

This app, called Basic HTML View, applies to Individuals, as of 26/08/2026, and the following apply:

1. **Data sharing and disclosure:** This Product doesn't collect, use or share any user data, or use of any Tracking Technology.
2. **Contact information:** you can get always in touch with me at my email address twinsatha2@gmail.com, in case of questions or concerns about my extension.
3. **This app is suitable for all users**, independently of their years of age.

Current applicable laws for app privacy policies

Several laws globally impact app privacy policies. The GDPR in the EU, the CCPA in California, and various other regional laws mandate clear, concise privacy policies for apps handling personal data. These laws also dictate consent requirements and user rights regarding their data.

General Data Protection Regulation (GDPR) – European Union

This app is applicable to the GDPR, which is a far-reaching data protection law that applies to all entities processing the personal data of EU residents, regardless of where the entity is based.

It mandates clear consent for data collection, gives individuals rights over their data (like access, rectification, and erasure rights), and requires data processors to implement protective measures.

California Consumer Privacy Act (CCPA) – United States

This app is applicable to the [CCPA](#), which applies to businesses that collect personal data from California residents and meet certain thresholds regarding revenue or the amount of data collected.

It provides California residents with the right to know about and opt-out of the sale of their personal data, access their data, and request its deletion.

Data Protection Act – United Kingdom

This app is applicable to the [UK's own version of the GDPR](#), known as the UK GDPR.

It retains most of the principles, rights, and obligations of the EU GDPR but exists under UK law, it imposes strict fines for non-compliance and gives individuals significant control over their personal data.
