Nomenclature & Format Guides

Salimpour School & Suhaila Salimpour Institute of Online Education

Overview

Nomenclature Overview

Suhaila International, Salimpour School, & SSIOE

Introduction

Suhaila Salimpour's dance method is codified into five levels. When documenting technique or choreography in writing, a shorthand version began to emerge; but there was variation depending on the dancer.

In 2007, Vonda Totten, Suhaila's curriculum development partner, took on the task of creating a uniform nomenclature. An outside committee of academics from science, linguistics, music, theater, and dance was convened to serve as an advisory board. Each member has extensive experience in naming systems, rules, and syntax. Each addition and evolution to the nomenclature is carefully appraised and validated before official inclusion.

Over the years, the nomenclature has expanded to include symbols and abbreviations for moves, timing, direction, stage placement, finger cymbals, foot placement, and more. Both Suhaila's Method and Salimpour Vocabulary are represented.

Definitions

NOMENCLATURE

The terms nomenclature, Vocabulary, and terminology are interchangeable and refer to using the official School format language. When students are instructed to prepare written documentation of their work using nomenclature, that means to use the format's syntax.

SYNTAX

Syntax refers to the specific ordered presentation of the nomenclature (vocabulary, terminology, and format language) when written. Syntax was created as a means to document drills, phrases, and choreography in writing with a specific order and placement to provide consistency and ease of reading (using, when applicable, universal guidelines, protocols, and style guides).

How Much Does Nomenclature Represent?

The nomenclature and related syntax provide standardized technical and descriptive content on a dance drill, exercise, or choreography.

While the nomenclature offers thorough detail, we emphasize that written notes typically represent only as much as 80 percent of a dance. Especially when learning a choreography, it is always important to view the instruction and not rely on the notes. While the written notes give you the math, the true artistry is demonstrated in the actual movement.

For Salimpour Instructors

When teaching a Salimpour class, a teacher will use nomenclature, but won't necessarily speak in exacting syntax. Depending on what a teacher is explaining or assigning, material may be presented in a manner that emphasizes the teacher's intent using a visual and/or vocal inflection.

Of course, instructors are encouraged on occasion to help students understand written syntax, but they are not limited by syntax when teaching. Any instructor's written notes and documentation should be in syntax.

Consistency or Mix?

Ideally, the goal is consistency where an entire document is either completely written in symbols/abbreviations or completely written out. However, it isn't "wrong" if someone mixes abbreviations/symbols with things written out. For example: Interior hip circles CW halftime db R isn't "incorrect".

Note for Institute Courses: Specific class assignments might have particular parameters for using nomenclature abbreviations and symbols. Certain assignments might require consistency as part of the grade as part of a specific learning outcome.

Nomenclature Key

Nomenclature Key

Suhaila International, Salimpour School, & SSIOE

Overview

The following symbols and abbreviations have been assigned for commonly used terms and commands in the Suhaila Salimpour Format and Salimpour Vocabulary. Symbols and abbreviations are different.

- Symbols are exact (meaning a capital L for Left is always written as a capital L).
- Shortened or abbreviated terms are written in lowercase letters, the first letter(s) may be capitalized.

Timing symbols (*ht*, *ft*, *dt*, etc.) are ideally italicized. When written in longform (ex: fulltime), the word is a compound word. Incorrect: full time or full-time.

Main Symbols

<u>Symbols</u>	<u>Meaning</u>
Ab	abdominal(s)
B	back
B-dom	back-dominant
B-F	back-to-front or back to front
BL	back-left
BL-dom	back-left dominant
BR	back-right
BR-dom	back-right-dominant
C	center
CCW	counterclockwise
CW	clockwise
D	down
D-U	down-to-up
Dk	debke
db	downbeat
<i>dt</i>	doubletime
<i>et</i>	eighthtime
F	front or forward
F8	figure-eight or figure eight
F-B	front-to-back or front to back
F-dom	front-dominant

