5. Senior Safety Specialist - Colorado Springs, CO

Pay Range

\$86,590 to \$108,000

Location

Colorado Springs, CO

Date First Posted

7/15/22

Senior Safety Specialist

Who We Are...

Colorado Springs Utilities, a four-service utility provider with a 100-year reputation of integrity, gives you an experience unmatched by other utility companies. We continuously strive to stay ahead of the business curve with our established priority to update and incorporate state-of-the-art technology and provide a work culture dedicated to innovation, collaboration, and synergy.

In fact, we were recently awarded the Diamond Designation from the American Public Power Association (APPA), recognizing our utility for having some of the highest ratings in reliability, safety, workforce development, and system improvements among the more than 2,000 public utilities in the nation. Nestled at the base of the Rocky Mountains, Colorado Springs is the perfect blend of mountain and city living. With over 300 days of sunshine a year, you will enjoy nature at its finest while residing in the sixth most desired place to live in the United States (according to U.S. News & World Report, 2021).

Colorado Springs Utilities is seeking an experienced safety professional to provide occupational safety and health expertise, support and program coordination to eliminate preventable incidents and injuries. This position will focus on safe work practices activities across the organization to ensure regulatory compliance and a practical and safe work environment for employees who work in and around hazards.

Why should you join our team?

In this job, you will develop great relationships as you coordinate critical programs that help ensure a safe environment for our employees, contractors, and the public. It will also provide you with the opportunity to mature safety programs and collaborate with others to identify and abate safety hazards.

Key Areas of focus...

Perform field visits with craft employees to understand their duties and build good relationships

Perform “baseline” reviews of safety programs to determine employee awareness and program effectiveness

Collaborate with others to develop safety training programs

Respond and investigate safety incidents during work hours and when on-call

Analyze, report on safety data, and offer recommendations; recognize success and/or failures

Serve as subject matter expert on safety and assist with ergonomics and industrial hygiene needs

Engage contractors to evaluate safety performance

Maintain comprehensive knowledge of OSHA, NFPA, NEC, IEEE, ANSI, ASTM, and, other applicable industry standards

Participate in safety plan reviews to ensure hazards are identified and controlled

Participate in safety professional organizations and stay current with industry trends, developments, and regulatory issues

Who you Are...

The successful candidate will have experience of progressively responsible and transferable field experience as a safety professional working with construction and operation crews

Must be knowledgeable in regulatory compliance of OSHA 29 CFR1910 and 1926, and other applicable industry standards.

A valid, unrestricted driver's license is required, as you will be traveling to multiple sites to perform your duties

A bachelor's degree in Occupational Safety & Health, Environmental and Occupational Health or Safety Engineering with coursework in Ergonomics, Industrial Hygiene, and Industrial Engineering is preferred

Associate Safety Professional (ASP), Certified Safety Professional (CSP), Occupational Hygiene and Safety Technician (OHST), Construction Health and Safety Technician (CHST), and Certified Utility Safety Professional (CUSP), are also preferred

*This job is eligible for relocation assistance to aid with the costs associated with moving to the Colorado Springs area

Our Commitment to our Employees...

Our people are the heart and soul of Colorado Springs Utilities. They keep the lights on, gas flowing, water coming in, and wastewater leaving. We do not just say people are important – we prove it! That's why we are honored to invest in protecting the health and financial security of our employees and their families through our rich benefits program.

Time Off – Because everybody needs time off to recharge

Vacation – New employees accrue 13 days of paid time off to start, while our more tenured employees accrue 24 days per year

Personal Leave –3 days per year of personal leave

Paid Holidays –10 paid holidays per year

Sick Leave – Accrue 12 days of sick leave annually for those days when you or a family member is feeling under the weather

Vacation Buy – Purchase up to 40 hours of additional vacation time

Pension Plan – Looking forward to a comfortable lifestyle once you're done working? The Colorado Public Employees' Retirement Association (PERA) provides you with retirement benefits and peace of mind when you retire

Medical – Select from three comprehensive medical plans, starting at \$10.30 a month. Employees also enjoy access to a Health Savings Account (HSA) and Flexible Spending Account (FSA)

Wellness Program – Voluntary wellness program that allows you and your spouse to each earn up to \$500 to use towards healthcare expenses, \$100 in Visa gift cards, and up to \$400 in gym membership reimbursements

Dental – Select from two dental plans, with in-network preventive care covered at 100%

Vision – Voluntary plan that covers full vision care services and discounts on LASIK eye surgery

Retirement Saving Programs – Supplement your pension plan with voluntary retirement programs such as the PERAPlus 401(k) and MissionSquare's Roth IRA and 457 plans.

