How to Make Deepfake Porn Videos at Home (5 Steps)

[IMAGES] [Google Drive](#)

[BODY]

In this post I'm going to show you how to make a deepfake porn video in less than 3 minutes, that looks as realistic as this:

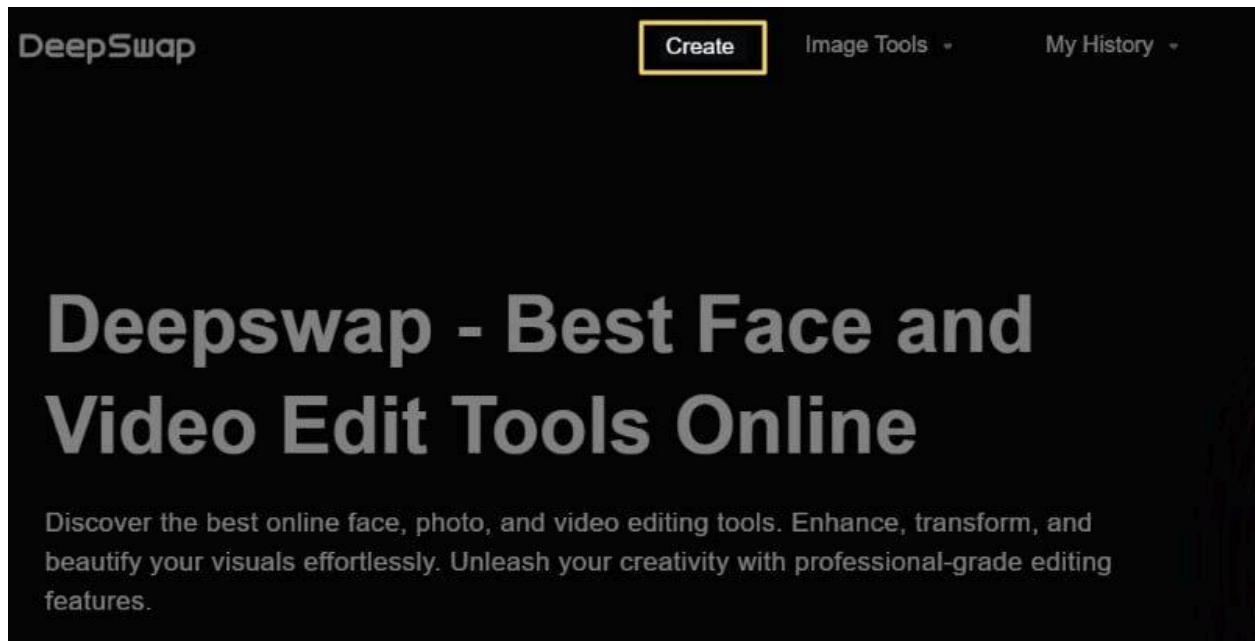

Here are the exact steps to do it:

How to Make Deepfake Porn

1. [Open DeepSwap](#)
2. [Upload a Porn Movie](#)
3. [Upload a Picture of a Face](#)
4. [Choose a Face Model](#)
5. [Create the Deepfake Porn](#)
6. [Download the Deepfake Porn Movie](#)