FL	front-left
FL-dom	front-left-dominant
Fm	family
FR	front-right
FR-dom	front-right-dominant
<i>ft</i>	fulltime
GV	grapevine
Hd	hard
H	home
H	hold (used only for finger cymbals or timing)
HF	hip flexor
<i>ht</i>	halftime
I-O	in-to-out
Jm	Jamila
Jm-Vocab	Jamila vocabulary
Jz	jazz
L	left
L-dom	left-dominant
LHF	left-hip-flexor or left hip flexor
Lk	lock
LoAb	lower-ab or lower ab
LoB	lower-back or lower back
Lx	left-cross or left cross (cymbals)
M	middle
O-I	out-to-in
Pt	point
Pv	pelvic
Pvt	pivot
<i>qdt</i>	quadrupletime
<i>qt</i>	quarternime
Rc	ribcage (can also use abbreviation Rib or rib)
R	right
R-dom	right-dominant
RHF	right-hip-flexor or right hip flexor
Rx	right-cross or right cross (cymbals)
S	side
Sf	soft
Sft	shift
Sh	shimmy
SL	side-left
Sp	spin

SR	side-right
sxt	sixthtime
St	step
U	up or upper
UAb	upper-ab or upper ab
UB	upper-back or upper back
ub	upbeat
U-D	up-to-down
T	Together (used only for cymbals)
Tn	turn
Tq	taqsim
Ts	timestamp
Tv	travel
Tw	twist(s)
V	V(s)
Vb	vibration
Wk	walk
Wt or wt	weight (placement)
Z or z	zagat, sagat, or cymbals

Abbreviations

Abbreviations are written in lowercase letters, although the first letter(s) may be capitalized. Examples:

- correct: ext-hip-cir or ext hip cir
- correct: Ext-Hip-Cir or Ext Hip Cir
- correct: Ext-hip-cir or Ext hip cir
- **incorrect: EXT-HIP-CIR or EXT HIP CIR**

<u>Abbreviations</u>	<u>Meaning</u>
Alt or alt	alternate, alternating
<i>No abbreviation</i>	arm wave(s)
Beg or beg	beginning
Cir or cir	circle(s)
Ct(s) or ct(s)	count(s)
Diag or diag	diagonal
Dmd or dmd	diamond
Dom or dom	dominant
Ext or ext	exterior
Ext-hip-cir or ext hip cir	exterior hip circle(s) or exterior-hip-circle(s)
Ext-hip-½-cir or ext hip ½ cir	exterior hip half circles or exterior-hip-half-circle(s)
Ext-Rc-cir or ext Rc cir	exterior ribcage circle(s) or exterior-ribcage-circle(s)

Ext-Rc-½-cir or ext Rc ½ cir	exterior ribcage half circle(s) or exterior-ribcage-half-circle(s)
Ext-hip-sq or ext hip sq	exterior hip square(s) or exterior-hip-square(s)
Ext-Rc-sq or ext Rc sq	exterior ribcage square(s) or exterior-ribcage-square(s)
<i>See foot symbols</i>	foot / feet
<i>No abbreviation</i>	glute(s)
Hex or hex	hexagon(s)
Int or int	interior
Int-hip-cir or int hip cir	interior hip circle(s)
Int-hip-½-cir or int hip ½ cir	interior hip half circles(s) or interior-hip-half-circle(s)
Int-Rc-cir or int Rc Cir	interior ribcage circle(s) or interior-ribcage-circle(s)
Int-Rc-½-cir or int Rc ½ cir	interior ribcage half circle(s) or interior-ribcage-half-circle(s)
Int-hip-sq or int hip sq	interior hip square(s) or interior-hip-square(s)
Int-Rc-sq or int Rc sq	interior ribcage square(s) or interior-ribcage-square(s)
Oblq or oblq	oblique(s)
Oct or oct	octagon(s)
Opt or opt	optional
Pyr or pyr	pyramid(s)
Rib or rib	ribcage (can also use symbol Rc)
Rev or rev	reverse
Sgl, sgl, Sgls, or sgls	single(s)
Sgl-slg-¾	single-single-¾
Sq or sq	square
Und or und	undulation(s)
Vocab or vocab	vocabulary

Foot Symbols

The underline () and carat (^) represent flat or releve **only as part of the designated foot symbols provided here**. You may write the footwork out (R foot flat, L foot releve) or use symbols (L_R^), but be consistent throughout a single document. Examples:

- Correct: Wk L_R^ Tv F ft db R.
- Correct: GV Feet_ Tv SR qt db L
- **Incorrect: GV_ TV SR qt db L**

<u>Symbols</u>	<u>Meaning</u>
L_	left foot flat
L^	left foot releve
R_	right foot flat
R^	right foot releve
L_R_	both feet flat

Feet_	both feet flat
L^R^	both feet releve
Feet^	both feet releve
L_R^	L foot flat, R releve
L^R_	L foot releve, R flat

Stage, Clockface, Gridwork Symbols

<u>Symbols</u>	<u>Meaning</u>
Ustg	up-stage
UstgL	up-stage-left
UstgR	up-stage-right
Dstg	down-stage
DstgL	down-stage-left
DstgR	down-stage-right
Cstg	center-stage
CstgL	center-stage-left
CstgR	center-stage-right
boxF	Personal-Box-Front
boxFR	Personal-Box-Front-Right
9:00cf	9 o'clock (clockface)
2:30cf	2:30 o'clock
box2:30	2:30 o'clock on personal box
stg2:30	2:30 o'clock on stage
Gstg1 (2-9)	Stage Grid 1
Gaud1 (2-9)	Audience Grid 1
Gaudstg1 (2-9)	Audience-on-Stage Grid 1
Gstgaud 1 (2-9)	Stage-in-Audience Grid 1
YXp	Frontal plane
YZp	Sagittal plane
XZp	Transverse plane

Syntax

Commands and directions are written in the following syntax: Movement, direction (if any), timing, downbeat. Examples:

- Int-hip-sq CCW *ht* db F
- Tw *ft* db R
- Wk flat F *ht* db R

Counts

Counts are designated in box brackets as shown below.

- Correct: Alt int-hip-sq CW qt db F [8 cts]
- Correct: Alt int-hip-sq CCW ht db B [1-8]
- Basic-Egyptian [8 counts]
- Incorrect: Alt int-hip-sq CW qt db L (8cts)
- Incorrect: Alt int-hip-sq CW qt db B {1-8}
- Incorrect: Basic Egyptian (8 counts)

Parentheses designate referential counts. For example, to designate just the & before count 1, you might write [&(1)].

Finger Cymbals

Finger cymbals are hyphenated and designated in box brackets as shown below. Advanced material will be provided separately.

- Correct: 3-1-3-1-3
- Correct: [3-1-3-1-3]
- Correct: z[3-1-3-1-3] A lowercase z may **proceed** a pattern if needed to prevent confusion between designated cymbal patterns and counts.
- Incorrect: 31313
- Incorrect: 3,1,3,1,3
- Incorrect: (3-1-3-1-3)
- Incorrect: {3-1-3-1-3}
- Incorrect: [3-1-3-1-3]z

Finger cymbal modifications are placed outside the box brackets.

- Correct. [3-1-3-1-3]L. The default cymbal pattern is R-dom; adding L after the brackets means the pattern is played L-dom.
- Correct. [3-1-3-1-3]L, Rx. This indicates the pattern will be played L-dom, and the R hand will cross over to play the L (3 cymbal pattern).
- Redundant: [3-1-3-1-3]R. The default cymbal pattern is R-dom; adding the R after this pattern is redundant and might be potentially confusing as the reader will wonder why you chose to emphasize the default.

Salimpour Vocabulary Shorthand

When written in shorthand, step names are hyphenated as below. The shorthand terms are symbols, not abbreviations, so they must be written exactly as they appear below. The symbol Jm can be added, for clarity, when designating a Vocabulary format step. As an example, for Zanouba, which is a Vocabulary stylized grapevine, you would write Jm-GV to designate the Vocab stylization.

When writing a step in full without abbreviations, use hyphens (as demonstrated below) or not. Maintain consistency within a single document. Examples: Twist-Step, Reverse-Twist-Step, Twist Step, Reverse Twist Step.

Reverse Steps

In the Jamila vocabulary, reverse means mirror image. When documenting a reverse Jamila step in nomenclature shorthand, use "Rev" with a capital "R" and a hyphen as a prefix to the step name.

