

Horrrifying Crimes by Minecraft YouTubers

What is Block Madness? Well it is a term I found on Twitter one day when trying to prepare for this video. Block Madness is a term that someone stated when calling out Minecraft YouTubers and how a lot of them eventually turn into criminals. But what are some of the worst crimes committed by Minecraft YouTubers, well to figure that out we need to take a deep dive into the Horrrifying Crimes by Minecraft YouTubers...

Lionmaker - Convicted Pedophile

First visual - Keemstar there are pedophiles IN THE MINECRAFT COMMUNITY

These words resonated throughout the entire YouTube community and is the first major highlighting of a huge problem brewing with Minecraft YouTubers. Back in 2015 YouTube, Minecraft was blowing up. Hundreds of Creators began to rise up the ranks of YouTube, creators like Stampy, DanTDM and CaptainSparklez were at the peaks of their careers.

Minecraft was becoming its own platform within youtube and with an audience of primarily children this is where we encountered some problems.

Lionmaker was a well known personality within the Minecraft YouTube space.

Stampy cat introducing Lionmaker clip in his lovely world

He regularly collaborated with creators that were huge in the Minecraft scene such as Stampy, IBallisticSquid and the UK scene for Minecraft YouTube and he saw a tremendous amount of growth. Even me, a pre-pubescent teenager, loved watching Lionmaker's videos and this is why it was such a shock when it came out what he did. And who he did it too. *Freeze frame on PaigeThePanda with an over the top riser*

Lionmakers videos were very similar to what was going on in Minecraft YouTube at the time, he would run around a Minecraft World with his friends or play a Minecraft hunger games with them and other youtubers and one person he largely collaborated with was PaigeThePanda. PaigeThePanda was a faceless collaborator on the Lionmaker channel but little did she know the horrors she would be pushed into.

On September 15th 2015, PaigeThePanda's mother would make a shocking appearance on DramaAlert. It is here that she would unveil the truly disturbing relationship between Lionmaker and PaigeThePanda...

Show clips from the DramaAlert video -

▶ Angry Mother - LionMaker Ask Minecraft Kid for NUDES #DramaAlert

And surely this is where the story ends right, Lionmaker has now been exposed as a predator within a community predominantly targeted towards children...well no. As the story would take even darker turns.

On December 21st 2015, Lionmaker would take to twitter to post CP images of an underage fan while saying this:

"I have fooled all of u and have made plenty of money while doing it"

Now Lionmaker's downfall is notorious and has cemented itself into the history of Minecraft YouTube, much like our next creator, who's downfall would actually lead to an investigation by the FBI.

Jinbop - Convicted Pedophile

Crime has been rampant in the Minecraft Community on YouTube for about as long as Minecraft has and our next creator would be in a group with arguably one of the largest and most well known Minecraft YouTubers of all time.

This is what happened to JinBop. JinBop was blown up by collaborating with SkyDoesMinecraft in all of his various roleplay videos such as Cops and Robbers, Try Not to Laugh and even more. JinBop was actually a staple of Sky's community and so much so he would eventually go on to become part of Sky's media agency called SkyMedia. Starlist would begin to appear in less videos and on December 4th 2015, JinBop would disappear from Sky's videos and leave SkyMedia due to 'creative differences'.

Now whether or not this is part of the controversies we will discuss is up for debate however the next year would see the true downfall of JinBop.

On September 9th 2016, YouTube journalist Scarce would bring some information to the public's attention following a month-long content drought on JinBop's personal channel. In this video, Scarce would reveal that JinBop, now known to be called Scarlit Jin Zhao, had been detained for CP. Now the way Scarce found this information could be controversial as he did essentially dox JinBop however the news certainly deserved to be in the public eye given that JinBop's victim was one of his fans whom he had groomed.

In this video Scarce would suggest that JinBop had not been uploading and he was currently in Custody for these crimes. Shortly after this big daddy Keem himself would bring this to the public's eye even more and now everyone knew about this.

