

Tldr: Click on any imgur link on the next page to predict monster spawns in Fight Caves.

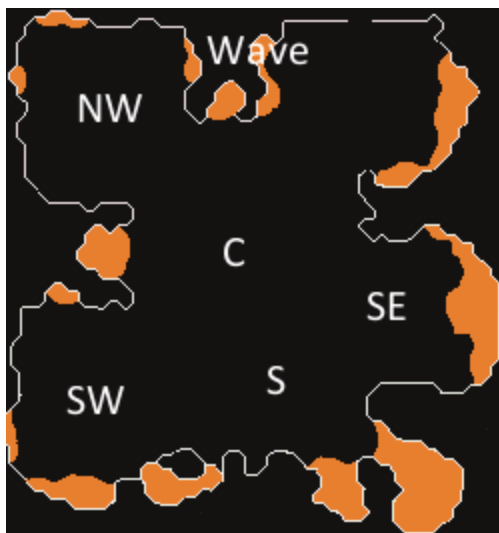

In order to do fight caves more efficiently, I generated images for each possible Fight Cave spawn position for all the waves. If you open this beside your client you can predict the spawn position at each wave and **you can easily save up to 5 minutes off your Fight Cave time.**

In order to use this, simply note down the spawn positions from the first two waves and then click on the corresponding link. e.g. if on wave 1 the 22 spawns center, then on wave 2, the 22 spawn northwest and southwest, click on the first link.

Note that for 2 of the rotations, you need the locations of the monsters from wave 1, 2 and 4.

Jad will spawn at the same location as the 45 on wave 3.

Wave 1	Wave 2	Wave 3	Wave 4	Link
