

F9 Pro Ventilation Instrument Screen

--User Instruction Manual

Product introduction

Thank you very much for choosing our F9 Pro instrument screen product.

The F9 Pro instrument screen uses an 8.9-inch ultra-thin automotive-grade high-definition screen and a Linux operating system, which is stable and smooth. Exclusively developed with an air outlet design, it is more comfortable without blocking the wind.

It is matched with a variety of UI styles, including minimalist style, original style and classic style.

It synchronizes various information of the original car in real time, including speed, gear position, power, tire pressure and other information, providing you with a more comfortable and satisfying driving experience.
