Do you have books in the early education niche?

This is a niche that has massive demand...

Early education workbooks are big sellers...

Body:

Hey,

When it comes to selling books on Amazon KDP the niches play a big role.

If you have been in the know about Amazon KDP for any length of time you know this and getting into the right niche can get you the dividends that you expect from the hard work you put into your books.

One such niche is the early education niche!

Early education niche can comprise a number of smaller sub niches, including coloring books, tracing books, introduction to numbers and counting books, scissor skill books and so on. As you can see the list above actually includes some of the basic skills that kids need to get hold up growing up.

This is exactly the reason why these books will continue to be in demand.

Having said that, creating content in any of these niches can be time consuming.

And getting into this niche may not be a viable option for indie business owners who do Amazon KDP on the side to supplement their income.

That's exactly where software apps created by fellow KDP publishers Niranjan and Bings come in handy.

Niranjan and Bings have been creating high end enterprise grade software apps in the KDP space for quite some time now and every single time they have managed to come up with something that simplifies the way you and I create books.

On the 18th they are coming up with an app called **Counting Worksheets Generator** and this is something you really want to take a close look at.

I have been playing around with the app for some time now and can't wait to share with you how cool this app is.

So watch out for my emails about the app in the coming days.

In the next email, I am going to let you know a bit more about the kind of content that you would typically be creating in the counting activity books niche.

Until then,

>>> Check out this teaser video to get a glimpse of the Counting Worksheets Generator app

Thanks

Counting activity books content ideas...

[Counting Workbooks] What to include...

How to make your counting workbooks stand out?

[Inside Scoop] Counting Workbooks Generator

Body:

Hey,

Yesterday I sent you an email about education workbooks in general and counting activity books in particular.

Did you have a chance to check out the books in this niche?

What are your thoughts on it?

As promised in this email I'll share with you five ideas that you can use to create activity books in the counting workbooks category.

Let's get started...

#1 Counting and Writing

This is one of the most common forms of content pieces used in counting activity books. This style of problems involve the kids counting the items in a confined area and then writing the same in the answer area provided.

#2 Search and Count

This is an advanced form of count and write type of worksheets. Here different items are placed in a confined area in different quantities. The users are supposed to identify the type of item and then count the number of occurrences. These types of worksheets work out well for kids who have a little bit of experience under their belt.

#3 Skip Counting

Skip counting is the next level of counting problems usually taught to kids once they have a grip over the basic counting concepts.

#4 Counting backwards

Counting forward is where the kids start but once they get proficient at it, counting backwards comes into the practice routine to provide the fluency needed.

#5 Counting by blocks

This is where cubes are stacked on top of each other to enable kids to learn counting by counting the blocks. This is one of the most popular ways of teaching counting.

You can mix and match these concepts to create a high quality counting activity book. There are a lot of other ideas that you can put to use as well.

Most of the above worksheets are extremely time consuming to create.

Thankfully, Niranjana and Bings have a new SAAS app releasing and that's called [Counting Worksheets Generator](#) on the 18th of August.

CWG will help you create all those types of worksheets effortlessly.

Watch out for my next email where I will share with you some of the juiciest details about the upcoming launch. I'll let you

know what the funnel looks like and what I like or don't like about the app.

Create Counting Practice Books for KDP...

Body:

Hey,

Over the past week I've been reviewing something really exciting and it's about time I shared it with you.

You may remember one or more of Niranjana and Bing's cloud based apps for KDP publishers. I personally am a big fan of those.

Well the team has outdone themselves once again.

Look I understand it's a BOLD statement to say so, especially given that their last few products are being used by more than 7,000+ KDP publishers world wide, but trust me on this.

Their latest project is stretching the envelope and helping you get into the immensely popular counting math practice workbooks category.

Educational practice books are hot, but they are extremely time consuming to create.

I got private early access to the app and have been taking a look at it over the past couple weeks. The app allows you to create counting practice books at the click of a few buttons.

Counting Worksheets Generator [YOUR AFFILIATE LINK HERE] goes LIVE on 18th Aug 2023, at 11 AM EST and I can tell you from what I have seen over the past week...this will change the way you create counting activity books.

