Punishment Rules & Guidelines

By playing on our server, it means that you **acknowledge our server rules** and agree to abide by them to continue playing uninterrupted. Even if you **have not read the rules**, or “you do not agree,” you **will still be punished** accordingly. Trying to **circumvent/loophole the rules is not allowed**, and any attempt to bypass the rules will be met with a punishment you attempted to bypass doubled. Punishment times are determined by the server system and not by our staff members. Punishment lengths will increase as more punishments are increased. However, punishments issued by **Admin+** may have unique punishment lengths as they see fit.

Severities

Severity 1	You will receive a warning (unless otherwise specified). If you continue the same behavior after already being warned, or have been warned/punished within the last month, you will instantly be punished.
Severity 2	No warning is required, and you will be punished accordingly immediately.
Severity 3	No warning is required, and you will be punished accordingly immediately.
Severity 4	No warning is required, and you will be punished accordingly immediately.
