Informed Consent and AI

Schools and districts will need to provide comprehensive informed consent to students and their parents or guardians regarding the use of AI in the educational context. Here are some key aspects that should be included in the informed consent:

1. **Purpose of AI Use:**
   Clearly state the purpose of using AI technologies in the educational setting. Explain how AI can enhance learning experiences, support personalized instruction, or provide other specific benefits.

2. **Types of AI Systems:**
   Provide information about the specific AI systems or tools that will be used, including their functionalities, capabilities, and potential impact on student learning.

3. **Data Collection and Usage:**
   a. Data Types: Specify the types of data that may be collected or generated through AI use, such as student performance data, learning patterns, or interaction logs.
   b. Data Usage: Explain how the collected data will be used, including personalized instruction, assessment, research, or system improvement. Emphasize that data will be used to enhance the educational experience and not for unrelated purposes.
   c. Data Privacy: Assure students and their parents/guardians that their data will be treated with the utmost privacy and security. Explain the measures in place to protect data from unauthorized access or breaches.

4. **Data Retention:**
   Inform students and their parents/guardians about the duration for which the collected data will be retained. Specify any relevant retention policies or guidelines in compliance with applicable laws and regulations.

5. **Rights and Control:**
   a. Right to Opt-Out: Clearly state that students and their parents/guardians have the right to opt-out of AI-based activities or the collection of their data, without any negative consequences.
   b. Access to Data: Explain how students and their parents/guardians can access their data, review its accuracy, and request modifications or deletion if necessary.

6. **Potential Risks and Benefits:**
   Provide an overview of the potential risks and benefits associated with AI use. This can include discussing privacy concerns, potential biases in algorithms, or the opportunities for personalized learning and academic growth.

Contact Information:
Provide contact details for individuals or departments responsible for addressing questions, concerns, or requests related to AI use and data privacy.

It's important to present the informed consent document in clear and accessible language, ensuring that students and their parents/guardians fully understand the implications and have the opportunity to make informed decisions regarding AI use in the educational setting. This document was created using AI.