In 2016, shortly after his detention, JinBop would be sentenced to seven years in Prison and was due for release in 2023 however he was released in June 2022 for good behavior.

Unfortunately a lot of the content discussing JinBop, particularly Scarce's video has been wiped from the internet, so perhaps JinBop will one day try and revive his channel, although we will have to wait to see.

However these crimes so far have not been particularly violent, much unlike our next criminals from this list.

Casper TNG and K Money - **Minecraft's Wildest Criminals** **ARMED ROBBERY**

Minecraft UHC is certainly one of the most toxic partitions of the Minecraft community. With 11 year olds spurring out Racial Slurs and thinking that being good at Minecraft PVP is in any way going to help them later on in life. However a trend that was very common within this side of YouTube was UHC compilations with these bizarre connotations to Gangs and Rap Music.

These groups of children would use this music to hide the horrendous background noise of these huge battles. It was particularly common in videos on civilisation videos in Minecraft. You do not want to hear hundreds of kids shouting and screaming over each other.

Some of these groups of kids would adopt names that were meant to be like rap groups or Gangs such as OnlyTheFamily or NoLimit or 300. All of these organizations would use these rap names onto their youtube handle. It was hilarious given these were kids doing this. But none of this is illegal, correct?

Well one of these rappers that the groups called themselves after was Casper TNG whose music was very commonly used by Creators such as Verzide, one of the bigger UHC creators on YouTube. One of Verzide's videos where he fights a player by the name of Topu would get over a million views and by using Casper TNG's music in the background a large group of these UHC creators would begin listening to and even using Casper TNG's music themselves.

Casper TNG became very synonymous with Minecraft as a result of this. And he was one of the most popular Rappers within the UHC space and he began building his reputation in Toronto, Canada.

He was on top of the Rap World in Toronto and this was largely thanks to Minecraft, however by 2018, Casper TNG, K Money and one other person were involved in Crimes that led to them having over 100 charges. So what happened?

Casper TNG was involved in a crime that has been referred to as GTA in real life. Police Officers spotted 4 people in a rented SUV while Casper TNG and K Money were wearing clothes that looked incredibly suspicious, almost as though they were trying to hide their identity from the police. So the police became cautious and began to dispatch police to follow them. This is when Casper's brother would jump out of the car and shoot down a random busy street. Directly towards traffic and pedestrians, thankfully no one was injured.

Following this the 4 individuals would take off trying to flee police in a really hectic car chase. With Casper and his friends driving immensely recklessly to get away from the police. Eventually their reckless driving would result in the car being totalled. They took off on foot and all 4 of them were quickly apprehended.

But why would they do this? Well Casper TNG and K Money recently had their home shot at and as a result they wanted to show people that they were not afraid by letting off some shots in the Regent Park Neighbourhood as a show of Bravery...for some reason. And of course with delusion like this it is no surprise that they were high on Xanax at the time of the incident.

Casper TNG told the police to tell the press that he and his brother K Money had been caught to try and get clout so that he could drop another song the next day.

In the end, K Money pled guilty to reckless discharge of a firearm and committing an offense while wearing a disguise. While Casper pled guilty to bail breaches, possession of a firearm and committing an offense while wearing a disguise.

It just goes to show that if these kids would perhaps have better idols, this side of the Minecraft community would not be as toxic as it is now.

Armed Robbery and reckless driving is a very serious crime and as such they all received pretty hefty prison sentences, however our next criminal would never even serve a day in jail and still actively posts to his YouTube channel even today, 8 years on from his exposition.

AA12 - Pedophile -

 Minecraft Pedo's? #DramaAlert Bashur, Lionmaker, L for Leeeeee x &...
- 1 Minute 40 seconds in.

Cancel Culture 8 years ago was very different. YouTubers were popular but certainly were not mainstream and therefore youtubers who had committed horrendous acts would for the most part be able to move on from it. Such as AA12 who's horrible act was even on DramaAlert!

