Entering Scores & Stats

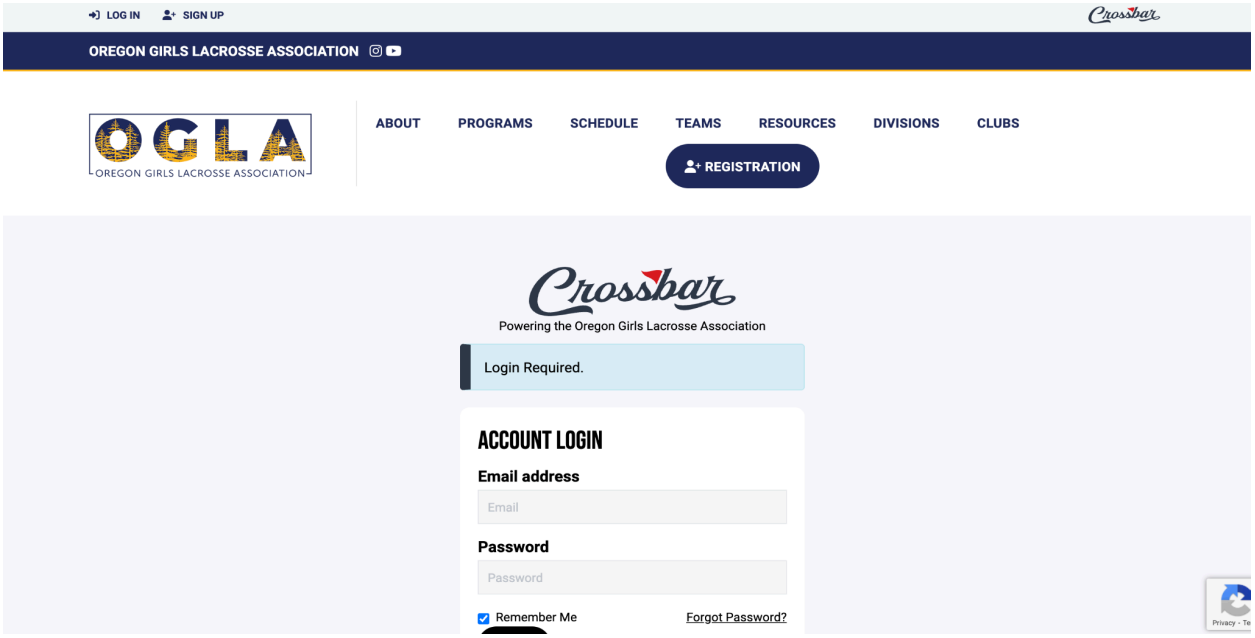

Staff Contact: Ali Loeb, Executive Director, 971.678.7166, admin@oregongirlslax.com

The score should be entered by midnight the night of the game and stats should be entered by noon on the day following a game. They should be entered for all players on the team. Stats no longer include entering any yellow/red cards issued. Despite having access to both teams' stats, you are only allowed to enter the stats for your team.

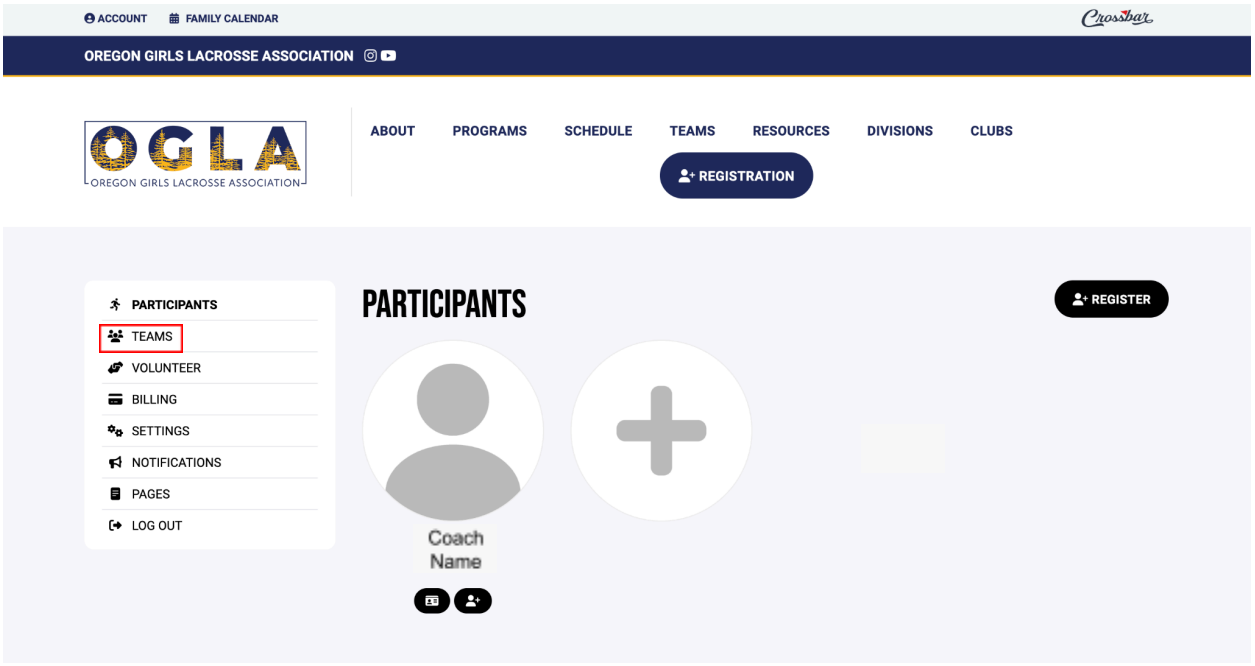

*If a player or coach is issued a red card, please email OGLA (admin@oregongirlslax.com) and provide player name, jersey number, and reason for the card.

Step One: Log into your account on our website (oregongirlslax.com). You will need to be registered as a Coach or Manager AND have accepted the invitation from Crossbar to have the appropriate permissions to access these screens.

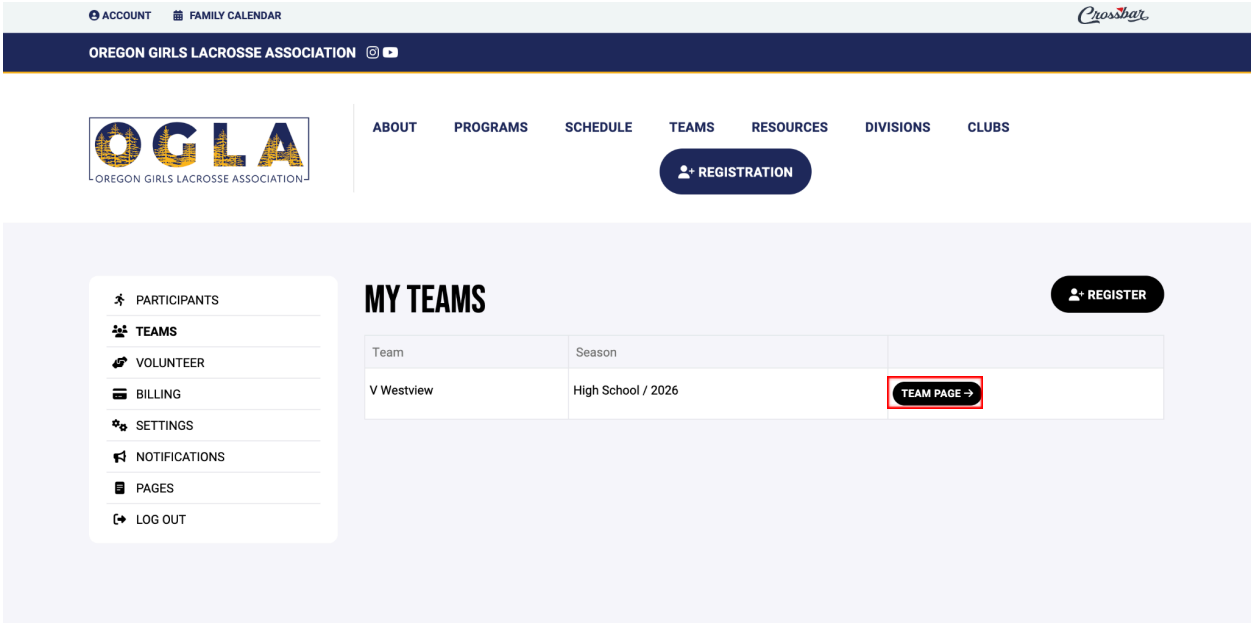

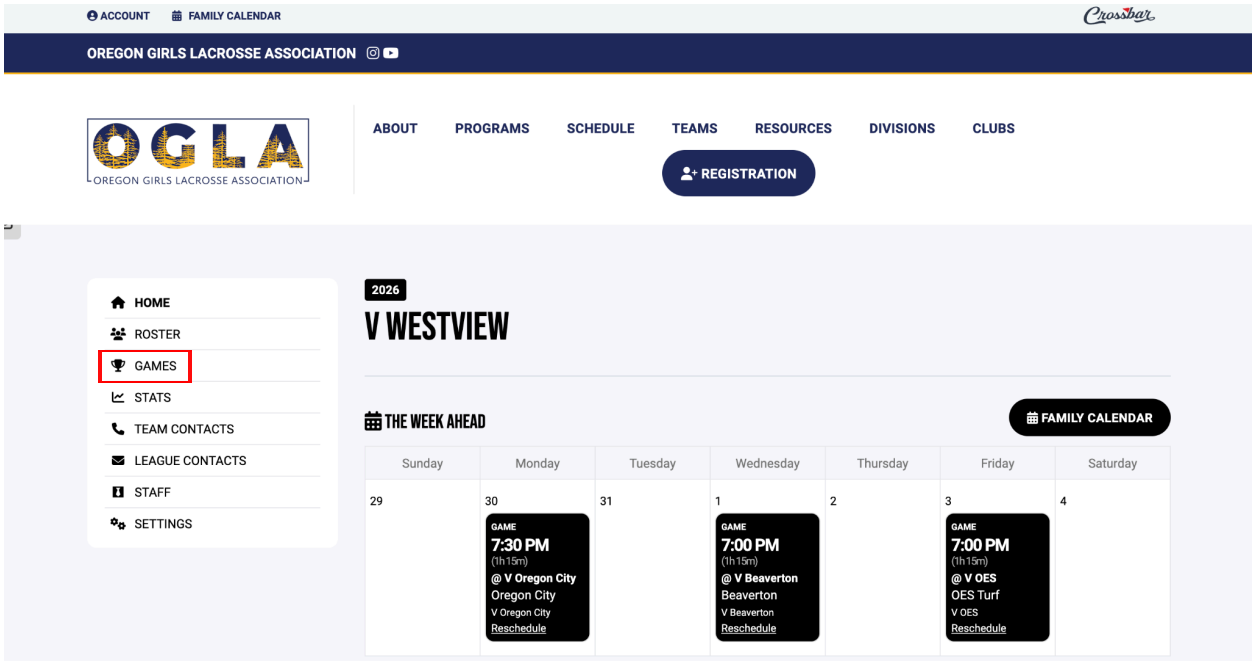

Step Two: Click on TEAMS from the left sidebar.

