

“Coping with Outbreaks of Infectious Disease”

Suggestion Box

This page is a place where you can add suggestions and links that we can move onto a Wikiversity page [here](#). We plan for the Outbreaks of Infectious Diseases page to be more general, and have a second page more specific to Coronavirus on this [Wikiversity page](#).

If you are comfortable editing Wiki, then you can make edits directly on the page or on the Discuss tab.

This GoogleDoc is an easy way for people with no editing experience to make suggestions.