AA12's story is very bizarre since it technically is not illegal for some reason. It all seems a bit backwards to me. Basically AA12 was and still is a Minecraft YouTuber who has been producing youtube videos for over a decade now. But back in 2016 he would actually give an interview on DramaAlert and this is truly disgusting.

Play start of Keem speaking at 1:40 to 2:10

How you accidentally let a relationship with a minor happen is completely beyond me and really should be a huge red flag as to AA12's character online and how he perhaps is offline.

2:10 - 2:26

Keemstar does go ahead and call out AA12 on this in the sense that he is an adult and she is not and he said this.

2:30 - 2:38

This is genuinely horrific to hear him saying and as I said the worst part about all of this is that he is still actively creating Minecraft videos and within the last year has had multiple videos go on to become really popular. This is horrendous, how can you say you will “wait until she is legal” - that should be the first sign that what you are doing is horrendous. AA12 received a fair bit of backlash from this and it did strike up a lot of hate towards the creator basically calling him out for this but also how he handled the situation by saying he planned to ‘wait until she was legal’ which is such a huge red flag.

However AA12 still creates content to this day and people still watch it. But this next Minecraft YouTuber actually worked alongside Dream so buckle up because this is going to be horrifying.

SuchSpeed - Scamming - Credit Blissolic for Screenshots

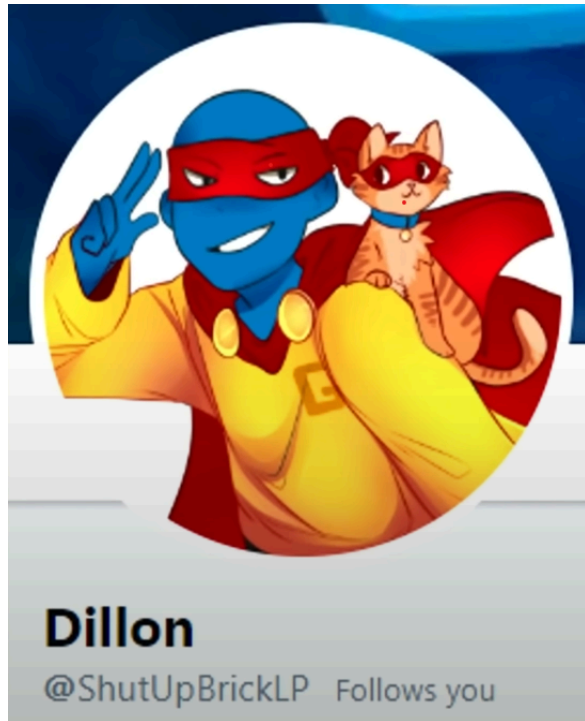

With how YouTube’s algorithm pushes videos, creators constantly have to adapt to what their viewers want and one channel that did this in potentially the worst possible way is a YouTuber by the name of SuchSpeed.

SuchSpeed began his channel just over a decade ago and became really popular within the UHC and PVP scenes. Fighting against well known creators like Tapl and Skeppy however his content would take a bizarre turn a couple of years later.

