

INFORMATION OF THE EXHIBITION ON CIRCULAR ECONOMY MODELS

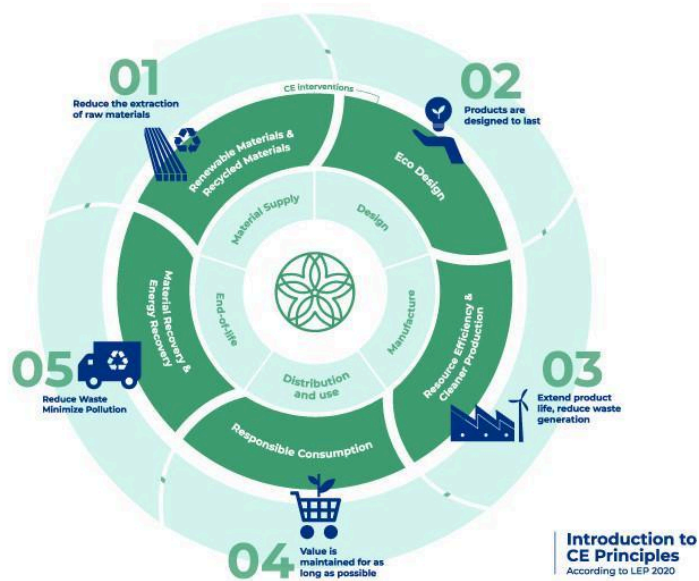

1. Introduction

Circular economy (CE) is a global trend that is considered as one of key priorities in policies of many countries all over the world with the aim to accomplish sustainable development. The Law on Environmental Protection, passed by the National Assembly of Viet Nam on November 17, 2020, specifically mentions the content of CE development (Article 142). The Government's Decree 08/2022/ND-CP dated January 10, 2022 guiding the implementation of the Law on Environmental Protection 2020 stipulates criteria, roadmap and mechanism to encourage economic development. The Ministry of Natural Resources and Environment shall have responsibility to coordinate with other Ministries, ministerial-level agencies and provincial People's Committees in formulating and submitting the national action plan for CE to the Prime Minister for promulgation.

The Institute of Strategy and Policy on Natural Resources and Environment/Ministry of Natural Resources and Environment in collaboration with Thailand Networking Group companies, namely SCG, Thai Beverage Public Company Limited, Thai Beverage Can Company Limited, Bangkok Bank Public Company Limited, Charoen Pokphand Foods PLC, and Central Group is going to organize “**Viet Nam Circular Economy Forum 2022: Net Zero Emission - From Commitment to Action**” on June 28th, 2022 in Ha Noi with the participation of the Vietnamese Government’ leader, Ministries, development partners and private sector with the aim of promoting the CE. The Exhibition on Circular Economy Models is an important part of the Forum. The Exhibition is expected as a good chance to introduce CE models as well as a catalyzer for organizations and enterprises to show their environmental responsibility and international integration for sustainable development. To register to participate in the Exhibition booth, please fill out the **Registration form** below and send to the Institute of Strategy and Policy on Natural Resources and Environment, No. 479, Hoang Quoc Viet Street, Ha Noi City, Viet Nam or via the email address ntnganh@yahoo.com. To share information on CE models and commitments, please post on the Viet Nam Circular Economy Hub at: <https://vietnamcirculareconomy.vn/en/submit-all/>

2. Objectives

- Introducing models and options to promote CE for environmental protection and sustainable development;
- Displaying, introducing products of CE-based production models;
- Displaying products, models, alternatives for energy efficiency;
- Displaying knowledge and communication products relating to CE;
- Creating a partnership between organizations and individuals.

3. Exhibition scale

- The Exhibition will be the opportunity to introduce options and models of CE for organizations and the community, as well as enhance the connectivity between stakeholders in sectors of policy making, agriculture, industry, energy efficiency, construction...

- The Exhibition will be promoted by the mass media;

- 50 booths are expected to attract participants (approximate 300 high-level participants from Government agencies, international organizations, non-Government organizations, enterprises, Universities, Institutes...).

4. Exhibition topics

- Circular economy concept
- Circular economy models in Viet Nam
- Promoting collaboration on CE.

5. Exhibition content and format

After receiving registrations from Parties, the organizing team will review and develop the proposal for organizing the Exhibition on CE Models in which spaces for Parties will be shown in the Exhibition layout. The organizing team will allocate spaces for parties registered to exhibit. Parties will arrange their own resources to design and exhibit as the following content and format:

- **Content:** All booths should express the nature of the concept of CE as *an economic model in which design, production and service activity set the target of keeping the longevity of materials and eliminating adverse impacts to the environment. Circular economy can keep for the material flow to be used as long as possible, recover and restore products and materials at the end of production or consumption lifecycles.*