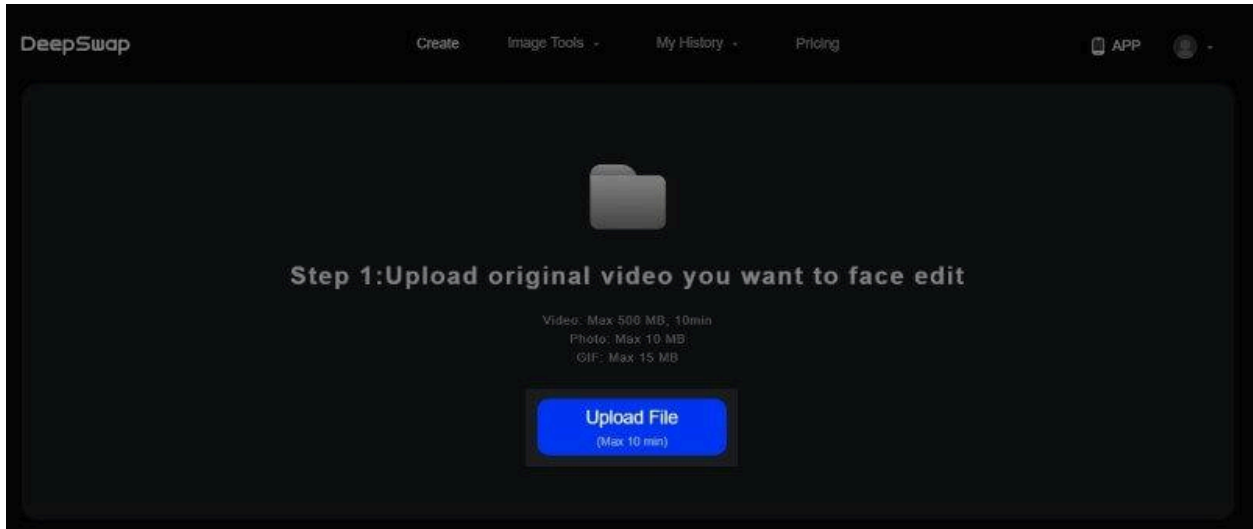

1. Open DeepSwap

Go to [DeepSwap](#) on your desktop and click "Create" in the top menu.

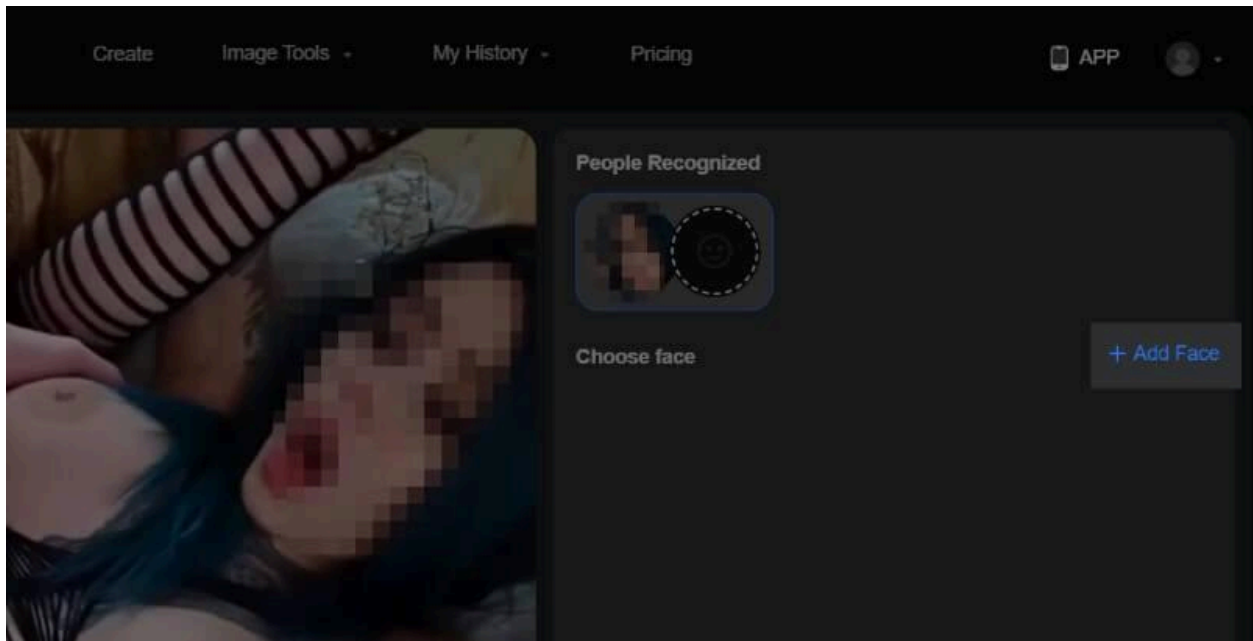

2. Upload a Porn Movie

Click the blue button to upload a porn video.