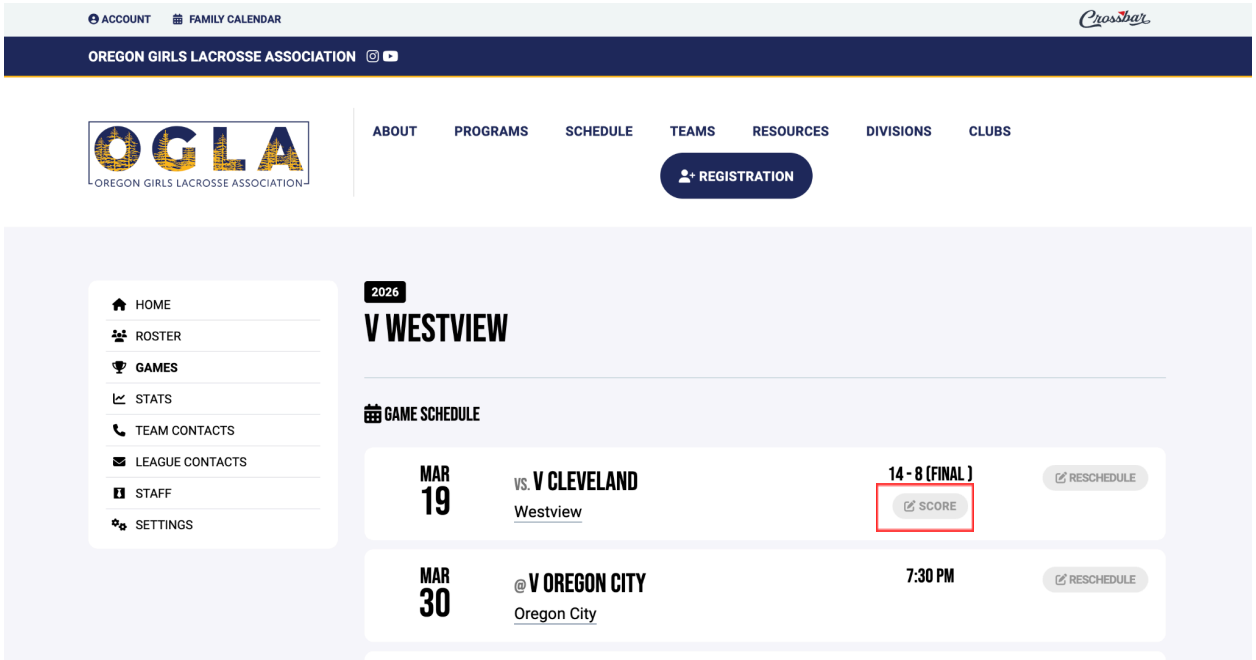

Step Three: Click on the TEAM PAGE button for the team you would like to enter the score/stats for.

