

# Megan Christsensen

## Cheer Coach

### Education:

- Skyline High School
- Boise State University
  - B.S. in Mathematics with an Emphasis in Secondary Education (2020)
  - M.S. in Mathematics with an Emphasis in Secondary Education (2022)

**Athletics:** At Skyline High School, I was a dedicated member of the Cheerleading, Cross Country, and Track & Field teams. While Cross Country and Track & Field were family traditions, Cheerleading was uniquely mine—and it brought me immense joy. I’m incredibly grateful to have been on the cheer team all four years of high school and to have served as captain during my senior year. Whether I was cheering from the sidelines or performing on the competition mats, I truly felt in my element when spreading school spirit.

After college, I began my coaching career at Borah High School, serving as an assistant coach for both Track & Field and Cross Country starting in 2023. I’m thankful to have learned so much under the mentorship of Jake Walgamott (Track & Field) and Tim Severa (Cross Country). Their guidance, along with the dedication of the student-athletes, has helped me grow as a coach and better support the physical and mental development of our athletes.

In the spring of 2025, I took on the Cheerleading coaching position at Borah. I'm thrilled to be back in the world of cheerleading and to help foster school spirit once again. Go Lions!

**Career:** I began my teaching career at Borah High School in 2022, where I currently teach mathematics. My courses have included Integrated II, Advanced Math Topics, Precalculus, and College Trigonometry. I was fortunate to complete my student teaching at Borah and felt an immediate sense of belonging. I'm excited to continue growing in my career and to keep supporting students at a school and community that means so much to me!