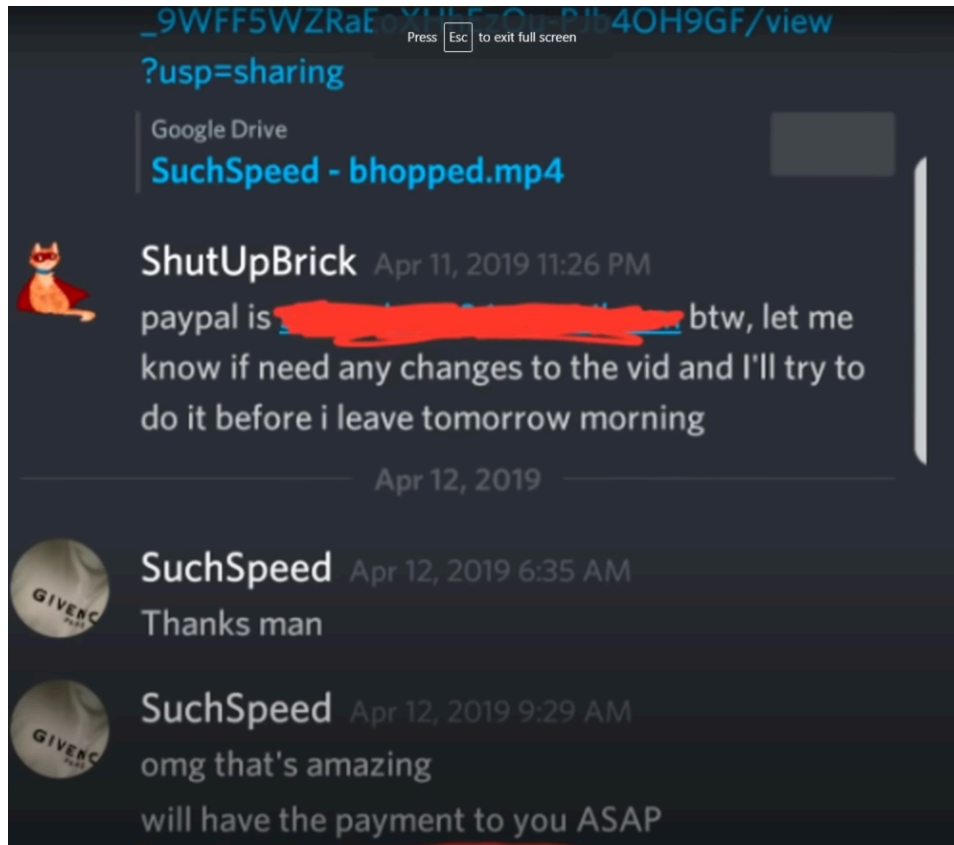

SuchSpeed was actually very respected within the Minecraft PVP scene but he decided to abuse that respect that he had garnered.

The last 3 years of SuchSpeed’s channel have been disastrous with each video being basically the exact same as the one before. Essentially SuchSpeed’s content boils down to this, he helps people get cracked minecraft. Cracked Minecraft for those of you who do not know is a non-legitimate pirated version of Minecraft which comes with a lot of problems.

SuchSpeed is actively promoting software that will lead to people likely installing Malware. However none of this is what makes him a scammer. To understand his scamming we need to talk about this guy, ShutUpBrick or Dillon.

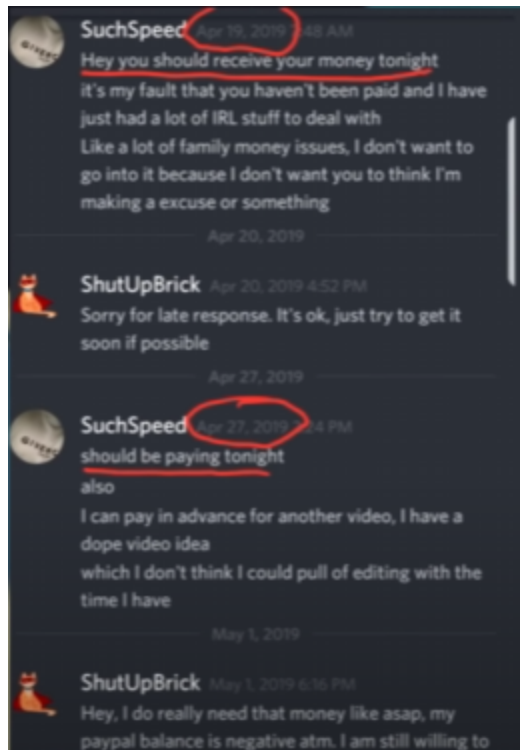

A lot of youtubers as most people will know will outsource the editing of their videos, it is a very common practice that even I am doing for this video. But this outsource obviously costs money so SuchSpeed decided he would hire Dillon to edit his videos for him. Which Dillon did with no problems. Until Dillon asked for payment.

