

9/15	First day at internship, got briefed on the plan for getting plants planted. Started digging up crabgrass
9/17	Worked on removing crabgrass. Very hard to dig it up. Have to remove about 5 inches of dirt to get the roots out.
9/22	Finished digging up crabgrass, started the compost pile. Using bricks to create a box for the compost stuff
9/24	Started growing the tomato plants in little pots, planted kale in ground.
10/3	Watered plants, worked on fertilizing soil
10/6	Got more seeds and planted them, worked on setting up brick perimeter for plants
10/20	Transplanted tomatoes plants into the ground
10/22	Worked on weeding and watered plants
10/29	Corn is starting to sprout, tomatoes are growing well.
11/3	All plants growing well, have to keep up on watering plants and weeding
11/5	Starting planting more tomatoes with the new compost
11/10	All plants growing well, weeds are growing really fast