Disability Coverage –Short-Term (STD) and Long-Term Disability (LTD) insurance available for purchase

Employee Assistance Program (EAP) – Makes the going a little easier by aiding with mental health, stress management, work-life balance, financial and legal matters, and much more

Long-Term Care Insurance – Whether it's due to an accident or a serious illness, LTC insurance is available for purchase to help you and your loved ones

Life Insurance –Company-paid life insurance and supplemental coverage are available

ATTENTION:

All positions will be posted for a minimum of 5 calendar days.

Starting pay will be determined at the time of offer based on the experience, education, and training of the successful candidate.

Colorado Springs Utilities does not sponsor work visas of any kind (including but not limited to F-1, H-1B, or TN visas). Eligible applicants must be authorized to work in the United States.

Colorado Springs Utilities is an Equal Employment Opportunity/Affirmative Action employer. Our differences make us richer. Learning and growing from one another makes us more than what we were. We want our workforce to be as diverse as our business and recognize the limitless benefits of this commitment. Our desire is to have the organization reflect the diversity of the Pikes Peak Region. As an Equal Employment Opportunity employer, it is our commitment that no person shall be unlawfully discriminated against because of race, color, national origin or ancestry, sex, age, religious convictions, veteran status, disability, political beliefs, sexual orientation, or gender identity. Affirmative Action is Colorado Springs Utilities' effort to ensure positive steps are taken to have a representative workforce reflective of the relevant available labor force.

6.Information Technology (IT) Supervisor - Colorado Springs, CO

Pay Range

\$105,000 to \$130,000

Location

Colorado Springs, CO

Date First Posted

7/15/22

Information Technology (IT) Supervisor

Who We Are... In 1924, Colorado Springs voted to create a four-service public utility, electricity, natural gas, water, and wastewater services. Since then, as a municipal utility, our focus has been on the basics - providing exceptional customer service while keeping costs low. As a community-owned utility, we strive to protect our environment: We live here too and want to keep our city clean and beautiful. Additionally, Colorado Springs Utilities gives back: Employees, their families, and friends volunteer more than 10,000 hours each year on community projects.

Colorado Springs Utilities is looking to hire an Information Technology Supervisor to join our team. If you are experienced, IT professional looking for the opportunity to ideate and innovate with technical professionals in a dynamic environment this job is for you.

In this job, you will be responsible for the system analysis, project support, and business engagement leading a team supporting our on-premise and cloud-based solutions systems management and monitoring. You will also lead the team in reviewing, planning, and designing organizationally impacting systems ensuring redundancy, resiliency, and disaster recovery while meeting all business requirements.

Key areas of focus:

Collaborate effectively with all CSU IT teams and internal/external Business Partners to ensure the right technology solutions are selected to move the enterprise forward. Create a "can do" culture

Proactive business engagement and capability mapping working with a team of Business Systems Analyst

Provide thought leadership in Cloud Computing and DevOps leveraging this to shape the strategy, architecture, design, and implementation of the Enterprise impacting solutions

Work with technology supervisors to execute the contract, purchase, and plan the onboarding of new technology solutions

Lead a team of business, and systems analysts working closely with the Enterprise Architecture, and IT Operational teams to ensure solutions are technically sound meeting all must-have business, and Cyber requirements

Ensure quality design, implementation, integration, and administration of IT systems, computer applications, and related programming

Monitor and measure the team's service level agreements (SLAs) and project deliverables. Produce reports detailing systems performance and utilization

Utilize oral and written business communication skills to coach and train staff and work with Human Resources to address any performance concerns, as needed

Supervise staff with hiring and pay recommendations, make work assignments, meet deadlines, and evaluate the performance

Project manage initiatives/projects within the unit and mentor team members to do the same

Research information technology advancements and industry trends against the unit's technology and capacity need to forecast equipment and support needs

Evaluate server/storage technology product providers through research and cost/benefit analysis on server/storage products, services, protocols, and standards

Monitor vendor services and performance in accordance with those agreements

Review/approve/pay bills and invoices and prepare/manage/report the unit's budget

Compliance with all Colorado Springs Utilities (CSU) regulatory requirements is also a significant component of the position

Who you are: You will bring a bachelor's degree in Computer Technology, which is preferred, as well as experience in a leadership role within information technology as you will lead and direct the efforts of a team of technical professionals. You must have the ability to inspire, motivate, develop, and coach technical professionals, and the ability to collaborate and communicate professionally to all levels within the organization, either up or down, is necessary. We are also looking for the following so please make sure to highlight on your resume/application:

Extensive experience in all facets of IT operations and management

Understanding of Installation, maintenance, operation, tuning, and troubleshooting of enterprise technology environments

Experience with cloud solutions and services (Azure, Amazon Web Services, etc.)

Working knowledge of configuration management tools (Puppet, Chef, Helion, vRealize Automation, etc.)

Server deployment automation, systems management, and task automation (Linux, Unix, Windows SCCM, PowerShell, OneView, Ansible, PERL)

Experience supporting highly available environments

Working knowledge of SAN storage arrays, NAS storage solutions, Cloud-based storage, and data protection capabilities

Backup solutions, recovery methodologies, offsite vaulting/archiving, and Cloud-based virtual tape backups

Automation of routine technical processes using standard automation tools (Shell, PERL, Python, etc.)

Our Commitment to our Employees...

Our people are the heart and soul of Colorado Springs Utilities. They keep the lights on, gas flowing, water coming in, and wastewater leaving. We do not just say people are important – we prove it! That's why we are honored to invest in protecting the health and financial security of our employees and their families through our rich benefits program.

Time Off – Because everybody needs time off to recharge

Vacation – New employees accrue 13 days of paid time off to start, while our more tenured employees accrue 24 days per year

Personal Leave –3 days per year of personal leave

Paid Holidays –10 paid holidays per year

Sick Leave – Accrue 12 days of sick leave annually for those days when you or a family member is feeling under the weather

Vacation Buy – Purchase up to 40 hours of additional vacation time

Pension Plan – Looking forward to a comfortable lifestyle once you're done working? The Colorado Public Employees' Retirement Association (PERA) provides you with retirement benefits and peace of mind when you retire

Medical – Select from three comprehensive medical plans, starting at \$10.30 a month. Employees also enjoy access to a Health Savings Account (HSA) and Flexible Spending Account (FSA)

Wellness Program – Voluntary wellness program that allows you and your spouse to each earn up to \$500 to use towards healthcare expenses, \$100 in Visa gift cards, and up to \$400 in gym membership reimbursements

Dental – Select from two dental plans, with in-network preventive care covered at 100%

Vision – Voluntary plan that covers full vision care services and discounts on LASIK eye surgery

Retirement Saving Programs – Supplement your pension plan with voluntary retirement programs such as the PERAPlus 401(k) and MissionSquare's Roth IRA and 457 plans.

Disability Coverage –Short-Term (STD) and Long-Term Disability (LTD) insurance available for purchase

Employee Assistance Program (EAP) – Makes the going a little easier by aiding with mental health, stress management, work-life balance, financial and legal matters, and much more

Long-Term Care Insurance – Whether it's due to an accident or a serious illness, LTC insurance is available for purchase to help you and your loved ones

12. SOF Communications Planner - Hohenfels, Germany

Contact eric.w.nantz@rtx.com

Job Description: Special Operations Forces (SOF) Communications Planner

Position Overview:

This position provides Special Operations Forces (SOF) communications planning and operational subject matter expertise and staff support to the Joint Multinational Readiness Center (JMRC) Operations Group (OPSGRP) located at Hohenfels, Germany. JMRC's mission is to train Multinational Interoperability to U.S., NATO, and partner nation forces up to the Brigade level in an extended Live, Virtual, and Constructive Decisive Action Training Environment. JMRC supports the U.S. Army Europe theater security cooperation plan through planning and participation in NATO and U.S. Army Europe exercise programs.

The Special Operations Forces (SOF) Communications Planner is a SOF Subject Matter Expert (SME) and supporting member of the JMRC. SOF Communication Planner's effort is targeted at exercising and training communications in a SOF/Conventional Forces Interdependence, Interoperability and Integration (SOF/CF I3) environment. SME's work from communications perspective is in support of JMRC rotations/exercises includes development, review, coordination, revision, integration and timely delivery of exercise scenarios, orders and events that replicate real world SOF operations/contingencies with an intended training objective of preparing unconventional and conventional forces for success in current and future missions. The SOF Communications Planner will provide advice and recommendations to high level officials regarding operational plans and concepts and design data collection requirements to support operational planning. This support will occur throughout the full Joint Exercise Life Cycle (JELC) process period for each training exercise.

