Pilot test specification

Pilot testing of lubricants made to evaluate possibility of using specific material in the system. Please provide following data to issue test program.

Do you have corporate standards for pilot testing of products and materials on user equipment? If yes, please provide one.	
Address and specific transport requirements of testing site? Do you need dropship delivery to specified address?	
Equipment maintenance specification. Oil change intervals. Top up intervals.	
Oil system volume. Total volume (if multiple units installed). Total annual consumption.	
Available time for pilot testing. Maintenance schedule.	

Please attach filled questionnaire for equipment. Find questionnaires on:
