

Course Descriptions

DRAWING 1

Give your artistic child a crash course in drawing our world with pencil in hand and sketchbook in the other! We'll explore topics like Perspective, Motion, Composition, and more!

Drawing 2

Looking for the next class to continue your child's artistic growth and take them to the next level? In Drawing 2 we'll cover advanced art techniques like charcoal life drawing, color theory, and even compositional math! (I know, but it'll be fun).

DIGITAL DRAWING 1

Want to help your gifted child use their tablet for more than just games? With stylus in hand and tablet in the other we'll cover topics like animating GIFs, making digital brushes, and building art communities!

Digital Drawing 2

Is your artistic child ready for more advanced digital creating techniques? In this class participants will learn about animation, professional illustrating, video editing, and so much more.

CARTOONING 1

In this class we'll discover how the pros design lovable characters and explore how your child can create their own too! We cover character design, story structure, and students will pitch their comic books at the end!

Cartooning 2

Join me as we advance into the next level of telling stories! Students will learn sculpting, color scripts, experimental art, and more! This class will focus on fostering a community of peers who can grow together through collaboration.

Learn virtually!

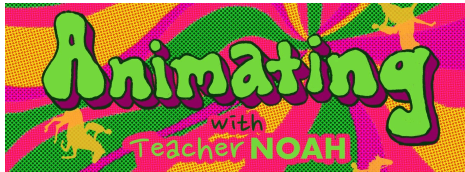

All courses are available on Zoom!

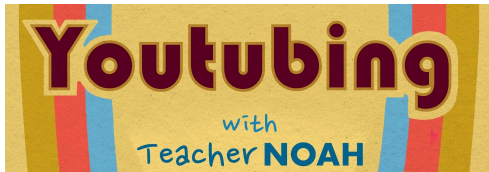

Join the next STAR course!

TEACHER **NOAH** Course Descriptions

This course takes what your child has learned in my Digital Drawing and Cartooning courses to the next level by focusing on the animation process and going in-depth into every step of how artists make animations that truly come to life! So if your child wants to animate anything from moving logos or create their own animated series, this course will help make that happen! By the end of the session students will have an understanding of the career options in the animation industry, as well as a short animation to share with their friends or studios!

The YouTubing course takes you through the filmmaking production pipeline of screenwriting, casting, storyboarding, acting, filming, and editing to make your creative vision a reality! Whether you aspire to be the next YouTube sensation or Oscar winner, this is the place to start. By the end of the session you will have a completed short film to screen for your friends or submit to festivals!

My Memeing course dives into the hieroglyphics of this generation: the comedic yet insightful world of memes! Art has been used throughout history to tell the stories of individuals and humanity, and now it's your turn. Tell your story and connect with others by creating a timeline of events documenting your life through memes! By the end of the session you will have a unique and personal collection of art pieces inspired by the artists who came before us to reflect on how far you have come, or to get trending on Reddit!