Duties:

- Writes/produces doctrinally correct special operations warning orders (WARNOs), operations orders (OPORDs), fragmentary orders (FRAGOs), Complex Battlefield Injects, and target packets for joint combined conventional and unconventional training rotations as related to communications.
- Develops and designs exercises, scenarios, and manages Joint Master Scenarios Events List (JMSEL) events. Incorporates applicable Warfighting Functions (WfF), SOF structure and interrelationships, and knowledge of service/joint doctrine into training exercise scenarios as related to communications.
- Coordinates SOF force involvement and serves as a SOF Scripter during exercise execution.
- Utilizes Timed Phased Force and Deployment Data and the associated joint manning document to facilitate realistic force integration injects during joint training exercises.
- Incorporates applicable SOF communications in all Warfighting Functions (WfF) to include scenario development.
- Synchronizes the communications for current and future events in order to ensure a cohesive and comprehensive scenario.
- Uses the SOF techniques, tactics, and procedures (TTPs) necessary to accurately identify the correct SOF communications support and provide communication support during exercise execution.
- Inject SOF's "management of communications" in JMRC's exercises and scenarios.
- Serves as a SOF communication subject matter expert during exercise execution.
- Develops, reviews and revises military training plans and standards.

- Assesses operational readiness and determines capability of units, commanders and staff elements.
- Analyzes plans, data, intelligence information, or systems. Develops estimates and makes recommendations for deficiencies.
- Collects data for analysis. Develops products resulting from analysis

Required Education and Experience:

Bachelor's degree and 10 years of directly related military experience; OR 15 years of directly related military experience.

Desired Skills and Qualifications:

- Experienced in USSOCOM Operations particularly as it pertains to Combined Joint Special Operations Task Force integration, interoperability, and interdependency with conventional forces.
- Doctrinal knowledge of U.S./NATO conventional and unconventional operations.
- Graduate of the U.S. Army Frequency Management Course or equivalency.
- Possess the level of communication skills required to effectively and efficiently brief military and civilian leadership via written products or oral presentations.
- Proficient in MS PowerPoint, Excel, and Word.

- Ability to work long hours on consecutive days/nights in support of exercise preparation, execution, evaluation and close-out.
- Possess active U.S. SECRET clearance with potential to require a TS/SCI clearance in the future.

14. Mid-Level Electrical Engineer - Hill AFB, UT

Summit Technical Solutions (STS) is seeking a Mid-Level Electrical Engineer to support the Air Force Nuclear Weapons Center (AFNWC) Surety and Certification Division (NTS) testing team. This position supports working on GBSD at their operating location. It will initially be more telework (but in the local area to get to meetings/in to classified systems) but will eventually be on-base once COVID restrictions lift. This position is located at Hill AFB, UT.

Essential Job Functions

Experience working in Mechanical or Electrical system design, test or evaluation for ICBM/GBSD

Experience with ICBM or other nuclear systems

Experience Required:

5 years' experience in the field or in a related area

Experience with Nuclear Certification

Education Preferred: Bachelor's Degree

Skills Preferred:

Must possess strong analytical, technology, and organizational skills.

Accuracy, timeliness, and attention to detail are required.

Ability to work independently and meet communicated schedules and deadlines.

Travel: Travel as required to support operations (expected more than 50% of the time).

Security Clearance: Secret is acceptable, TS/SCI or SAP Clearance preferred, must be TS clearable and submitted for a TS upon joining the team

If you, or someone you know, might be interested in this opportunity, you can view the complete job posting Or apply directly visit our website:
<https://jobs.silkroad.com/summittechsolutions/Careers/jobs/2216>

Sincerely,

Cristina Mitchell

Summit Technical Solutions, LLC

7150 Campus Drive, Ste. 200, Colorado Springs, CO 80920

Office: 719-476-0702

We are an affirmative action/equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation or any other characteristic protected by law.

You are receiving this message because you have applied with Summit Technical Solutions, LLC at some time in the past . If you would like to receive future notifications regarding the company and our open opportunities, please sign up for our Employment Newsletter on our careers page here. If you would be removed from this distribution list, please e-mail cmitchell2@sts-llc.com with the subject line "remove".

Why STS?

Summit Technical Solutions (STS) is a woman and veteran-owned technical services provider employing more than 100 employees across the globe. Our core competencies are Systems Engineering Services, Operations, Maintenance & Sustainment, Test, Training & Evaluation, and Information Technology, Summit Technical Solutions also offers extensive background in Data Management, Software Engineering, Logistics, and more.

Since inception, STS has been dedicated to supporting the communities in which we live and work through charitable contributions, volunteering, and our employment of veterans whom we regard as among our nation's greatest resources. We are a company that is committed to helping veterans and students in their transition to the civilian workforce through fellowship programs, internships, and college and military job fairs.

