

GutterBrush Product Specification Sheet

Overview

GutterBrush is a simple, cylindrical twisted-in-wire brush designed to slide directly into your gutters, blocking leaves and debris while allowing rainwater to flow through. This easy-to-install, durable solution has been protecting gutters since 2004 and is trusted by homeowners and professionals alike across the USA.

Product Specifications

- Bristle: UV-protected polypropylene – resists degradation from sunlight
- Core Wire: 12-gauge galvanized steel
- Brush Lengths: 3 ft. and 18 in. (no cutting required)
- Installation: DIY-friendly, no tools or fasteners needed

Roof & Gutter Compatibility

GutterBrush is compatible with all common roof and gutter types. We have not found a gutter and roofing combination that GutterBrush cannot protect.

- Roof Types: Asphalt, Slate, Cedar, Tile, Metal, TPO
- Gutter Types: Steel, Aluminum, Copper, PVC, Membrane-coated systems, and more

Available Sizes

- 2.25" – For the smallest gutters and drainage channels
- 3.25" – Fits small 4" gutters: mobile homes, carports, wood gutters
- 4.25" – Standard 5" residential gutters (most common)
- 5.25" – Oversized 6" gutters for larger homes
- 6.50" – 7" commercial gutters: schools, churches, commercial buildings
- 8.00" – Industrial systems: metal roofing, custom-built gutters, scuppers

Key Features

- Prevents gutter clogs and reduces regular cleaning
- Fast DIY installation – no tools, fasteners, or cutting required
- Cost-effective alternative to gutter screens and covers
- Durable design with UV-resistant bristles
- Backed by 10-Year Warranty
- Made in the USA

Warranty & Guarantee

- 1-Year Performance / Satisfaction Guarantee
- 10-Year Warranty against material defects and workmanship