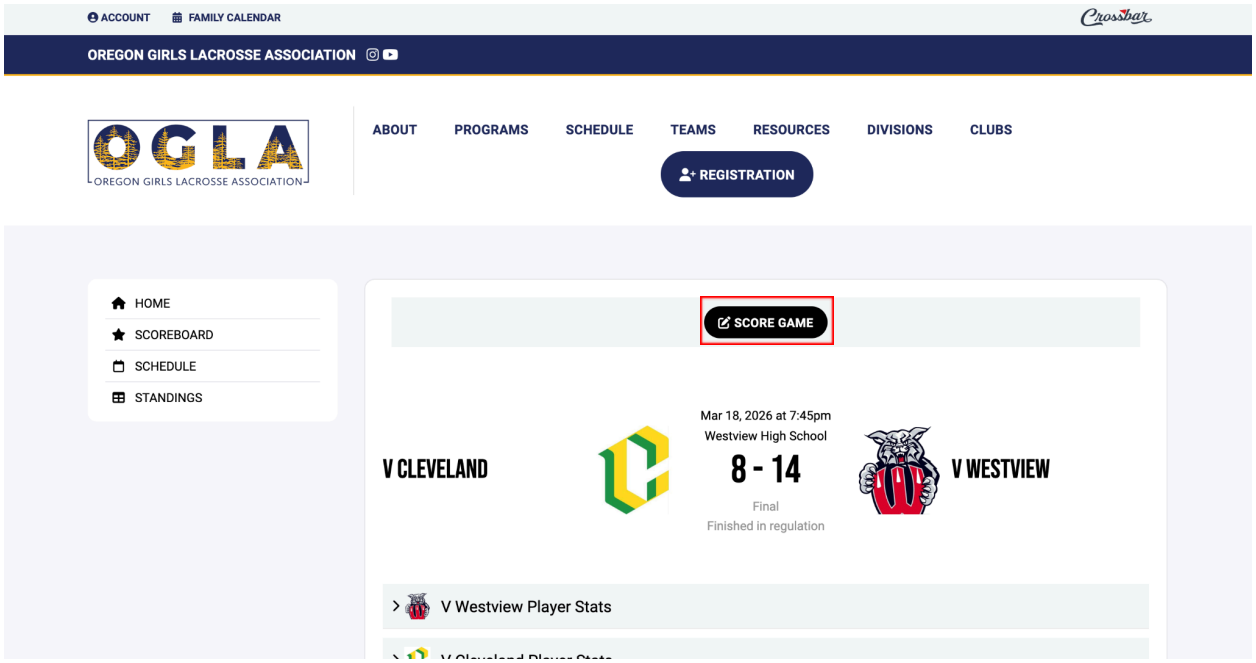

Step Four: Once on the TEAM PAGE, click on GAMES from the left sidebar.

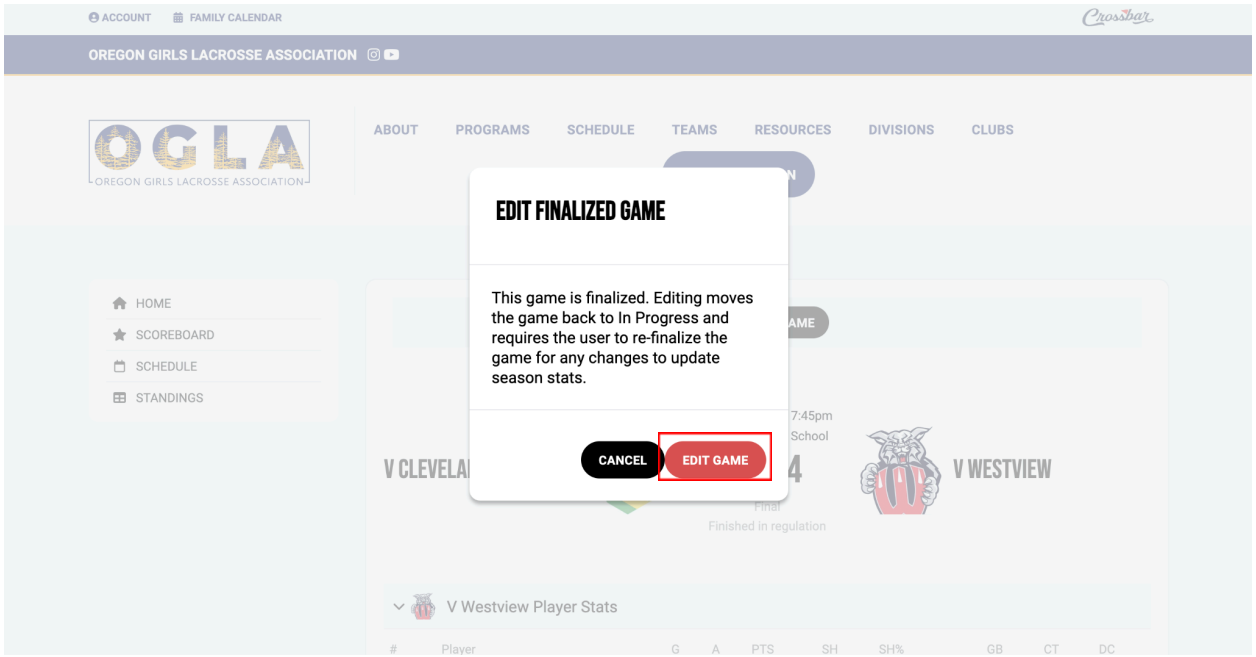

Step Five: Click on SCORE for the game you would like to update.

