Abstract (Helvetica 11)

Write 200-250 words in one paragraph. Include: background, objective, methods, key results, and conclusion. **(Helvetica,9)**

Illustration Structure: Background → Objective → Methods → Results → Conclusion

1. INTRODUCTION (HELVETICA,12)

Explain background, research gap, novelty, and objective. Use recent references (last 5-10 years). (Helvetica, 10), single spasi

2. MATERIALS AND METHODS (HELVETICA,12)

Describe materials, experimental design, procedures, and statistical analysis in reproducible detail.

Illustration Flow:

Materials → Experimental Design → Procedures → Analysis Methods

2.1 Sub Section 1(Helvetica,11)

Xxxx (Helvetica, 10)

2.2 Sub Section 2

Xxxx

2.3 Sub Section 2

3. RESULTS AND DISCUSSION

Present results clearly using tables/figures, then interpret them scientifically.

Illustration:

Result (Data) → Explanation → Comparison with Literature → Implication

3.1 Sub Section 1(Helvetica,11)

Xxxx (Helvetica, 10)

Figures

- Please submit graph as editable text and not as images.
- Figures should be high quality (12000 dpi for line art, 600 dpi for grayscale and 300 dpi for color, at the correct size).
- Figures should be supplied in one of our preferred file formats: JPEG, JPG or PNG. The aim of the figure legend should be to describe the key messages of the figure, but the figure should also be discussed in the text.
- Number figures in the order they are first mentioned in text. Do not write “the figure above” or “the figure below.”
- Each legend should have a concise title of no more than 15 words. The legend itself should be succinct, while still explaining all symbols and abbreviations. Avoid lengthy descriptions of methods. Put the legend inside the figure box, preferably above or to the right of the figure.
- The style of the graphs and charts and the size and appearance of letters and numbers should be consistent within a paper.
- Do not draw a box around line-art figures. Multipanel figures should be labelled (lowercase a, b, c, etc.) and combined into one file.
- The graphic elements: Do not crowd the interval marks on axis scales. Legend includes identify symbols, lines, and patterns. Put the legend inside the figure box, preferably above or to the right of the figure.

Figure 1. This is a figure. Schemes follow another format. If there are multiple panels, they should be listed as: **(a)** Description of what is contained in the first panel; **(b)** Description of what is contained in the second panel. Figures should be placed in the main text near to the first time they are cited.

Tables

- Tables should present new information rather than duplicating what is in the text. Regarded should be able to interpret table without reference to the text. **Print screen is not allowed.**

- Use Table's title with sentence-style capitalization (only the first word has an initial capital). Use only lowercase for legends and for units of measure. Define all abbreviations in the caption, even if they appear in the overall abbreviations list
- Number tables in the order they are first mentioned in text. Do not write "the table above" or "the table below."
- Always use Microsoft Word's table feature. DO NOT create tables by using the space bar and/or tab keys. Do not submit tables in Microsoft Excel.
- Do not use the enter key within the body of the table. Instead, separate data horizontally with a new row.
- Do not insert blank columns or rows.
- Asterisks or letters next to values indicating statistical significance should appear in the same cell as the value, not an adjacent cell (i.e., they should not have their own column).

Table 1. xxxxxxxxxxxxxxxxxxxxxxxx (HELVETICA 9)

xxxxxxx	xxxxxx	xxxxx
Xxxxxxxxx		
Xxxxxxxxx		
Xxxxxxxxx		
Xxxxxxxxx		
Xxxxxxxxx		
Xxxxxxxxx		

* Tables may have a footer.

4. CONCLUSION

Summarize main findings and contributions. Do not repeat discussion.

Illustration:

Key Findings → Scientific Contribution → Practical Implication

REFERENCES

Use APA style. Ensure all citations are consistent and complete. (Helvetica,10)