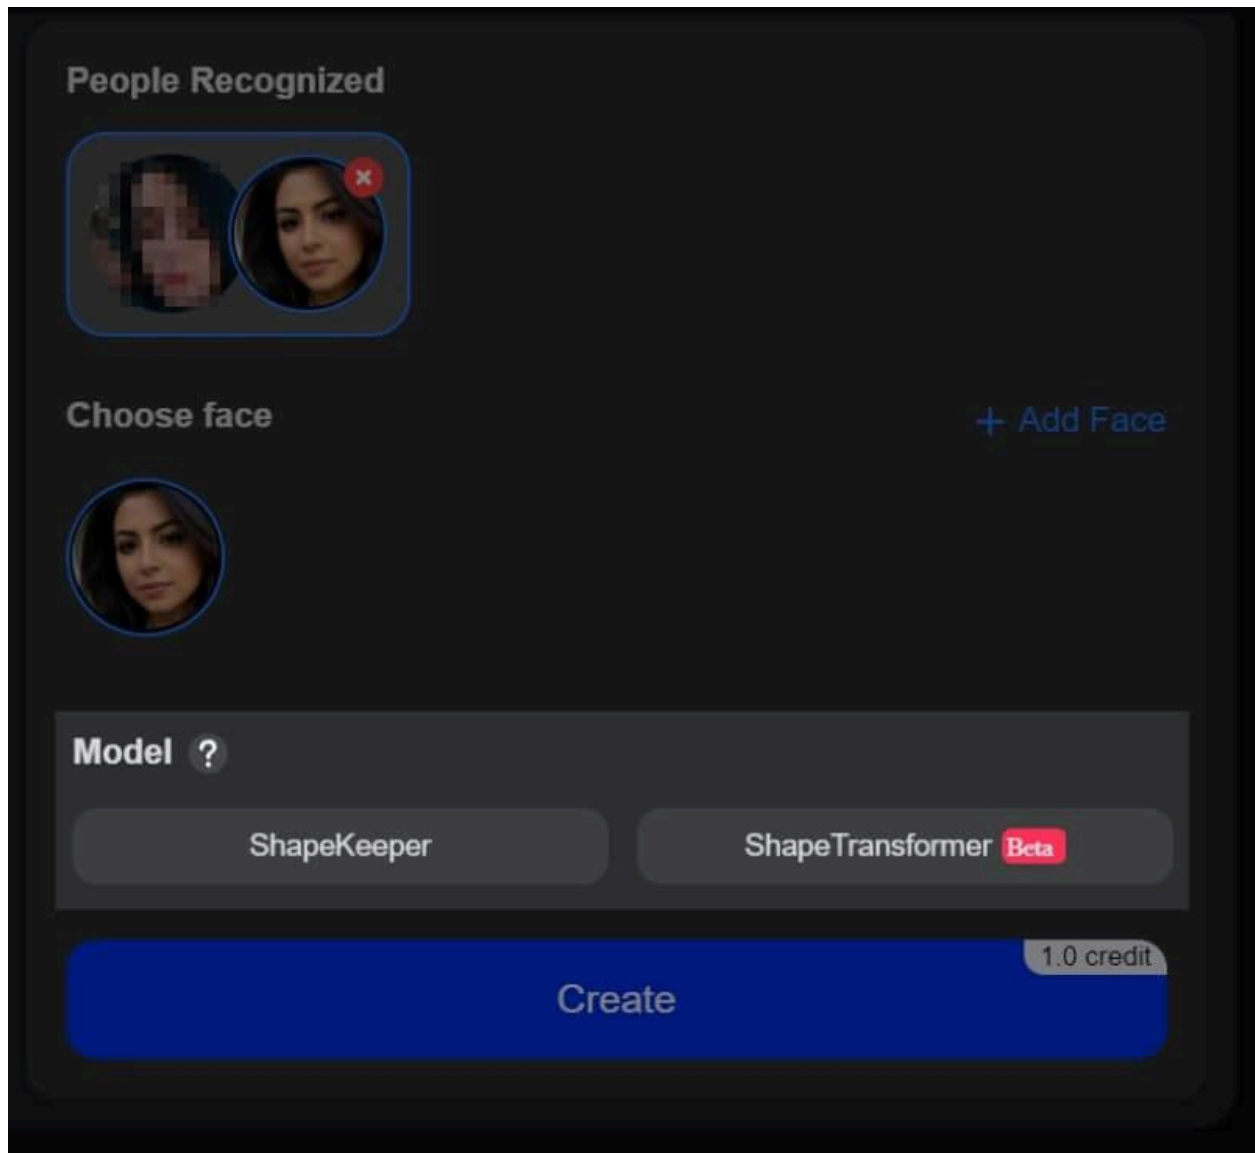

3. Upload a Picture of a Face

Click the blue "+ Add face" link and upload a picture of anyone's face.

4. Choose a Face Model

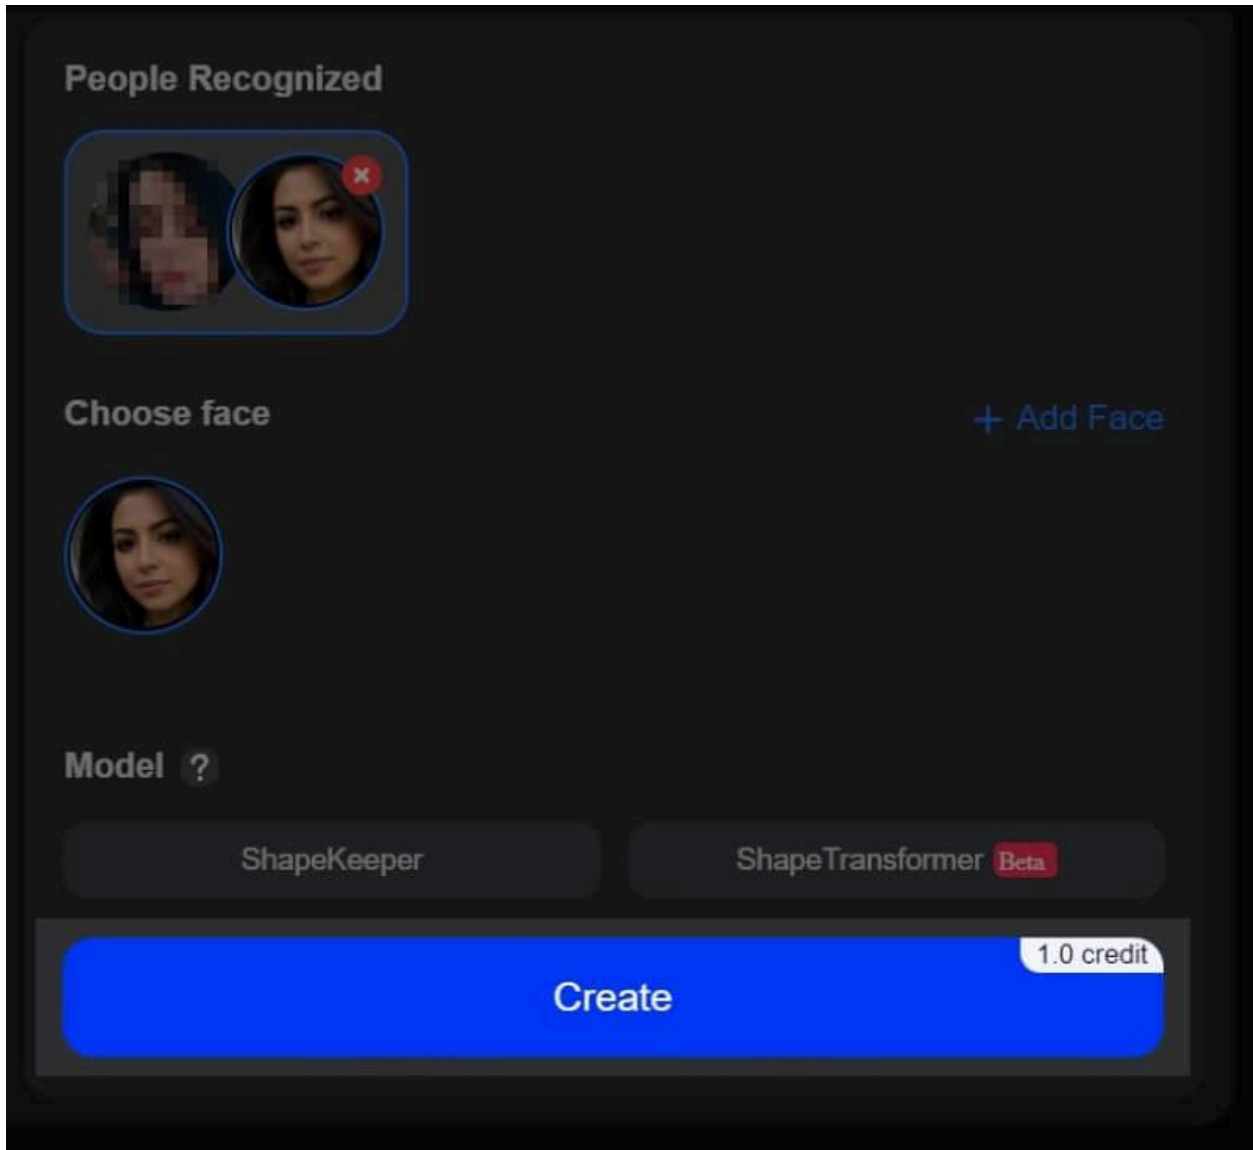

Choose if the AI app needs to keep the shape of the original video ("ShapeKeeper") or adapt it based on the face you uploaded ("ShapeTransformer").

Note: The ShapeTransformer model is in beta, but it generates the most realistic deepfake porn videos.

