Abstract

The abstract is clearly and concisely written, describing the essence of the writer's entire contents (objectives, methods, results, and implications). The abstract is written in Indonesian and English. The abstract consists of 200-250 words written in one paragraph. Keywords are written after the abstract. Keywords must be not more than 5 (five) words or phrases. The selected keywords must reflect the concepts contained in the article. Keywords are needed to help increase the ease of access to the relevant article in the search engine.

Keywords: component, formatting, guideline, insert, style

Judul dalam Bahasa Indonesia (Jelas dan Ringkas)

Abstrak

Abstrak ditulis dengan jelas dan ringkas menggambarkan esensi dari seluruh isi tulisan (tujuan, metode, hasil, dan implikasi). Abstrak ditulis dalam Bahasa Indonesia dan Bahasa Inggris. Abstrak terdiri dari 200-250 kata yang ditulis dalam satu paragraf. Kata kunci ditulis setelah abstrak. Kata kunci tidak boleh lebih dari 5 (lima) kata atau frasa. Kata kunci yang dipilih harus mencerminkan konsep yang terkandung dalam artikel. Kata kunci diperlukan untuk membantu meningkatkan kemudahan akses ke artikel yang relevan di mesin pencari.

Kata kunci: gaya penulisan, komponen, pemformatan, penuisan, sisipan

INTRODUCTION

The introduction contains background problems supported by facts, concepts, theories, and research results from relevant and up-to-date reference sources. This section also reviews the novelty, differences between this study and previous research, and the contribution of this research to the development of the field of science. At the end of the introduction, the purpose of the study is written clearly.

METHODS

The method section contains the type of method used, population and sample, research sample selection techniques, types and techniques in data collection, and techniques in data processing and analysis.

Received: YYYY-MM-DD; Accepted: YYYY-MM-DD

RESULTS AND DISCUSSION

The results section presents answers to the research problems precisely, completely, and clear. Illustration in the form of a table or figure can be used to supplement the results exposure to clarify and shorten the description. The author should not repeat reading data that has been presented in tabular or figure form. Research results must be discussed clearly and in detail. Primary and up-to-date reference sources must support the discussion.

A. Table

Table heads should appear above the tables. Insert tables after they are cited in the text. Use 11 pt Arial for the table heads, make it bold, and center.

Tabel 1. Gaya Penulisan Tabel

Head of the Table	Head of the Table Column		
	the column of subtable head	*the column of subtable head*	*the column of subtable head*

B. Figure

Figure captions should be below the figures. Insert figures after they are cited in the text. Use 11 pt Arial for the figure captions, make it bold, and center. Use the abbreviation “Fig. 1”, even at the beginning of a sentence.

CONCLUSIONS AND SUGGESTIONS

Conclusions are a summary of the study's main findings, which are the answers to the research objectives. Suggestions are formulated based on research findings. Suggestions can be aimed at researchers, practitioners, or relevant policymakers.

ACKNOWLEDGMENTS (if any)

Acknowledgments are given to people or institutions who help research activities, such as research grants.

REFERENCES

Relevant reference sources support the manuscript. Reference sources used should be primary sources, namely articles that have been published in national/international scientific journals. The number of primary libraries used is at least 80 percent of the total reference sources used in the article. The total reference sources used in the article are a minimum of 15 libraries. Besides, the referral source used should also be an up-to-date reference source that is the source that was published in the last ten years. Authors should not cite quotations and not use anonymous references. Reference sources displayed in the reference list are reference sources referred to in the text-only (not copy all the reference sources in the thesis/dissertation/report reference list). Reference sources displayed in the reference list are sorted by letters of the alphabet (A-Z). Writing references in the text and writing reference sources in the reference list refer to the Publication Manual of the American Psychological Association (APA Style). Writing a Bibliography must use a standard quoting application, such as Mendeley.
