Olive Oil

Cold-pressed and unrefined, Olive Organic Carrier Oil – Extra Virgin is derived from the ripe fruits of the *Olea europaea* tree grown in Spain and is cultivated under certified organic conditions. Known for its superior quality and minimal processing, this oil retains its natural green-gold color, robust aroma, and high concentration of nourishing lipids.

This extra virgin variety is composed primarily of oleic acid, a monounsaturated fatty acid that acts as a natural emollient. In topical formulations, it imparts a moisturizing, protective barrier and enhances product glide and spreadability. Antioxidants such as squalene and polyphenols help improve the stability of emulsions and oils, making this a reliable choice for natural and organic formulations.

Highly compatible with a broad range of essential oils and other ingredients, Olive Organic Carrier Oil (Extra Virgin) is well suited for use in certified organic skincare, haircare, massage, and soap-making applications.

Botanical Name: *Olea europaea*

Plant Part: Fruit

Origin: Spain

Extraction Method: Cold Pressed

Color/Consistency: Golden with green tones; medium viscosity.

Aromatic Summary: Mild, characteristic olive aroma that may influence fragrance blends.

Blends With: Compatible with Jojoba, Sweet Almond, Argan, and essential oils such as Lavender, Rosemary, and Geranium.

Cautions: For external use only. Patch testing is advised prior to full-scale formulation.

Storage: Store in a cool, dry place away from light and heat. Seal tightly to avoid oxidation.

BENEFITS

Premium Unrefined Quality: As a true extra virgin oil, this variety of Olive Organic Carrier Oil is cold pressed without the use of solvents or high heat. This gentle extraction method preserves its natural antioxidants and essential fatty acids, making it suitable for advanced skin and hair care formulations.

Robust Nutrient Profile: Rich in oleic acid and supported by linoleic acid, our Olive Organic Oil delivers effective skin conditioning and moisture support. Naturally occurring antioxidants like squalene and Vitamin E help extend product shelf life and support formulation stability.

Versatile Emollient: With a mild viscosity and nourishing lipid profile, Extra Virgin Olive Organic Oil delivers a soft, smooth after-feel. It enhances a variety of cosmetic applications, from moisturizing creams to body butters, and is especially effective for dry, sensitive, or mature skin.

Historical Significance: Referred to as "liquid gold" by Homer and cherished by ancient cultures, extra virgin olive oil has a long-standing history in cosmetic, culinary, and medicinal applications. Today, this certified organic carrier oil is sourced from organically cultivated *Olea europaea* trees in Spain, reflecting a legacy of quality and sustainability.

DIRECTIONS AND USES

- **Skin Care Formulations:** Incorporate Olive Organic Carrier Oil – Extra Virgin at 1% to 10% in emulsions, lotions, creams, and oil-based serums to enhance emolliency, improve spreadability, and deliver a skin-softening finish. For richer products such as body butters and ointments, this oil can be used at higher levels.
- **Handmade Soaps:** Olive Oil is a foundational oil in soap making due to its ability to create a hard, conditioning bar. Use at 20% to 40% as part of your base oil composition.
- **Hair and Scalp Treatments:** Add at 1% to 5% in rinse-off and leave-in hair treatments to support moisture retention and shine. Due to its nutrient profile, Organic Olive Oil (Extra Virgin) is particularly effective on dry or textured hair types.
