| ABSTRACT

Abstract explain the importance of the research, objectives, brief methods, findings, and conclusions. Abstract explain the importance of the research, objectives, brief methods, findings, and conclusions.

| KEYWORDS
(Number of keywords between 3-5 words/phrases)

I. INTRODUCTION

Background presents issues related to the research focus. Presented novelty explicitly and had a significant impact on the practice and development of the topic under study. Paper reveal the contribution of the research. Revealed the relevance of the theory to the context of the research. Revealed relevant previous research. State the objective or importance of the research. Background presents issues related to the research focus. Presented novelty explicitly and had a significant impact on the practice and development of the topic under study. Paper reveal the contribution of the research. Revealed the relevance of the theory to the context of the research. Revealed relevant previous research. State the objective or importance of the research. Background presents issues related to the research focus. Presented novelty explicitly and had a significant impact on the practice and development of the topic under study. Paper reveal the contribution of the research. Revealed the relevance of the theory to the context of the research. Revealed relevant previous research. State the objective or importance of the research.

II. METHODOLOGY

Paper reveal the research design, explain the sampling process, operationalization of variables, and data analysis. Paper reveal the research design, explain the sampling process, operationalization of variables, and data analysis. Paper reveal the research design, explain the sampling process, operationalization of variables, and data analysis. Paper reveal the research design, explain the sampling process, operationalization of variables, and data analysis

III. RESULTS AND DISCUSSION

Paper provide descriptive statistics of the data, results of data analysis, and discussions. Paper provide descriptive statistics of the data, results of data analysis, and discussions. Paper provide descriptive statistics of the data, results of data analysis, and discussions. Paper provide descriptive statistics of the data, results of data analysis, and discussions. Paper provide descriptive statistics of the data, results of data analysis, and discussions. Paper provide descriptive statistics of the data, results of data analysis, and discussions. Paper provide descriptive statistics of the data, results of data analysis, and discussions.

. TABLE TITLE

Table Head	Table Column Head		
	Table column subhead	*Subhead*	*Subhead*
copy	More table copy[a]		

Format the image in the textbox with good resolution, if the image has a small portion it can be made 2 columns, but if the image has a large portion can be made 1 column. The image title is below the image (center-aligned) Bold, Segoe UI 10pts.

IV. CONCLUSION

Paper reveal the implications and contributions of the research, limitations of the research and suggestions for future studies. Paper reveal the implications and contributions of the research, limitations of the research and suggestions for future studies. Paper reveal the implications and contributions of the research, limitations of the research and suggestions for future studies. Paper reveal the implications and contributions of the research, limitations of the research and suggestions for future studies.

REFERENCES

Paper used at least 15 relevant references (80% from up-to-date primary sources derived from reputable international journal papers, accredited national journal papers). Reference style using IEEE style.

Notes:

1. Maximum number of authors (4)
2. Maximum number of pages (8 pages), includes of references.
3. Minimum number of pages (5 pages, excluding bibliography)
