Silent Collaboration

Step 1: *Each person chooses a color*

Step 2: *Read the problem*

Step 3: *Take turns doing one thing to solve the problem until complete*

Step 4: *Discuss thinking*

Shannon buys the items listed below at a grocery store.

- 2 packages of chicken priced at \$12.36 per package
- $\frac{1}{2}$ pound of broccoli priced at \$1.98 per pound
- 1 gallon of milk priced at \$3.49 per gallon.

There is no sales tax on the food she buys. Susan pays for the items and receives \$0.80 in change. What amount of money does Shannon use to pay for the items?
