Project update – Mitch Fields

Hewitt—Currently on schedule. Outside will be finished by Fall 2022, with interior bids going out. Construction is experiencing supply chain challenges.

Mahar—This project is approved. We will redo mechanicals, ventilation, restrooms, core, classrooms in multiple phases. Hewitt will have four large rooms to help handle the surge. The soonest this project would begin is Fall 2024.

Penfield/Lanigan connect and Library—This project will overlap with Mahar in stages.

Upcoming project discussion

Steering committee work for Mahar and the Library should begin now. Mahar will incorporate the residing department and perhaps other users. The library will draw from all over campus.

There was a general discussion about the kind of changes to consider—the future of lecture halls, hyflex classrooms, study places for synchronous meetings, etc.

Upcoming MSCHE visit

We briefly discussed the upcoming MSCHE visit and the meeting with CCC and one of the evaluators.

Updates to the Master Facilities Plan

The master plan will need to be updated around issues of enrollment, student spaces and other concerns. There is an update to energy planning in process.
