3. Declaration Statement

To the Editor-in-Chief and Editorial Board of [Name of Journal],

We, the undersigned author(s), declare that the manuscript submitted to [Name of Journal] is our original scholarly work. We confirm that the manuscript has been prepared in accordance with accepted standards of academic integrity, research ethics, and publication ethics.

3.1 Originality and Academic Integrity

1. The manuscript is original and has not been plagiarized, fabricated, falsified, or manipulated in any part, including text, data, tables, figures, appendices, and supplementary files.
2. All ideas, data, arguments, quotations, images, tables, instruments, and other materials taken from external sources have been properly cited and referenced according to the required citation style of the target journal.
3. The manuscript has been checked for similarity before submission and must comply with the similarity policy of the target journal. Any overlap from prior work, including the authors own work, has been disclosed and cited where applicable.

3.2 Authorship, Contribution, and Author Approval

1. All listed authors have made substantial scholarly contributions to the conception, design, data collection, analysis, interpretation, writing, or critical revision of the manuscript.
2. All listed authors have read and approved the final version of the manuscript and agree to be accountable for the accuracy, integrity, and ethical quality of the work.
3. No eligible contributor has been omitted. No guest author, gift author, honorary author, or ghost author has been included.
4. The order of authorship has been discussed and approved by all authors before submission.

3.3 Prior Publication, Duplicate Submission, and Redundant Publication

1. The manuscript has not been published previously in whole or in part, except as a disclosed preprint, thesis, conference abstract, institutional report, or other permitted scholarly output according to the target journal policy.
2. The manuscript is not under consideration by another journal, book, conference proceeding, or publication outlet at the same time.
3. Any earlier version, preprint, repository record, conference paper, thesis, or related manuscript has been clearly disclosed to the editorial office during submission.

3.4 Research Ethics, Consent, and Permissions

1. Where the study involved human participants, personal data, institutional data, interviews, surveys, experiments, clinical materials, or other ethically sensitive sources, the authors obtained ethics approval or provided a valid justification for exemption according to institutional and journal requirements.
2. Where applicable, informed consent was obtained from participants before data collection. The authors protected participant confidentiality and used data only for legitimate research purposes.
3. Any third-party copyrighted material, including figures, tables, instruments, datasets, photographs, maps, or long excerpts, has been used with proper permission and acknowledgment when required.

3.5 Data Accuracy, Funding, and Competing Interests

1. The data, analysis, and results presented in the manuscript are accurate to the best of the authors knowledge. The authors did not alter, suppress, or selectively report findings to mislead readers.
2. Data availability is stated clearly in the manuscript according to the target journal policy, including repository details, access conditions, or a justified reason when the data cannot be shared publicly.
3. All financial support, grants, institutional funding, sponsorship, or material support has been disclosed in the manuscript.
4. All potential conflicts of interest, whether financial, professional, institutional, personal, or academic, have been disclosed. If no conflict exists, the authors state that there is no conflict of interest.

3.6 Use of Generative Artificial Intelligence Tools

1. The authors confirm that any use of generative artificial intelligence tools has been limited, transparent, and consistent with the policy of the target journal.
2. Generative artificial intelligence tools have not been listed as authors because they cannot take responsibility for the manuscript content.
3. If generative artificial intelligence tools were used for language editing, formatting assistance, translation support, coding assistance, or idea organization, the use has been disclosed in the manuscript where required by the target journal.

Declaration of Originality

3.7 Editorial Verification and Author Responsibility

1. The authors understand that the editorial office may verify the originality, authorship, data integrity, image integrity, ethical approval, permission status, and similarity level of the manuscript using appropriate tools and procedures.
2. The authors agree to provide raw data, ethics documents, consent documents, permission letters, or other supporting files when reasonably requested by the editorial office, peer reviewers, publisher, or indexing authority.
3. The authors accept full responsibility for the manuscript content and understand that violations of academic integrity or publication ethics may result in editorial rejection, correction, retraction, institutional notification, or other actions according to the journal and publisher policy.