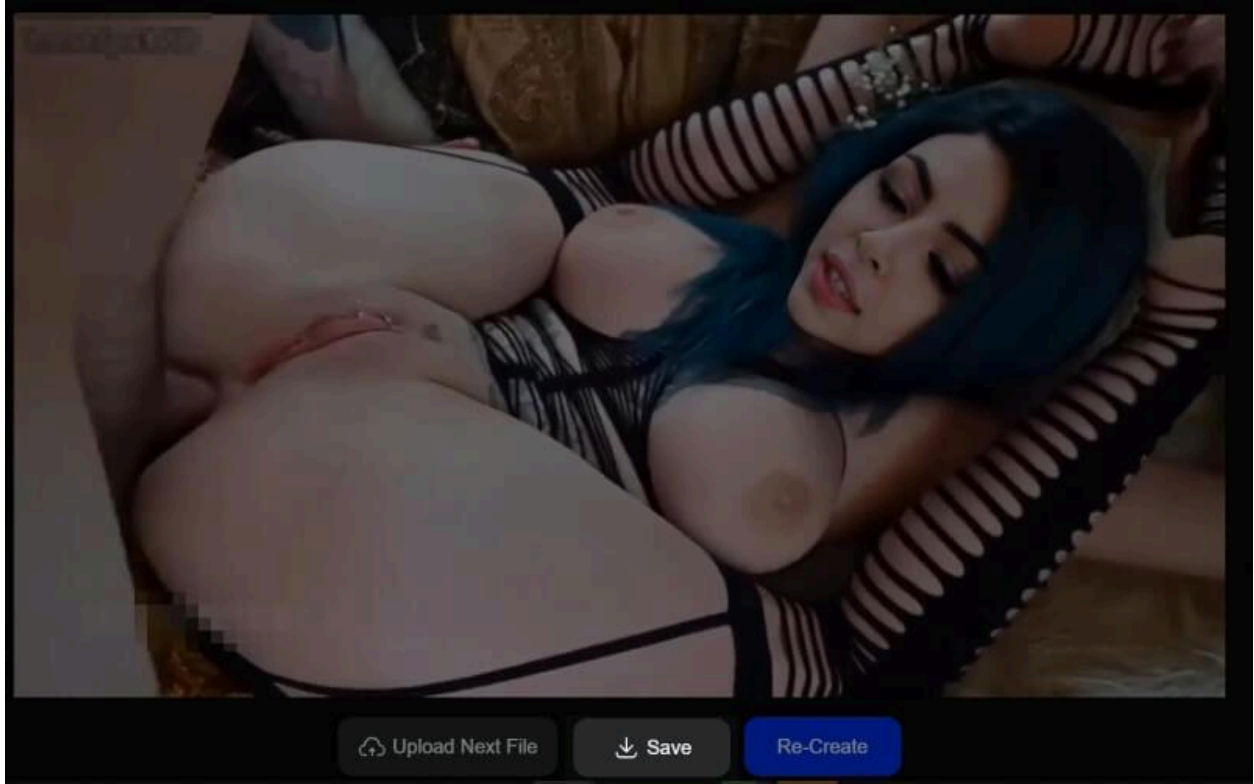

5. Create the Deepfake Porn

Click the blue "Create" button.

6. Download the Deepfake Porn Movie

Click the "Save" button below the AI-generated porn movie.

That's it!

Deepfake Porn Examples

Here are some examples of deepfake porn videos I created following the above steps:

How hard is it to make a deepfake porn video?

It is not hard to make [deepfake](#) pornography. Just upload a pornographic video and some images of people to an online [deepfake porn maker](#). [Artificial intelligence](#) does the hard work and creates realistic deepfakes in no time.

Alternatively, you can use [GIF generators](#) to create short-form, shareable videos.

Where can I make deepfake porn videos?

[DeepSwap](#) is a popular deepfake porn generator. Its intuitive user interface makes it easy to turn images of average people into convincing fake videos. With a click of a button, users can choose whether they want to keep facial features of the original model or not.

If you want to create or watch deepfake porn with influencers, check out some of the available [TikTok nude apps](#).

Can you make a deepfake porn video with a picture?

Yes. You can make a pornographic video from a picture. All you need is an online [face swap porn](#) generator.

Just mind that tools use different deepfake technologies and that affects the output. Some [face swap tools](#) generate realistic deepfakes while others generate content that is easy to recognize as fake.

How long does it take to make a deepfake porn video?

Generating deepfake videos with explicit content can take seconds to minutes. The exact time mainly depends on the length and size of the original pornographic video and the [fake nude apps](#) that are used to generate the fake videos.

Is it illegal to make deepfake porn videos?

In certain regions, it can be illegal to generate deepfake videos. In regions where creating deepfake content is not forbidden, there may be restrictions. Think, for example, of deepfake-based [nonconsensual porn](#), fake child pornography, deepfake content with a female celebrity, [fake cumshots](#), and so on.

Like with any [AI porn generator](#), it is up to deepfake creators to prevent generating harmful content that turns people into victims of deepfake porn.

There are other types of porn sites that could potentially house revenge porn, like girlfriend or [voyeur sites](#), for example.

Is it safe to use deepfake porn app?

Deepfake apps that generate pornographic content are usually safe, but there are also malicious apps. Therefore, it is wise to read the terms and conditions before even starting creating of deepfake porn, like you should with any [porn app](#).

Another important thing is that nonconsensual deepfakes can lead to legal issues. It is therefore recommended that users comply with their local legislation.

What's the difference between deepfake and deepnude?

Both are AI-based technologies that manipulate images. Deepfake is technology that can replace the likeness of a given person in an existing image or video. Deepnude is about [creating nudes](#), giving the impression that the technology "undresses" images of clothed people. There are several [deepnude apps](#) available online.

What other kinds of porn can people make with AI?

Here are a few of the types of NSFW images you can create with AI:

- Porn GIFs
- [Face swapping](#)
- Uncensored AI art
- [AI porn generation](#)
- [Converting photos into anime](#)
- Character creation
- Sexting with AI
- Celebrity porn (like [Pokimane](#))
