PERSONAL PROFILE

Motivated and detail-oriented Full Stack Software Engineer with a background in law and a passion for building user-centric, innovative web solutions. Effective communicator and analytical thinker, skilled at combining creativity with problem-solving across both frontend and backend technologies to deliver high-quality, impactful software. Committed to continuous growth and contributing to seamless, customer-focused digital experiences.

PROJECTS

VibeScribe | [GitHub](#)

- Designed and built a full-stack emotional well-being app with mood tracking, journaling, and a calendar interface using JavaScript, React, and Sass.
- Developed a secure backend with REST APIs using Express and Knex.js.

British Airways Hackathon | [GitHub](#)

- Designed and developed a solution for British Airways during a 24-hour hackathon as a Frontend Developer.
- Built the homepage using JavaScript, React, and Sass and collaborated with UX/UI designers, data scientists, and software engineers to deliver a user-friendly, data-informed solution.

Todo | [GitHub](#)

- Designed and developed a responsive to-do application using JavaScript, React, Redux Toolkit, and Tailwind CSS.
- Implemented local storage for persistent state and enabled real-time task updates with add, toggle, and delete functionality.