- Correct: Rev-Maya.
- Incorrect: rev-Maya
- Incorrect: REV-Maya.

F-S-Around-Crescent	Forward-Side-Around-Crescent

Spins and Turns

The terms spin and turn are used synonymously and interchangeably. When calling out commands, the turn can be listed first or second; as an example, it is correct to speak either "Basic Egyptian with Open Spin" or "Open Spin with Basic Egyptian"; the same is true for steps when written in longhand without abbreviation. However, when documenting steps in writing using the abbreviated format, the primary move is written first, followed by the turn.

- Correct: BsE-w/Open-Sp.
- **Incorrect: Open-Sp-w/BsE.**

3-St-Tn (Full-Sp)	Three-Step-Turn (Full-Spin)
Open-Sp	Open-Spin
4/4-Sp	4/4-Spin
2/4-Sp	2/4-Spin
Diag-2/4-Sp	Diagonal-2/4-Spin
Centrifugal-Sp	Centrifugal-Spin

Documenting Choreography

Documenting Choreography

Suhaila International, Salimpour School, & SSIOE

Where to Start

For official choreographies and assignments, students are required to submit their typed work using the nomenclature and choreography templates. Use these resources:

- Nomenclature Key
- Choreography Template

Simple Version

The Choreography Template consists of content lines. Below is an example of a very basic choreography template. This basic template represents the most commonly used lines. The template may be presented in several ways; see the examples provided in this document.

Phrase Title [# of cts]
Feet:
Hips:
Torso:
Arms:
Z:

Advanced Version

For more advanced choreography and assignments, additional lines may be required. Include and exclude lines as needed to effectively describe your phrase.

Phrase Title [# of cts]
Steps: See below for explanation.
Feet: Foot placement and traveling patterns.
Body: Optional line that may change location in template based on context
Hips:
Hips2:
Torso:
Torso2:
Arms:
Z: note that "Cymbals:" may be used instead of Z for zagat
Notes: If additional clarification or reference is needed.
Emo: See below for explanation.
Staging: See below for explanation.
Music: Optional; separate line or column to right of notes; see below.

Staging & Emotional Intent Grid

For advanced choreography and assignments, students may be required to add a Staging and Emotional Intent Grid. As a standard School practice, whether asked to complete an assignment using all or only part of a grid, students are required to include the full grid. The grid is included as a column to the right of the choreography notes. When using the grid, students have the option to further clarify the grid by including these additional lines: Emo and Staging. Additional grid work information is explained in class and workshops.

Predominant Layers

When layering two movements, the move listed first is assumed to be the dominant layer (dom). In the rare situation where the dominant layer is not listed first, students may include the designation "dom" in parentheses (dom) following the applicable move. Advanced students may apply percentages in parentheses immediately following each layer to specifically delineate the energy assigned to hips and torso layers.

Describing Vocab Steps

When using Vocab steps, the Steps line can be added to the beginning of the Choreography template list. The Steps line serves as a brief, single line overview of the Vocab steps used. The Steps line is used in two specific ways.

1. Providing a brief overview of the steps used in the phrase or combination. The Steps line is used as a means to provide a brief overview of what will be described in detail in the lines below. As an example, this allows you to describe variants of Vocab moves in Suhaila format language while maintaining the connection to the Vocab roots. The four examples below provide examples of how the Steps line might be used. For each example, you would include the rest of the template to outline feet, hips, upper body, cymbals, etc. Keep this line very simple; you have the rest of the template to explain what you mean.
 - a. Steps: Tw-St layered on Zanouba. Explanation: Twist Step will be the dominant step in the layering as it is listed first.
 - b. Steps: Includes A1, 4F4b. Explanation: This phrase outlines which steps are used and described below.
 - c. Steps: Inspired by Samiha and Bounce-St. Explanation: "Inspired by" is used when the variation of a step is so far removed from the original that it might not be recognizable.
 - d. Steps: Includes Zanouba and Tw-St (sentiment). Explanation: This phrase tells you that these two steps will be included in some way in

the phrase and that the overall phrase will have the sentiment of the Twist Step.