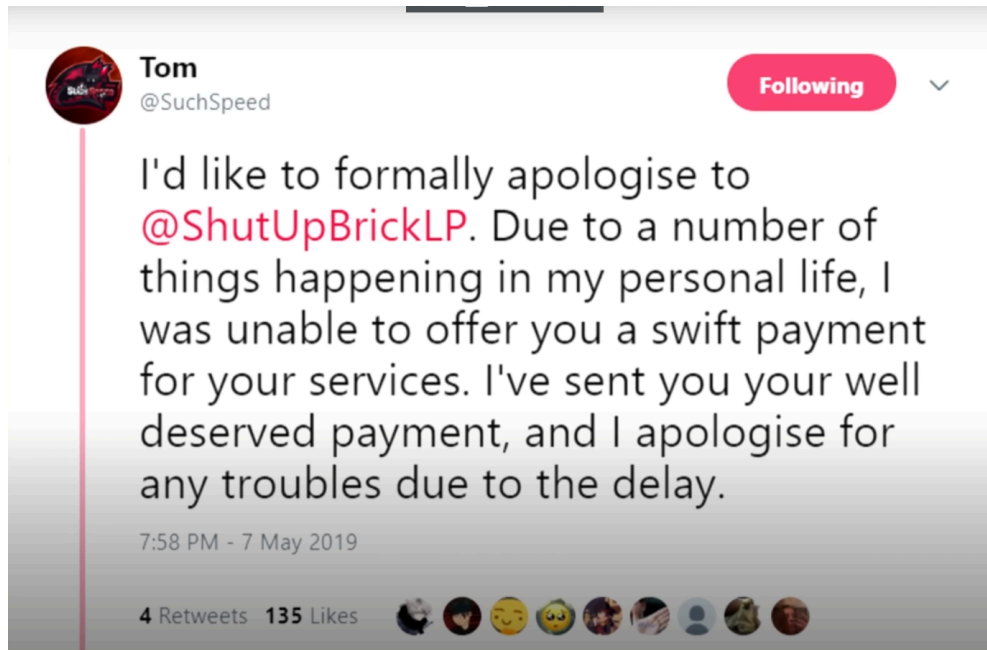

So surely that is the end of this right, Dillon got paid and everyone was happy. Well not quite. As a couple of days passed Dillon still had not been paid so he chased up SuchSpeed to ask what was going on.

SuchSpeed tried to reassure Dillon and told him he would be paid soon... A WEEK AFTER HIS INITIAL MESSAGE.

And this trend would continue, more and more people would get scammed like this. Video Editors, thumbnail artists, writers, ideation and even more. He would just continue to do this and continue to get away with it.

However ShutUpBrick was fed up and decided he would just post about it on twitter. In doing so he finally got paid and SuchSpeed actually addressed this on Twitter by publicly apologizing to ShutUpBrick.

So SuchSpeed scams his producers/developers then. The amount is supposedly about 60,000 dollars scammed. At least he is not scamming his fans right? Welllll unfortunately we cannot say that as SuchSpeed had also been involved in scamming his fanbase with fake giveaways.

Fake Giveaways are used immensely by creators to try and trick people into subscribing by making them believe they could win something by doing so. And a large proportion of SuchSpeed's content had these exact giveaways. However if you were to contact any of the winners to ask if they ever received their prize they would obviously say no.

It just goes to show that unfortunately scammers are everywhere on YouTube and you really do need to be careful about these fake giveaways. Safety is paramount within the youtube space, which makes our next Minecraft YouTuber's crimes far more sinister.

Jikishi - Pedophile

When I was researching this video I knew I wanted a variety of content creators to talk about. I wanted to not only be focusing on Minecraft creators who were inappropriate with minors. Pun Intended. However our next creator is yet another person who can be related back to Dream.

