Are you aware of the daily traffic to your profile?

How effective is it in captivating their attention?

What measures are you taking to ensure rapid business growth?

I went through your training website but was not able to stay in touch as a cold audience.

Having an email pop up on your website will help you have a large audience,

I'm more ready to monetize this audience with emails about fitness 4-5 times in a week.

Each email will contain the link to your program. Look at the example below:
