

Athena Security Group

Type: *Company Report*

Subject: *ASG History and Mandate*

By: *Upperpeach*

Section 1: What is ASG?

Started in Late 2014, Athena Security Group (ASG) is a Private Military Company (PMC) who provide 3rd party Military and Defense solutions to our clients in order to assist them in achieving their goals. While we are a relatively new PMC on the market, all of our contractors and staff have prior military experience from participation in many of the most recent global conflicts including the 2009 Chernarus uprising and the 2012 Takistani Civil War. Additionally, many of our staff have experience serving in both with national militaries (US Army etc.) as well as other, more well-known PMCs such as IoN (formerly Black Gauntlet). Our experience and expertise ensures that we are able to provide top tier service to our clients, guaranteeing their satisfaction and continued loyalty to our company.

Section 2: Core Values

Here at ASG we hold all contractors and staff to a high moral standard. Each contractor is required to understand and adhere to the company's core values for the current contract. These values change with the contract type depending on the primary mission concern for our client. These two contracts types are:

Aggressive (Offensive): This contract type is chosen when the primary concern for our client is the capturing of territory or elimination of hostiles. The 3 core values for this contract style are:

Rapid Advancement: Focus on taking as much strategically important territory as fast as possible, by advancing quickly and constantly engaging the enemy whenever possible. This makes the seizure of territory much easier as the enemy combatants are either routed or killed before they can properly establish defenses, mount a counterattack or receive reinforcements.

Contractor Safety: While engaging in an Offensive contract, our contractors will take a much stricter and cautious attitude with the civilians present in the AO. While we will still attempt to ensure the safety and stability of

all civilians and communities we encounter, our primary concern will be the safety of our contractors in order to ensure that we are able to maintain the maximum number of contractors in a combat-ready/combat-effective state.

Elimination of Enemy combatants: Our main goal will be to engage and eliminate the Enemy combatants. Instead of acting as a Police force in areas previously captured, all forces will be actively participating in advancing the frontline and eliminating hostiles. Policing and keeping civil peace in towns currently under our control will be done when absolutely necessary, however unlike a Defensive style contract, no permanent force will be stationed in towns to keep peace and investigate criminal and civil complaints.

Protective (Defensive): This contract type is chosen when defense of territory and ensuring civilian safety and property security are of primary concern to the client. The 3 Core values for this contract style are:

Non-Aggression Principle: Our contractors will never directly advance to take territory or actively seek to engage enemy combatants outside of the Area of Protection unless doing so either: directly denies the enemy of resources or positions which would have otherwise been used in an attack on a location held in the Area of Protection, or involves the securing the safety of civilians or property mandated by our client as under our protection.

Civilian Security: While engaged in Defense style contracts our staff will prioritize civilian safety (from both criminal and enemy threats) over the capturing of enemy resources or territory. A permanent Military Police force will be garrisoned in each town to investigate all criminal activities and settle civil disputes as well as act as a first line of defense in the event of an attack by enemy combatants. A Regional ASG hospital will also be established and open to the public for the treatment of all patients in the Area of Protection with ASG's trained medical staff making circuits periodically throughout the controlled towns to assist anyone in need of immediate medical attention.

Preserving Life and Property: In addition to our pledge to ensure civilian safety, when participating in Defensive contracts, ASG contractors will never engage an enemy contact in a manner which endangers civilian lives or property. An example of this is a tightened restriction on the use of artillery and other explosives to engage hostiles in a way which may damage or destroy civilian property in the area. Instead our contractors will either attempt to draw the enemy out into safer fighting conditions, or engage the enemy directly in a manner which does not directly threaten civilian lives or property.

Section 3: Defending our Mandate

Athena Security Group strives to ensure the highest possible security, stability, and peace of mind in any situation within our commissioned area of responsibility. Whether we are solving a murder, securing property from extreme militias, or assisting insurgencies against corrupt states, no job is too big or small. Our flexible organization can custom tailor a solution to your needs, regardless of your budget constraints. Our security group takes responsibility for your safety and property first and foremost, with an internal insurance compensation program, there is no need to worry about your future. If you are injured or your property is damaged by any scenario included in our coverage, then we make restitution immediately and undertake the responsibility of recovering our finances ourselves.

Section 4: Meet the Leadership

Deljay: Company Commander
