Newton's 1st Law Cartoon   Name   Date   Per

Newton's first Laws Cartoon Quiz: Friday 10/18/19

Below are the exact instructions that you will have on the quiz this Friday. You MAY NOT make the cartoon ahead of time to turn in, but you may plan your idea and then draw it and write the explanation during the time provided for you in class.

Instructions:
1.   Draw and COLOR a comic strip to demonstrate Newton's 1st Law of Motion (*all* aspects of Newton's 1st Law).
2.   Your comic strip must have a minimum of 3 frames, but you may add as many frames as necessary to show the law.
3.   Along with your comic strip, you will include a <u>written explanation</u> of how the law is demonstrated so a non-NBMS 8th grade student could read and understand the law.
4.   Explanations should be written <u>neatly within the comic strip.</u>
5.   Be creative!!!

Your grade will be based on:
●   Neatness
●   Accuracy of your description
●   Effort

I must be able to understand your comic strip. Humor and clever stories are great, but not necessary.