I will be sending you an email tomorrow getting you the details of the product and what you can expect.

As of now, all I can say is this is *THE PERFECT ADDITION* to your KDP resources that you have been waiting for.

Watch out for my emails over the next few days for further details.

Thanks

Going LIVE Tomorrow...

CWG Launching at 11 AM EST Tomorrow...

[CWG] Here's What You Need To Know!

Body:

Hey,

I hope you have had a chance to check out my previous emails about the CWG app.

The app goes LIVE tomorrow at 11 AM EST.

Not sure if you have heard all the buzz surrounding this app launch, but I can tell you based on what I have seen this is going to be a true game changer for a number of my customers that get in on this.

It **solves a real problem for KDP publishers**...especially indie publishers.

You will be able to create high quality counting activity books in the early math education niche with a tremendous amount of flexibility.

Niranjan and Bings have produced some of the finest software in the KDP niche and are known to support their products and customers, so I recommend everyone in my community to check this new app the team has created.

The offer goes LIVE at 11 AM EST tomorrow.

There are four parts to the funnel...one base front end offer, followed by three upgrades.

The front end consists of a number of modules that help you create counting worksheets on the fly.

The first upgrade consists of advanced features like powerpoint downloads, unlimited downloads, new modules for counting worksheets like counting upwards and counting using number lines.

The second upgrade is my favorite one, where their creative team has created some high quality designs that have then

been programmed by the developers to help you create storified content pieces for your activity books.

The third and the final upgrade is a collection of 300 illustrations and the same designs as icons that you can use to further customize your counting worksheets.

It goes LIVE at 11 AM EST, tomorrow...so watch out for an email from me around that time.

Why you need CWG?

Body:

Hey,

Yesterday I shared an email about Counting Worksheets Generator and promised you I will be following up with a detailed email on what's included in the product.

Well, here we are...

Read on to know more about [Counting Worksheets Generator](#) **[YOUR AFFILIATE LINK HERE]** which releases on 18th Aug 2023, 11 AM EST.

As you may know by now, Counting Worksheets Generator is created by Niranjana and Bings and this is a brand new cloud based early education math activity book creator app they are releasing after the massive success of their recent SAAS apps in the education niche.

While counting math activity books are extremely popular it can take a substantial amount of time to do it the right way. Especially with the level of review you would need to put in if you create an educational book manually.

If you want to do it right the conventional way then you would have to hire a couple of editors to do it. That may not lend itself well to the Amazon KDP model.

You could save the money on outsourcing costs if you do it yourself...but then you end up spending a more valuable asset - your time. And on top of that reviewing your own work is never easy with study materials like these.

That's exactly the problem Counting Worksheets Generator solves for you!

It helps you create high quality counting practice books that can be customized to a great extent right within the app.

It will be going LIVE on 18th Aug at 11 AM EST!

If you have any questions about it, please reach out to me and I will do my best to help you out.

Watch out for an email from me tomorrow at around 11 AM EST to get it.

>>> In the meantime check out the sales page preview here

Thanks

Here's WHY Most People FAIL with Early Education Books!

Body:

Hey,

Over the last few days I have been sending you some emails regarding this brand new early education math activity book creation app called Counting Worksheets Generator.

>>> [Please go here to check out Counting Worksheets Generator in case you have not seen it already \[YOUR AFFILIATE LINK\]](#)

Do you know why most people fail with early education math books?

Because...

brace yourself for it...

They NEVER get started!

No kidding, that's the biggest problem of all when it comes to early education books.

There are a multitude of reasons for that and many are valid.

Point in case it can take a few weeks to a couple months create just one basic counting math workbook consisting of 100 pages.

And a week or two more to organize the solutions and review the content to ensure there are no mistakes.

In the educational books niche, buyers don't take typos and mistakes lightly.

Your reviews can blow up in a big way with negative comments if there's a typo somewhere especially if it's in the solutions section.

The business model needs you to publish a lot of high quality early education practice books on the platform to be able to make a substantial passive income from it.

You just cannot expect to retire on a beach with 3 books uploaded.