Step Six: Click SCORE GAME to enter both score and stats.

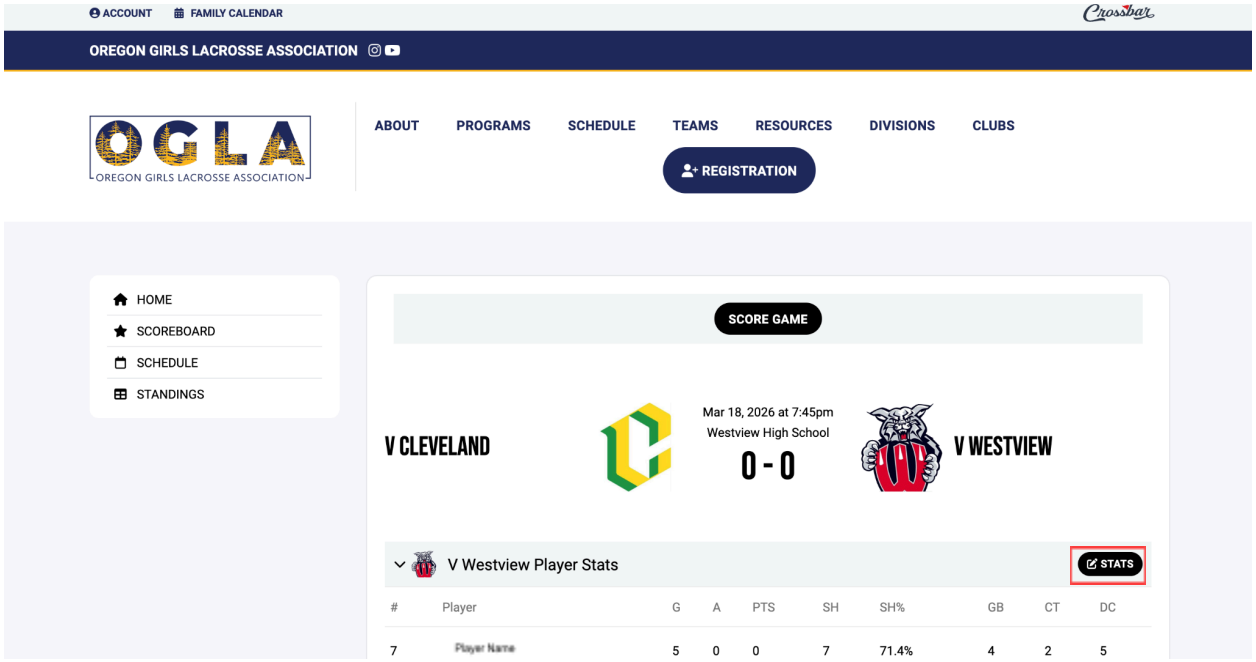

**If the other coach has already entered the score/stats for this game, it will show that this is a FINALIZED GAME. It's okay to edit the game, just note that you will need to re-enter the score once you have completed the stats portion.

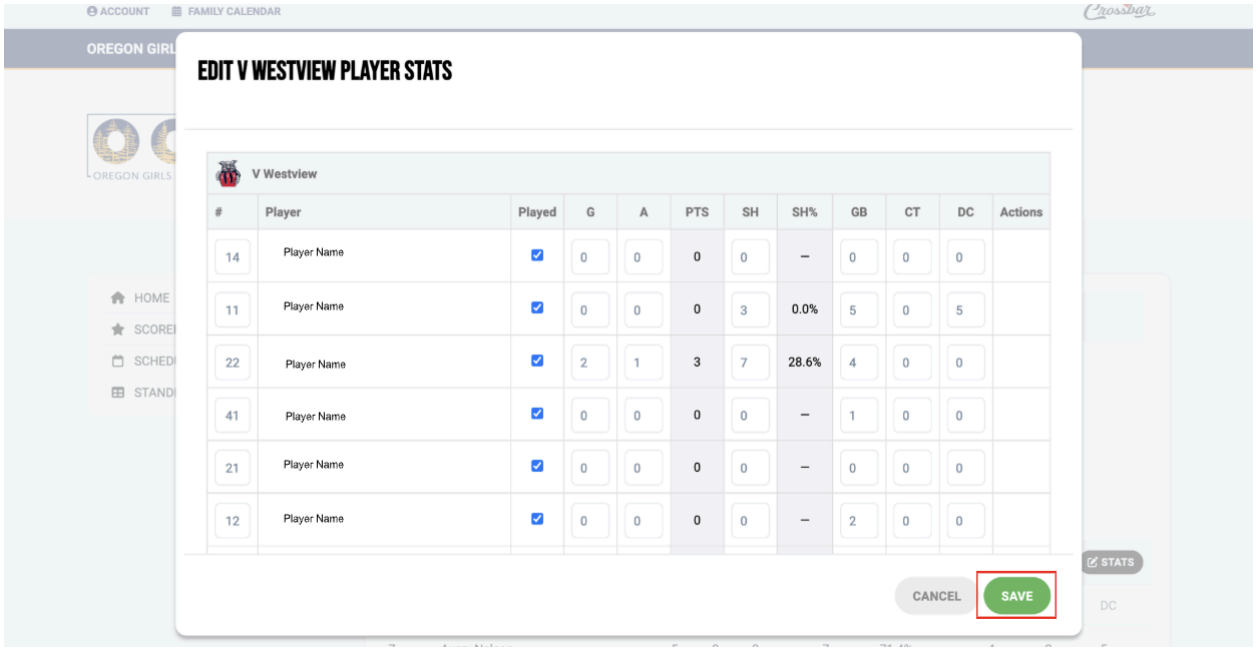

Entering Scores & Stats

Step Seven: Complete the PLAYER STATS for your program by clicking on your team PLAYER STATS and clicking the black STATS button to the right . Any player that stepped on the field must be marked as played. Denote this by checking the box next to their name. If you have players that participate in both JV and Varsity games, they must exist on BOTH rosters. Enter Goals (G), Assists (A), Shots (SH), Ground Balls (GB), Caused Turnovers (CT), and Draw Controls (DC). Once finished, click SAVE.

A window will appear with your roster. If you have not added a roster, this must be done before you can enter stats.

