Credit Score and Report Poster Project

For this project you will be asked to make a poster depicting the characteristics that make up a credit score and report, and why these characteristics influence one's credit score.

You will need to print out any text besides titles and bulleted talking points.

You will be provided with a slice of paper and markers.

We have gone over a lot of information about credit scores and reports in class. If you need further information please use the series of tubes and strings to find it.

What your poster should include:

1. Most all things that go into a credit score.

2. Graphics depicting some of your points.

3. Printed reasoning why certain data goes into a credit score.

4. The difference between a credit report and score.

5. Who uses credit scores and reports? And why.

6. Examples of two people: One with a good score and one with a bad score. Give 4 examples of each, participating in a financial action that influences their credit score and would be on their credit report.

Grades, Nades in Spades....

1. I want good graphic design.
2. I want all included parts mentioned above to be included in the poster.
3. I want fame and riches but will settle for a poster that is amazing.