- Using a Vocab step default without variation. In such simple cases that require no further clarification, the Steps Line alone may be used including counts. This option is very rarely used. If your description takes up more than one line or you are in doubt, revert to #1 above and use the full template to describe the move.

Vocab Sentiments

Vocab steps and step families have inherent sentiments that are taught and explained in classes and workshops. When varying, combining, and layering Vocab steps with Suhaila format or other Vocab steps, remember the steps have default steps and default sentiments. When applicable, the governing sentiment is noted by writing "sentiment" in parentheses after the move. If the governing sentiment covers this entire phrase, it can be identified in the Steps template line. If it is more complicated and switches throughout the phrase, then the governing sentiment can be noted in the detailed lines of the templates (hips, torso, etc.).

Template Examples including Gridwork

Choreography Template Example 1	Grid	Music

Combo Examples Using Nomenclature

Diamond Accents [16 cts]

Feet: Jz-1 facing L diag, R releve w/demi-plie [(1)&(2)]

Hips: hold [1-2]; F8 B-F qt db R [3-4]; alt dmd B dom CW ht db F w/alt sgl's ft db R [5-16]

Torso: Rc F8 F-B qt db L [3-4]; und D-U ht db LoAb [5-16]

Arms: High V

A3 and 2F2B Footwork [8 cts]

- Feet: A3: flat-ball-ball-ball ht db R [1-4]; 2F2B: L flat, R releve, travel R ft db L [&(5)-8]
- Hips: F8 B-F ht db R [3-4]; alt sgl's ft db L [5-8]
- Arms: Arm wave I-O ht db R [1-8]
- Z: [3-1-3-1-3]L

Phrase Title [8 cts]

Feet: walk F ht db R [1-4], pas de bouree ft db R [5-6], pas de bouree turn ft db L [7-8]

Hips: alt 3/4 sgl's dt db R [1-2], int hip cir CW ft db L [3-6], Pv Lk ft db B [7-8]

Torso: Und U-D ft db UB [1-6], Und D-U ht db LoAb [7-8]

Arms: Arm wave I-O ht db R [1-8]

Cymbals: Moori

Nomenclature Examples for Layering Combinations

For advanced Homework Assignments students are often asked to combine and layer specific elements. The following are examples that use typically assigned combinations. In these cases, the assignment is used as the phrase title.

Example 1

3 Vocab Steps in 8 cts [8 cts]

- Steps: CCW-Pvt-1U-1D [1-2], 3/4-Up [3-4], Full-Sp-w/Pvt-Sft-St [5-8]
- Z: 3-3-7 [1-4], 3-1-3-1-3 [5-8]

Example 1 Analysis

- In the example above, the steps and counts are listed on the Steps line (with no other lines required) because the exact default steps are being used without any variation or needed clarification. This is simple and straightforward.
- If there had been one small change from the default, one or more additional lines would be required.

Example 2

Layering Vocab and Suhaila formats [8 cts]

- Steps: 5-Ct layered with alt int hip sq and opt Rc Lks
- Feet/Arms: 5-Ct [1-8]
- Hips: alt int hip sq CW ht db F [1-8]
- Torso (opt): Rib locks ht db F [1-8]
- Z: 4-4-10

Example 2 Analysis

- The example above demonstrates that even what might seem like a very straightforward phrase benefits from the addition of several template lines to clarify what is meant. Because 5-Ct is primarily a footwork pattern without hipwork and because this combination uses the default, you don't need to add more detail for the feet.
- Too much information or redundant information can be more confusing than insufficient information.
- Remember that Vocab steps have an assigned sentiment and stylization.

Example 3

Vocab Layered on Vocab with sentiments [8 cts]

Steps: Algerian-Sh with the upper body and sentiment of A1[1-8]

Z: Running 4s and 5s

Example 3 Analysis

- This is a good example for demonstrating that Vocab steps can't be dismantled into spare parts to be used without understanding the intention for a step. A1 is about the footwork which generates the upper body movement. If you remove the footwork, which is the base of that move, then you are left with an undulation. Layering with an undulation is not layering with A1.
- Does the Algerian-Sh include the Algerian-Sh upper body but with the sentiment of A1? Does this mean Algerian-Sh feet and hipwork but with the upper body of A1? But if you mean the upper body of A1, how does that work without the intention of the A1 footwork that generates that movement?

Example 3 Revised

This revised version provides better context

Vocab Layered on Vocab with sentiments [8 cts]

Steps: Algerian-Sh, A1 (sentiment)

Feet: Touch-step ht db R in releve [1-8]

Hips: Alt glutes dt db L [1-8]

Torso: Und U-D ft db UB [1-8]

Arms: Back of R hand over mouth, palm facing out, L arm in mod-2nd [1-8]

Z: Running 4s and 5s

Note: Arms emphasize the coy, shy feeling of A1, even though lower body is performing Algerian-Sh.

Combo & Choreo Templates

Choreography & Combo Templates

Suhaila International, Salimpour School, & SSIOE

Choreography

Choreography Template A provides the options for documenting any choreography from basic to complex. As with many things, both creating a choreography and then documenting a choreography are special skills.

When documenting a choreography:

- Be consistent throughout a single document. If you use nomenclature or spell out things out, maintain the same approach throughout a document.
- Use the nomenclature syntax for clarity.
- Be careful about overexplaining or redundancy.
- Use only those options that are necessary.

Combos - Foundations (200-Level) Assignments

In the Foundations level, the assignment goal is for dancers to begin learning how to document their combinations using simplified templates: B & C.

- Template B - Foundations 1 (201) Combinations
- Template C - Foundations 2 (202) Combinations

NOTE: Combo Template Examples do not have as many variations as Template A. Follow B & C carefully, taking note and using bolds, underlines, etc. exactly as shown in the examples.

Combination Graded Elements

- Nomenclature
- Formatting
- Bolds
- Underlines
- Punctuation
- Command Placement
- Spacing
- Spelling

SS Moves & Foot Patterns

Suhaila Method Moves & Foot Patterns

Overview

In Suhaila's method, moves have specific levels in which they are introduced and fit into prescribed timings for that level. In theory, any foot or arm pattern of any timing can be used for any level. Foot and arm patterns do not have the same timing restrictions as belly dance moves, but it is still recommended to apply the same timing rules.

Moves, Timings, and Layers

Introduced in 101	<ul style="list-style-type: none"> • Introduced and tested: et, qt, and ht. • Introduced but not tested: basic ft.
Singles Pelvic Locks Ribcage Locks Ribcage Slides Twists	<ul style="list-style-type: none"> • Individual, alt, and 3/4s • Downbeats: R, L, LoAb, LoB, UB, UAb
Undulations	<ul style="list-style-type: none"> • Successive, alt • Downbeats UB, UAb, LoAb
Interior hip squares Ribcage squares Exterior hip squares Exterior hip circles Interior hip circles Ribcage circles	<ul style="list-style-type: none"> • CW, CCW, alt • Downbeats: F, R, B, L
Interior half hip circles Exterior half hip circles Ribcage half circles	<ul style="list-style-type: none"> • F-dom, FR-dom, R-dom, BR-dom, B-dom, BL-dom, L-dom, FL-dom (CW, CCW) • Downbeats: F, FR, R, BR, B, BL, L, FL
F8s F-B, F8s B-F F8s U-D, F8s D-U Ribcage F8s (all)	<ul style="list-style-type: none"> • Single-sided, successive, alt, 3/4s • Downbeats: R, L

Introduced in 201	<ul style="list-style-type: none"> • Introduced and tested: ft. • Introduced but not tested: basic dt. • Introduced but not tested: simple layers.
Vs/Pyramids	<ul style="list-style-type: none"> • F-dom, FR-dom, R-dom, BR-dom, B-dom, BL-dom, L-dom, FL-dom (CW, CCW)

	<ul style="list-style-type: none"> Downbeats: F, FR, R, BR, B, BL, L, FL
Vibrations	<ul style="list-style-type: none"> Introduced in straddle sit, but not tested.
Diamonds Ribcage Diamonds	<ul style="list-style-type: none"> F-dom, FR-dom, R-dom, BR-dom, B-dom, BL-dom, L-dom, FL-dom (CW, CCW) Downbeats: F, FR, R, BR, B, BL, L, FL
Hexagons Ribcage Hexagons	<ul style="list-style-type: none"> F-dom, FR-dom, R-dom, BR-dom, B-dom, BL-dom, L-dom, FL-dom (CW, CCW) Downbeats: F, FR, R, BR, B, BL, L, FL
Octagons Ribcage Octagons	<ul style="list-style-type: none"> CW, CCW, alt Downbeats: F, FR, R, BR, B, BL, L, FL