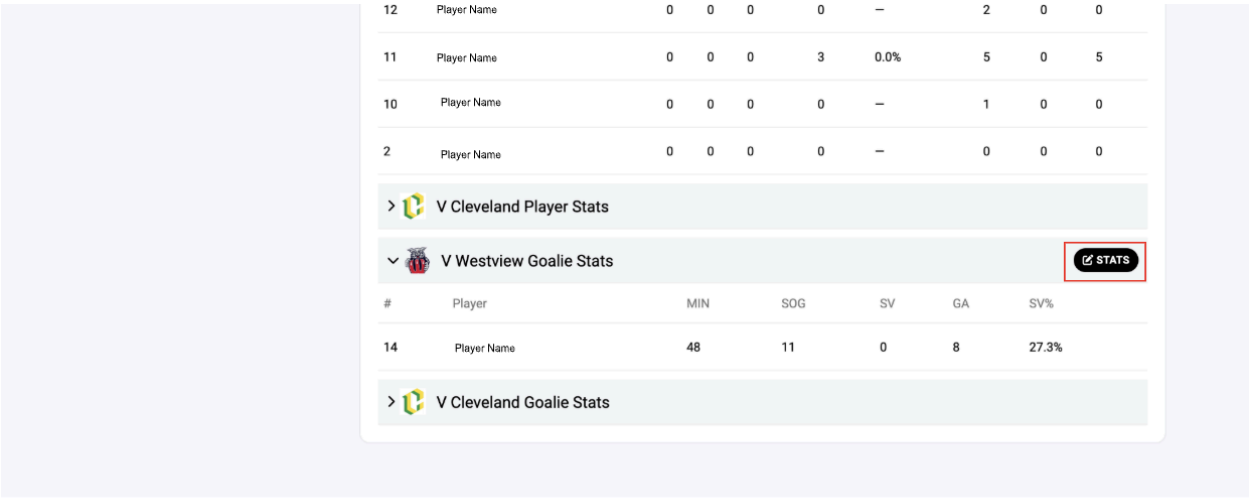

*Shots = Shots On Goal + Shots Off Target (we will no longer track these stats separately)
**Yellow/Red cards are no longer a part of stat reporting.
***Goalies can also have field stats [Ground Balls / Caused Turnovers]

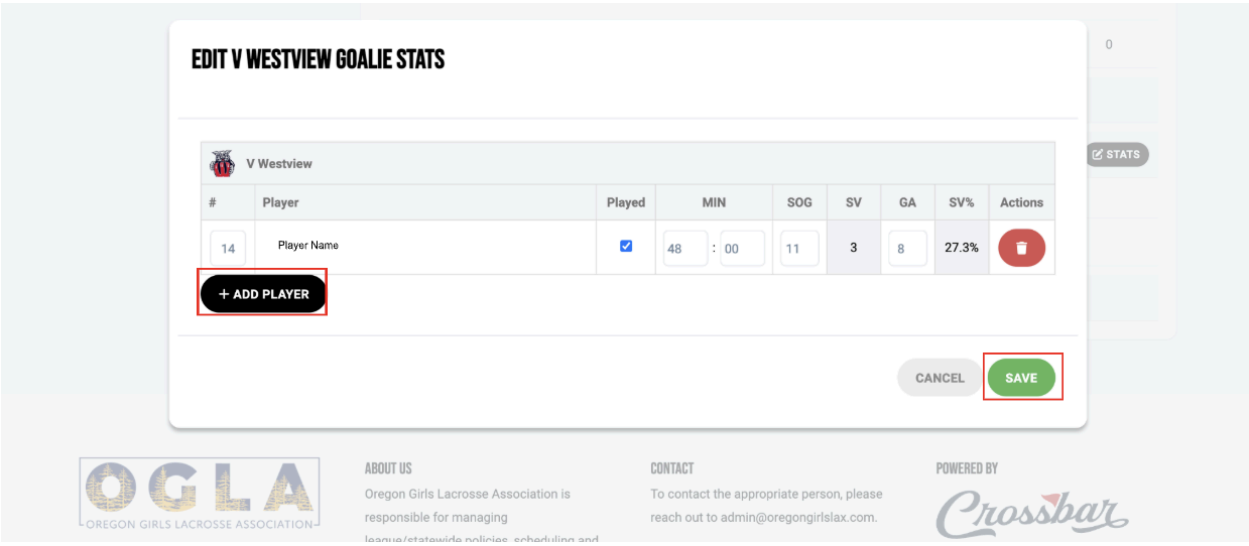

CHECK YOUR WORK:

- Are there as many GOALS as your team has points?
- Does Shot % make sense? A Player cannot have more goals than shots.

Step Eight: Complete the GOALIE STATS for your program. Enter Minutes, Shots On Goal, and Goals Against. If you have goalies split time, ensure the total time entered = 48 minutes (each quarter is 12 minutes). Once finished, click SAVE.

Click ADD PLAYER to add players to the goalie roster.

*Minutes must be entered. 1 quarter = 12 minutes, 1 half = 24 minutes, and whole game = 48 minutes. Unless there is overtime, the total number of minutes for your goalie should add up to 48.

CHECK YOUR WORK:

- Shots on goal = Saves + Goals Against
- The total number of goals against for your goalies should match your opponent's score

Step Nine: Once all information is entered, click SCORE GAME. It will prompt you to enter the score and click FINALIZE GAME to save.
