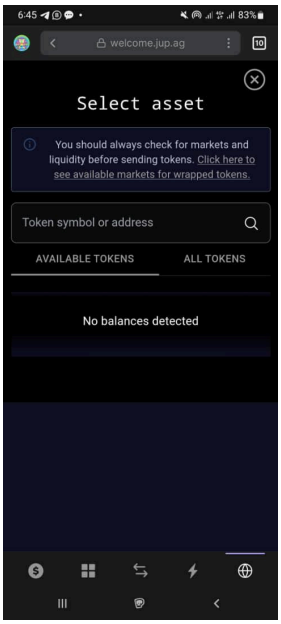

Video link in "Anything thing else"

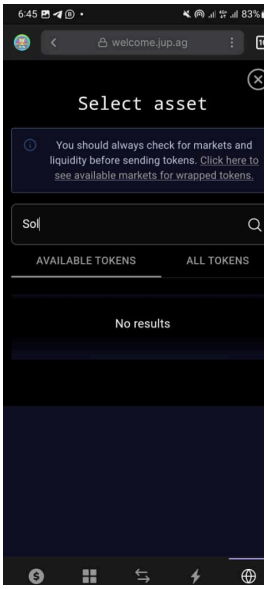

2. Sometimes it takes very long to load quotes or does not load at all. I'm using the phantom browser

Video link in "Anything thing else"

2.2 “Wormhole + CCTP” method

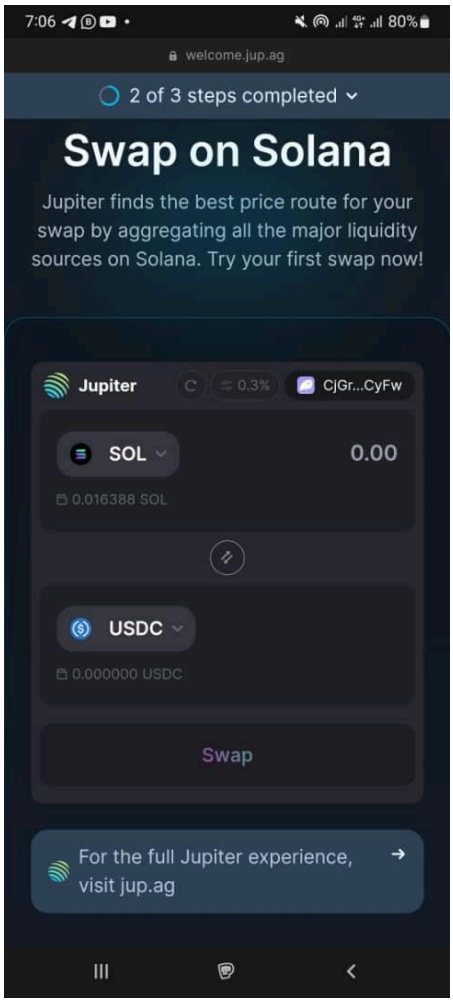

1. Does not detect balances in wallet, when you search, it says “No results”

Flow #3: Onramp any amount of SOL from your local currency

1. Here it shows the Sol balance and other balances. Referencing to “Wormhole + CCTP” method

Feature Requests/Ideas

Imagine yourself introducing a friend to the world of Solana by using the "Welcome to Solana" page — what else would you like to tell them about or have them experience? This could be anything — a piece of content, a collection of projects, communities, interactive tutorials, or functionalities only possible on Solana.

Suggest your most engaging ideas that could be added to the page!

Idea 1: Add Jup news. Like the upcoimg mobile app, the DAO for LFG

Idea 2: For liquidity pool, Add emerging tokens like birdeye and geckoterminal