Thankfully Counting Worksheets Generator solves those problems and some therefore allowing you to get started in the niche with confidence and more importantly without sacrificing your time.

What are you waiting for?

Put your KDP counting activity books publishing on steroids.

Counting Worksheets Generator Funnel Explained!

Body:

Hey,

Many of you have been wondering about the upgrade offers included in the Counting Worksheets Generator offer!

In this email, I will explain the entire funnel so you have a clear idea of what you are getting and at what price.

>>> But before we get to that check out the front end sales page here [\[YOUR AFFILIATE LINK\]](#)

Now coming back to the funnel, let's start with the front end offer...

Counting Worksheets Generator FE:

This is the front end product where you get the ability to create counting worksheets on the fly. There are a lot of bells and whistles in here that have no precedence in the form of any other software. You can pick and choose from eight different styles of worksheets for your counting activity books. This product is priced at \$47 during this launch special period.

Counting Worksheets Generator PRO (OTO1):

This is where you get a ton of advanced features that take your math activity book creation work to a whole new level. Some of the notable features include powerpoint output and unlimited downloads. You also get access to brand new counting components. Listing all the features here would not do justice to them. So check out the sales pages when you go through the funnel. It's priced at \$67 during these limited time launch period.

Counting Worksheets Generator PREMIUM (OTO2):

This is where you get 10X more value in the form of premium artistic layouts. You need to see the workmanship in this upgrade to believe everything I say. The art work has been created by professional artists and then they have been programmed by the developers to give you the ability to create stunning exercises with ease. Launch price for this upgrade is \$97.

Counting Worksheets Generator ELITE (OTO3):

If you are serious about your low content business then you are going to love this one. This is where you get access to 300 illustrations that can skyrocket the look and feel of your activity book pages. Not only that you get the icon versions of all the 300 elements so now you have an even bigger library to use right inside of your math components. If you were to

get these custom designs you would spend thousands on the art work. This is available for \$67.

Overall this is a world class software that is built by real KDP publishers for their own use.

And now, you have your opportunity to get the app for a small fraction of what it's actually worth.

>>> You just can't go wrong with Counting Worksheets Generator and more so at this low launch special pricing

Creators of CWG Don't Tell You This...

Body:

Hey,

Over the last few days I have been telling you about how awesome the Counting Worksheets Generator app is.

And I stand by my statement...

>>> If you have not had a chance to check it out yet go here to see what it can do to add to your business [YOUR AFFILIATE LINK]

In this email I want to share something with you that the creators of the product do not explicitly share in the sales pages or in their training videos.

So if you have seen the sales pages or the training videos you would know that the apps are awesome and they do help you create some high quality counting activity pages for your KDP books.

But then there is another way in which you can get a lot more out of this app and that is by...

Using the element based structure provided in the app which allows you to create your own page layout. That's right, you can create your very own page layout like you would do in powerpoint, canva, illustrator or affinity publisher.

This does not come through conspicuously on the sales materials, but is immensely powerful.

Think of all the automation combined with 100% unique pages for your books...how cool is that combination?

What are you waiting for?

>>> Go Get Counting Worksheets Generator now before the price increases [\[YOUR AFFILIATE LINK\]](#)

Missed out on the upgrade?

Body:

Hey,

I am loving some of the feedback early users are providing about the [Counting Worksheets Generator \[Your Affiliate Link Here\]](#) app.

The launch is closing tonight at midnight EST, and I wanted to make sure you did not face the problem that I am hearing about from others. Some customers purchased just the front end offer and skipped the upgrades.

Now that they see the quality of the front end product and the value proposition of the upgrade offers they want to purchase the upgrade through my link.

W+ does not provide us with links for the upgrades, but I discussed this with Niranjan about this and he assured me it's possible for you to get the upgrades through my link.

I now understand the steps involved!

Given the time sensitive nature of the offer, I am willing to work with you and help you out with the purchase of any upgrades you might have missed out on.

I do not want you to lose out on the introductory price which is increasing significantly after tonight midnight EST.

Reply to this email, and let me know which upgrades you would like to get hold of.

And if you have not got the counting worksheets generator app yet...

>>> Check this out now before the price increases