We realize that our customers' high regard for our consistently successful performance is only possible because of the talents, exceptional work ethic and commitment of our people. STS offers competitive compensation packages plus we promote and live by a strong, inclusive company culture that places the focus on customer and employee satisfaction, communication, and respect.

16. C5ISR EW SME (National Capital Region) & (Security Clearance Required)

Position – C5ISR/EW SME

GOOSE GOSSAGE CONSULTING, INC. seeks C5ISR/EW SMEs to support the Office of the Under Secretary of Defense for Research and Engineering (OUSD(R&E))/Office of the Department of Defense Research and Engineering (DDRE R&T). This assistance primarily includes support to providing oversight and program management of Science and Technology (S&T) to solve current and future challenges for the Department of Defense (DoD) specifically the Command, Control, Communications, Computers, Cyber, Intelligence, Surveillance, Reconnaissance, and Electronic Warfare (C5ISR/EW) Directorate. These positions is within the National Capital Region (NCR).

Position Description:

The C5ISR/EW Directorate has ten (10) major program areas:

Nuclear Command, Control, and Communication Program (NC3)

Cyber Research and Technology Program

Communications and Networks Program (C&N)

Autonomy, Artificial Intelligence (AI), and Advanced Computing(AC) Program

Software and Embedded Systems Program

Positioning Navigation and Timing Program(PNT)

Command and Control (C2) and Data Analytics Program

Sensors Program

Electronic Warfare and Countermeasures Program (EW&C)

Spectrum Initiatives and Analysis Program

Tasks include but are not limited to:

Assist in development and review/inputs to strategy documents, research plans, and roadmaps for assigned technical program area.

Support and attend designated program reviews of DoD and non-DoD Services/Agencies Communities of Interest and programs, to include FFRDCs and UARCs. Facilitate or lead deep dive, cross organizational teams into high-interest or game changing technology areas.

Provide support for review and execution of Congressional Special Interest Items, Congressional Reports, GAO studies, drafting policy guidance and responses, coordinating budget, and management oversight.

Provide administrative support and coordination of technical program with DoD/Interagency policy such as the Networking and Information Technology Research and Development (NITRD) Program including its Subcommittee (SC) and Interagency Working Groups (IWGs) activities and tasks, Office of Science and Technology Policy working groups, National Science and Technology Council (NSTC) including its Subcommittees and/or Select Committees, and Federal Initiatives.

Provide support to international programs, including the US-UK and other bilateral international project agreements, The Technical Cooperation Panel (TTCP) and Subgroups, the US-Canada Continental Surveillance S&T Oversight Group, AUKUS cooperative programs, and the North Atlantic Treaty Organization Research and Technology Organization (NATO RTO), to include preparation of ToR, Data/Information Exchange Agreements, and other program related documents.

Develop budget/financial documents, such as Funding Plans, Sub-allocation letters, and standard operating procedures.

Provide assistance to the DoD Components in complying with OUSD(R&E) data calls and requirements. Interacts with other Service/Component contracting offices to facilitate open issues in contracting, technology, and budgeting, to include approval of work plans and public release documents.

Assist in preparing for meetings and workshops, to include coordination of calendars of senior DoD personnel; preparation of announcements, agendas, read-ahead documents, meeting minutes, and technical briefing materials; management of logistics, travel arrangements, foreign visit requests, and meeting-facility support; and preparation and administration of action items.

Assist in development and review of information papers and reports, such as weekly reports, information papers, action memoranda, emails, and other documents.

Tasks Specific to EW&C Program include but are not limited to:

Assisting EW&C in the identification and prioritized selection of EW&C, USD(R&E), and DOD-wide efforts to advance warfighting capabilities in EW, related sensor technologies and other advanced technology areas.

Providing technical assessments and programmatic assistance, from concept definition through initial capability demonstrations.

Providing technical and operational analysis for EW&C, linking emerging EW and other advanced technologies and concepts to joint operational capabilities.

Preparing research and technical analyses to align assessments of new and emerging threats to state-of-the-art technologies that have potential to defeat those threats.

Providing analyses for EW&C to maintain awareness of commercial as well as government products to include new EW, sensor and other advanced technology developments.

Providing analyses on technologies and community trends to identify key scientific developments and researchers/organizations and develop forecast of topics and trends.

Conducting technology intelligence and research on topics of interest for countries of interest.

Assessing emerging Artificial Intelligence and quantum technologies that can be readily matured to provide EW over match capabilities.

