Types of Drones

SOURCE: <https://encyclopedia.pub/entry/43656>

1. A drone with 1 rotor is a **single-rotor**.
2. A drone with more than 1 rotor is a **multi-rotor**.
 - a. 2 rotors = **birotor**
 - b. 3 rotors = **trirotor**
 - c. 4 rotors = **quarotor** or **quadrotor (most common)**
 - d. 6 rotors = **hexarotor**
 - e. 8 rotors = **eightrotor**
3. A drone with no rotors is a **fixed wing**. There are 4 types:
 - a. **Normal** (straight wings)
 - b. **Swept back**
 - c. **Swept forward**
 - d. **Delta**
4. **Hybrid**- a hybrid drone is a combination of a fixed wing drone with rotors.