Introduced in 301	<p>Introduced and tested</p> <ul style="list-style-type: none"> moves dt without layers Moves no faster than ft with 1 layer no faster than ft <p>Introduced and not tested:</p> <ul style="list-style-type: none"> Basic qdt without layers Moves dt with layers
--------------------------	---

Introduced in 401	<p>Introduced and tested</p> <ul style="list-style-type: none"> Moves with 2 layers (any timing) Moves qdt with and without layers.
--------------------------	---

Foot Patterns

This list represents the foot patterns used throughout the levels. Students can expect variations and combinations of these patterns beginning in 201.

- 101: et, qt, ht
- 201: et, qt, ht, ft (and dt introduced)
- 301: et, qt, ht, ft, dt (and qdt introduced)
- 401: et, qt, ht, ft, dt, qdt

**Foot patterns below designated with ** are typically not performed with hipwork in the 100-level.

<p>Walk flat Walk releve Walk R flat, L releve Walk L flat, R releve Walk-4-flat, Walk-4-releve Walk-2-flat, Walk-2-releve Walk-4-half-turn-CW-4 Walk-4-full-turn-CW-4 Walk-4-half-turn-CCW-4 Walk-4-full-turn-CCW-4 Walk-4-chaine-4 Walk-2-3-passe Walk-2-3-kick Step-touch Step-kick** 3-step-turn-touch Cross-touch (flat-touch)</p> <p style="text-align: center;">Dance Movement</p> <p>Out-and-cross ** Push-turn ** Chasse ** Pas-de-bourree ** Kick-ball-change (kick-ball-flat) ** Kick-ball-change-pas-de-bourrée ** Kick-ball-change-pas-de-bourrée-half-turn ** Kick-ball-change-pas-de-bourrée-full-turn ** Jazz-square ** Out-out-in-in ** Heel-toe-toe **</p>	<ul style="list-style-type: none"> ● Travel: F, B, SR, SL ● Downbeat: R or L ● Timing: et, qt, ht, ft, dt
<p>Grapevine Chasse-pas-de-bourrée ** Chasse-pas-de-bourrée-half-turn ** Chasse-pas-de-bourrée-full-turn **</p>	<ul style="list-style-type: none"> ● Travel: SR or SL ● Downbeat: R or L ● Timing: et, qt, ht, ft, dt

**No Hipwork in 100-Level

Using a Semicolon

Use of the Semicolon (;) & Repeats

In our dance notation system, the semicolon (;) clarifies structure and prevents confusion when phrases become long or complex. We use the semicolon for two main purposes:

1. Separating Movement Phrases from Structural Instructions

The semicolon signals that what follows refers to the entire phrase before it—such as a directive to repeat or reverse the preceding sequence.

Example

Walk forward [4 cts], walk back [4 cts], grapevine [8 cts]; repeat [16 cts].

In this example, the semicolon divides the movement content from the instruction to repeat. Without the semicolon, it could be unclear whether "repeat" applies to just the grapevine or the entire sequence. This small punctuation mark makes a big difference in clarity.

2. Breaking Up Long or Comma-Heavy Phrases

When a movement phrase contains multiple components separated by commas, the semicolon helps group and separate higher-level movement sections. This makes instructions easier to scan and understand.

Documenting Repeats

Repeats

Some notes are obvious without you having to go into detail. But repeats can be tricky to document. As appropriate, include the total number of repeats and also use counts.

Example 1

Repeat 2x for a total of 3 repeats.

Example 2

Repeat the phrase [16 cts] and reverse [16 cts] 2x for a total of 3 repeats [32 cts x 3].

Example 3

Walk F ht db R with int hip cir CW qt db F [8 cts] then walk B ht db R with int hip cir CW ht db F [8 cts]; repeat [16 cts].