Experience Preferred:

A minimum of twenty (20) years of progressively responsible experience of which at least fifteen (15) years is in program/project management or oversight of DoD S&T and RD&A efforts at the Headquarters level or equivalent. Should be a subject matter expert in supported program (EW&C, Spectrum, Advanced Sensors, C2, PNT, Software/Embedded systems, Autonomy, Advanced Computing, Data Analytics, Communications/Networks, Cybersecurity and Operations, or NC3) and related technologies. Proficient in technical research and an in-depth knowledge of electronic warfare and countermeasures, including relevant related technology disciplines such as radiofrequency and optical sensors and communications, cyber, autonomy, modeling and simulation and decision support analytics/visualization. In-depth knowledge of the PPBE process. Excellent communication skills, unstructured verbal interactions, briefings, and meeting moderation; and ability to work independently with both junior and senior staff in a distributed environment while maintaining a strong commitment to deliverable scheduled.

Education Required: A Ph.D. or equivalent doctorate degree from an accredited college or university in information technology, computer science, electronic or computer engineering, quantum, physics, cyber, software engineering, mathematics, or other science and technology related subjects is preferred. At the discretion of the Government, specialized experience may be substituted in lieu of specific educational requirements, but generally not less than a relevant Master's degree in the appropriate field.

Security Clearance Required: Top Secret security clearance with SCI eligibility.

If qualified and interested, please send resume to: careers@gg-consulting.org

17. Information Manager (WARCOM) -- Coronado, CA (TS/SCI) (RDR, INC)

This is an open position that many retiring officers or senior NCOs may be suited for, or civilians with a clearance and the right background.

This is a NAVSOF Web Administrator/Information Manager position on the USSOCOM Enterprise Wide Training and Education Program (UEWTEP) contract, supporting the N34 at Navy Special Warfare Command (NAVSPECWARCOM) in Coronado.

Components of USSOCOM have the responsibility to execute large-scale training exercises designed to enhance readiness and prepare SOF units for deployment. At NAVSPECWARCOM, these Training Support SMEs facilitate planning and execution of SOF core activities and SOF-CF I3; augment/replicate critical staff planning positions and provide SOF exercise planning and execution products throughout the JELC IAW SOF, Joint, Service, GCC training objectives. This position supports the TRIDENT series of exercises.

Job Details:

The Web Administrator/Information Manager will be responsible for maintaining and updating the TRIDENT Exercise Team's portion of the N34 portal and information management. Candidates need a thorough understanding of web technology and the Internet. They should be experienced in working with web page design (e.g., HTML, Active Server Pages (ASP)), firewalls, intranets, domain name services (DNS), Active Directory (AD), servers, and the related hardware and software required to administer a website. Familiarity with web services, Transmission Control Protocol/Internet Protocol (TCP/IP), File

Transfer Protocol (FTP), HTTP, HyperText Transfer Protocol Secure (HTTPS), Lightweight Directory Access Protocol (LDAP), and similar Internet protocols is also required. Candidates must possess excellent communication and customer service skills and the ability to work well in a team environment.

Typical duties include:

- Coordinate with Directorate's Government lead portal admin to ensure portal practices are within USSOCOM command parameters
- Gather user requirements and design, build, and maintain multiple collaboration solutions across several networks
- Install, customize, update and maintain internal and external division web pages and sites using technologies such as HTML, JavaScript, and ASP
- Create and analyze reports on web activity, web page hit counts, traffic patterns, and similar performance metrics
- Maintain proficiency in portal based systems (i.e., Sharepoint)
- Monitor customer feedback, and respond to inquiries
- Manage JTIMS data for all USSOCOM JELC events
- Provide routine and pre-exercise collaborative tool training to USSOCOM JCT personnel and participating JECG personnel
- Provide training on office productivity software for JCT personnel, as required
- Provide alternate desktop support during Exercise Scripting, Execution, and other exercise-related events, as required
- Provide alternate TIER I support in troubleshooting and repairing hardware and network connectivity issues for lifecycle of all JECG events, as required

Key Skills/Attributes:

- 4 years of recent experience in a Web Administrator role at Tier II/III support level using SharePoint 2013
- 2 years of recent experience developing portal and web solutions using technologies such as HTML, JavaScript, and ASP
- Experience in working with web page design (e.g.; HTML, ASP, DNS, AD)
- Familiar with web services and Internet protocols (e.g., FTP, HTTP, HTTPS)

-Current DoD TS/SCI clearance.

No relocation assistance is provided for this position.

Security Clearance A level of government security clearance is required for this position with access to Sensitive Compartmented Information (SCI). Failure to obtain and maintain the required level of clearance may result in the withdrawal of a position offer or removal.

