Photo Generation Prompt – Happy Birthday PRATHYUSHA 🎂

Create an ultra-realistic, high-quality birthday photo collage poster using the uploaded reference photos as the exact guide for the woman's identity, facial features, hairstyle, skin tone, expressions, and overall appearance.

Main Subject:
A beautiful young Indian woman wearing a vibrant pink saree with an elegant golden border and an orange-gold short-sleeved blouse. She has long, straight, dark-brown hair styled half-up, a small black bindi, delicate gold jewelry, and green glass bangles. Preserve her natural face, facial proportions, and realistic skin texture. Do not alter or replace her identity.

Poster Composition:
- Vertical portrait poster in a 4:5 aspect ratio.
- Large central portrait of the woman, from the waist up, smiling naturally and looking toward the camera.
- Surround the central portrait with 10–12 smaller rectangular photos showing different natural poses and expressions, including gentle smiles, looking down, adjusting her hair, and looking at the camera.
- Arrange the smaller photos in a balanced collage with clean white borders.
- Use a soft, blurred green garden background with warm golden sunlight and beautiful natural bokeh.
- Keep the layout bright, elegant, clean, and professionally balanced.

Birthday Typography:
At the top, add the text “HAPPY BIRTHDAY” in small, widely spaced black uppercase letters.

Directly underneath, display the name:

PRATHYUSHA

Use very large, bold, uppercase red sans-serif typography, centered prominently across the top. Ensure the spelling is exact, the text is crisp, and the letters are not distorted.

Lighting & Quality:
Professional portrait photography, soft natural daylight, vibrant pink and golden colors, realistic facial details, sharp focus, natural skin texture, DSLR quality, premium photo-editing finish, ultra-detailed 4K HD, high dynamic range, clean white background around the collage, Instagram-ready birthday poster.

Important: Maintain consistent facial identity across all portraits. Avoid duplicated facial distortions, unnatural hands, excessive skin smoothing, misspelled text, extra text, logos, and watermarks.

Recommended settings: 4:5 portrait ratio · 4K HD · Cinematic natural lighting · Premium birthday collage.
