

SGC-S4

The SGC-S4 is a high-performance residential water softener engineered to eliminate hardness-causing minerals such as calcium and magnesium from municipal tap water. Designed for modern homes, this unit enhances water quality, prolongs the life of plumbing systems and appliances, and improves skin and hair health. With a compact, space-saving design and intelligent auto-flush functionality, the SGC-S4 offers a perfect blend of efficiency, durability, and ease of use.

Applications

Homes & Villas:

Delivers soft water for everyday use—bathing, laundry, dishwashing, and appliance care.

Apartments & Flats:

Perfect for urban homes seeking to avoid scale buildup and improve water usability.

Home Appliances:

Extends the lifespan of washing machines, geysers, dishwashers, and kettles.

Beauty & Skin Care:

Reduces dryness and scaling effects on skin and hair, offering a more refreshing shower experience.

Maintenance

Resin Maintenance:

The high-capacity resin bed (25.0 L) ensures effective ion exchange for extended periods.

Auto Flush System:

Equipped with intelligent auto flush technology that simplifies cleaning and enhances lifespan.

Periodic Checkups:

Annual service checks recommended for optimal performance.

Easy Setup:

Comes with a plug-and-play design suitable for quick residential installation.

Certifications

CE Certified: Assures compliance with European health, safety, and environmental protection legislation.

RoHS Compliant: Free from harmful substances, making it safe for home use.

ISO Quality Assured: Built to meet global standards of manufacturing and performance.

Unique Advantages

High Flow Rate: Delivers up to 3.0m³/h of softened water, sufficient for a full household.

Efficient Resin Volume: With 25.0 L resin capacity, the system delivers long-lasting performance without frequent refills.

User-Friendly Interface: Smart control system with minimal manual intervention required.

Space-Saving Design: Sleek vertical unit fits conveniently into utility areas without consuming extra space.

Energy Efficient: Operates with minimal electricity, reducing utility costs and environmental impact.

What You Get

SGC-S4 Water Softener Unit: Fully assembled and ready for installation.

Auto Flush Controller: Pre-installed system for automated maintenance.

Inlet/Outlet Fittings: Compatible with standard residential plumbing (G 1").

User Manual & Warranty Card: Includes comprehensive operational guidance and warranty terms.

Installation Kit: Accessories included for hassle-free setup.

Benefits

Protects Plumbing & Appliances: Prevents scale deposits that damage pipes, taps, and fixtures.

Improves Water Efficiency: Soft water lathers faster, reducing soap and detergent usage.

Enhances Skin & Hair: Soft water leaves your skin hydrated and hair softer.

Saves Money: Reduces repair costs and extends appliance life.

Eco-Conscious Design: Reduces energy consumption, water wastage, and chemical use.