Apply at www.rdr.com

18. JSOC Business Process Analyst (Fort Bragg, NC) (TS/SCI) (RDR, INC)

This is an open position that many retiring officers or senior NCOs may be suited for, or civilians with a background/training in process improvement.

Job Description:

Requires skills as a conceptual thinker and innovative problem solver with expert level communication skills to handle complex knowledge management issues. Demonstrate interpersonal skills, including the ability to collaborate effectively with mid to executive level leadership. Provide process mapping and analysis to support organizations within the enterprise for identification of possible redundancies, waste and inefficiencies to recognize cost savings or cost avoidance on organizational process improvement

projects. Possess the ability to apply a wide-range of qualitative and/or quantitative methods for the assessment and improvement of human resources effectiveness or improvement of complex management processes and systems. During the execution of process improvement projects validate data analysis to support requirements for additional funding, material or manpower.

Execute quick win process improvement projects to gain speedy improvements in efficiency and effectiveness.

Desired Qualifications and Expertise in one or more of the following areas:

- Certified Scrum Master and/or Certified Product Owner
- User Experience (UX) certified
- Lean Six Sigma Green Belt training desired with Black Belt preferred (Statistics / Data analysis background may be substituted).
- Enterprise Resource Planning (ERP) Software; SAP software experience
- Supply Chain Management Experience
- Financial Systems Management
- Operations Research background
- Human Resource Management background
- Site Manager level experience in SharePoint, Lean and Lean Kaizen, Data Analyst/ Data Scientist, Organizational Design. PMP Qualification.
- Knowledge Management. Preference will be given to candidates possessing a bachelor's degree or higher in a related field.

Experience in Department of Defense and Special Operations Forces (SOF) environment, operations, culture and organizations. Proficient in using Microsoft-based Office software suite. Experience with statistical analysis software; Minitab Statistical, SAS JMP, SPSS, and/or R and R Studio highly desired.

Assists Portfolio Lead and team with the research and development of projects within a corporate program. Applies technical expertise and industry knowledge to programs/projects. May assist in the development of solutions to complex problems. Works with minimal supervision within established procedures and practices; may serve as informal lead or mentor to more junior team members. Bachelors degree and 3+ years directly related experience or Masters degree and 1+ years directly related experience. Years of experience may be accepted in lieu of degree for certain roles. Certifications may be accepted in lieu of a degree for certain technical roles.

The Challenge:

Are you searching for a position where you can use your project management and analysis skills to develop solutions and create greater efficiencies? A program requires a significant investment of limited resources. With that level of complexity, you need to keep the productivity and efficiency as a top priority. That's why we need you, a skilled project management specialist who can ensure success through careful analysis and effective communication.

On our team, you'll collaborate with program leadership to analyze the Program Management Office's (PMO) areas for improvement and support the business operations staff to help the PMO identify and develop solutions to better support the client. Using tools such as Microsoft Project, SharePoint, and Power BI, you will regularly interact with the PMO staff. You'll assist in the development of real-time products to support the client. The real power of project management comes from communication to ensure the program achieves its goals and meets our quality standards. At Booz Allen, we recognize that we must continuously grow as a team to bring the best support to our clients, so here you'll have all the resources to succeed and grow your expertise. This is a chance to directly impact a meaningful mission, while broadening your skills in program strategy.

Join us. The world can't wait.

You Have:

2+ years of experience with project management

Experience with project management concepts and principles in a professional environment

Experience with working with diverse teams and working as an integral member of the PMO and client delivery team

Experience with using Microsoft Excel, Word, and PowerPoint

Knowledge of contract coordination with subcontractor and teammate staffing

Ability to manage and prioritize multiple tasks

Secret clearance

Bachelor's degree

Nice If You Have:

Experience with consulting for the federal government, the Intelligence Community (IC), the Department of Defense (DoD), or FEDSIM programs

Experience with coordinating subcontractor and teammate staffing

Experience with Microsoft Power BI or Tableau and Microsoft SharePoint, Project, or Visio

Experience with knowledge management principles and with process improvement Initiatives

Ability to work with multiple specialties in a “one-team” environment

Possession of strong analytical, organizational, time management, consulting, and critical thinking skills

Possession of strong verbal and written communication skills

TS/SCI clearance

Bachelor's degree in Organizational Management, Project Management, or Engineering Management

CAPM or PMP PMI Certification

Clearance:

Applicants selected will be subject to a security investigation and may need to meet eligibility requirements for access to classified information; Secret clearance is required.

