

Release notes 2019-01-10

This past sprint, we fixed the following **bugs**:

Recruitments:

- Add "Received applications" and "Survey responses" columns to recruitments grid
- Generating a Search Report can temporarily bring down a campus site
- Applicant review page is missing "Applicants" breadcrumb
- Diversity tab is not suppressing diversity data by level
- Cannot enter Search Outcome for recruitment that had specializations set before introduction of ranked list
- Make Disposition Reasons badge tooltips more readable by reducing text size
- Update the default blank state of the Diversity Tab
- Basic recruitments report displays demographic percentages incorrectly
- Restore `affirmative_action_goals` back into recruitment API
- Missing internationalization text in basic recruitment survey success message
- Title and Level Information section missing Search Plan lock badge
- Title codes: Contact an admin message is duplicated
- Applicants' disposition reasons are duplicated with multiple button clicks
- Search Committee Chair Survey button color is misleading
- Deleting secondary specialization also removes tertiary specializations from applicants

Applicant grid:

- Download link for applicant bundle pdf now opens in new window

Waiver

- Creation modal throws error when Position working title is too long

Waivers and Exemptions:

- Added history: Remove source type header once it's corresponding sources are removed

Campus / Data specific

- Data import: UCLA Production schools.csv & departments.csv import failing daily

- Clicking JP00384 on UCI Prod redirects to JP0065

Other UI fixes / updates:

- Browser auto-fill dropdown obstructs date picker. Autofill now removed.
- Popover labels that appear besides error fields in forms also have red text
- Fix broken reports page layout to make reports usable for IE 11
- UX survey invitation not readable or usable on mobile