Build Your Career:

Consulting at Booz Allen means empowering you to provide your customers with the best support. With a consulting career at Booz Allen, you'll have access to:

a large business consulting community

experts in virtually every field

a culture that focuses on supporting our employees

We have opportunities that provide stability while offering variety, so you can find the right fit for your career — and your life. Multi Source Intelligence Analyst - Junior

Fort Meade, MD · Government/Military

OPS Consulting is seeking qualified Junior Multi Source Intelligence Analysts (MSSS) who can Serve and perform all source intelligence analysis to support Digital Network Intelligence/Global Network Analysis (DNI/GNA). Collaborate with analytical counterparts across the U.S. Intelligence Community; apply knowledge of threat environment, open-source tools, and current implementation of threat technologies in order to devise all-source analytic/collection strategies to pursue access and exploitation of targets of interest. Perform all-source intelligence analyses using HUMINT, SIGINT, IMINT, OSINT to identify entities of interest; their methods, motives, and capabilities; determine malicious behavior; and recognize emergent patterns and linkages to visualize the larger picture. Must be able to identify, retrieve, fuse, and supply network and all-source threat and vulnerability data from current systems, data stores, and local files for the purposes of creating and disseminating all-source analysis and reporting, enhancing situations awareness in support of mission objectives, priorities, or exigent operational needs. The analyst should have familiarity with transmission schemes so as to perform technical analysis against target systems and networks, characterize target network capabilities and vulnerabilities, and support development of new techniques to exploit targets. Perform extensive post-mission multi-INT analysis, produce technical intelligence reports in support of special programs and provide expertise and leadership to the team in the development of analytical models and assessments.

Required Experience:

4 continuous years of work experience in Multi-Intelligence experience which includes a solid understanding of the SIGINT, HUMINT, IMINT, Open-Source, and Geospatial intelligence disciplines or a Bachelors Degree in a hard science and 5 continuous years of Multi-Intelligence experience.

Work experience must include 5 years of Multi-Intelligence experience within the DoD/IC.

Demonstrable critical thinking, advanced research, and problem-solving experiences.

Desired Skills:

An understanding of the Special Technical Operations and Special Access Program communities.

Excellent written and verbal communication skills are required with the ability to present complex technology into layman terms.

Self-motivated, creative, willing to work as a member of a team, organized and able to manage individual schedule.

Ability to work in a dynamic environment and non-standard hours when needed.

Foreign language skills desired.

Security Clearance:

A current government clearance, background investigation, and polygraph are required.

24. Program Manager, Hanover MD, Security Clearance Required

Program Manager

Hanover, MD · Government/Military

Program Manager

Hanover, MD

****Security Clearance Required****

Description:

OPS Consulting is seeking an experienced professional to manage a new contract in Hanover, MD. This PM will be responsible for the successful cost, schedule, performance, and growth of the program. Serves as the main point of contact for the Contracting Officer (CO), the Contracting Officer's Representative (COR), the customer Program Manager, and the Contractor's senior management. Directly contributes to program efforts in several areas, including cost management/avoidance, schedule estimation and

tracking, contract performance management, risk management, requirements analysis, and quality assurance activities. Ensures proper performance of tasks necessary to ensure the most efficient and effective execution of the contract. Will use expert communication skills to direct technical resources and report on the programs progress, issues, and problem areas, as well as write and review technical documents.

Duties include:

Allocate resources (staffing, facilities, and budgets) on the contract.

Review and propose the Integrated Program Baseline (or resource loaded schedule) to the customer.

Review and approve all earned value, Estimate To Complete, Funds and Man-hour Expenditure Report, or other financial reports, as appropriate.

Prepare program status reviews and other formal reviews to be presented to the customer PM.

Communicate issues and solutions to the customer PM in a timely and transparent manner.

Ensure the timely recruitment and training of Program Staff.

Review all financial and Technical Reports before release to the Government.

Ensure compliance with all regulatory and administrative requirements imposed by the contract in coordination with the Contractor's contracts staff.

Required Skills:

Five (5) years in experience in managing program and contracts of similar scope, type, and complexity with one (1) year of demonstrated experience in conducting requirements analysis, resource allocation, project costing, deliverable tracking, schedule and financial data monitoring, and reporting.

Must have a PMP, FAC-P/PM Entry Level, or DAWIA Level 1 certification in Program Management.

Shall be knowledgeable of the guidelines provided by the FAR and DFAR, DoD 5000 series, and ICD 801 policies.

Security Clearance:

A current Security Clearance is required