This is Jikishi, a disgusting creep who was given the biggest platform in the world at the time despite using his platform to groom his fanbase. Jikishi was becoming a very well known Minecraft creator and was seeing rapid growth which led to him being invited to the DreamSMP.

This was the pinnacle of Minecraft Content Creation at the time, he had really made it and his career would only go up from here. However two days later a twitter user by the name of valkcy would come forward about sexual abuse allegations towards Jikishi in a now deleted Twitlonger.

She claimed that when Jikishi was 18 they exchanged nudes despite her being a minor. And this was only the beginning.

After Valkcy came out with their allegations more people began to come forward and Jikishi was forced to confirm to dream that the allegations were real. Dream very quickly removed Jikishi from the SMP and gradually more and more people came out and in the end over 40 people came out and were able to prove that Jikishi had groomed them.

However there was still a lot of Misinformation as made apparent by SunnyV2's video titled "The Sad Life of YouTube's Most Canceled Creator". This video was good but did point out that a lot of things were still unknown which led to the user Jwhisp coming out about Jikishi and this is where things got intense.

I will read some of the key points from this Twitlonger and you can find it very easily by searching up Jikishi Twitlonger.

https://www.twitlonger.com/show/n_1ss81f8

"During the time Jikishi was being canceled I was not only his best IRL friend but I was his roommate"

"Jikishi is a horrible monster and the situation should not be taken lightly"

Jwhisp even decided to doxx Jikishi within this document but to avoid doxxing him myself we will blur his surname.

"Jikishi's full real name is Demetrius ***. No one online knew his surname but here it is. He chose not to give out his last name but I believe he lost his right to privacy when he decided to abuse minors. His real name should be known because that name belongs to a monster."

There is so much more throughout this document and I really do suggest you read it yourself as it really does go into detail about the horrific crimes committed by Jikishi.

GlennMC - Scammer

Shoutout to CalebisSalty's video on GlennMC for helping me to get a lot of the information from this.

Back in 2020 there was an election going on in Pike County, Kentucky and it was a heated one. During the pandemic it was challenging for politicians to hold large public events due to social

distancing, mask mandates and more and as such a lot of the political campaigning would take place on social media sites such as Facebook, TikTok and of course twitter.

One of the candidates within this election was a man by the name of Glenn Hammond. A Democratic candidate who had a rather large social media push during his candidacy. But after losing the election by a landslide, he would abandon his social media accounts...until 2022 where it would become the rebranded GlennMC social media. But why did this happen?

Well according to information from Caleb's video it would appear that the account was hacked by a person called Charlie. Charlie had a notorious youtube channel at the time which was making content surrounding NFT's and Cryptocurrency and his channel is pretty successful right? 170,000 subscribers is more than most people would dream of...except those are not real accounts, These are botted subscribers that Charlie bought for himself desperate to be the next big hit on YouTube while not even understanding how the channel works.

Let me explain it in a very basic way. When you create a video the first people who see it in their recommendations are those who are subscribed to you. If those people click the video and enjoy it then the algorithm will push it out to people who enjoy similar types of content and the more people who click your video and watch it, the more people it will be pushed out towards.

So in other words botting your channel does not really achieve anything as you would potentially have to work harder to make up the difference. Anyway he continued to make NFT scams but they were not working so he decided to turn himself towards an audience that would be far more gullible to these types of scams, Minecraft.

Seeing the inactive Twitter account he decided that he could turn that into the GlennMC channel and so he hacked into it and rebranded it. Instantly he had a verified account and looked as though he was a legitimate Minecraft youtuber.

Having a verified check mark made him far more able to grow on Twitter. He set up a bot that would like every post containing any buzzwords like Minecraft, Dream etc etc. The goal of this was to get him more followers as people would see that they liked his post and would be curious who this youtuber was.

However the catch was that this youtube account never existed. So where was he trying to push these people to? Well he was trying to push them towards a Discord for a server he is developing known as SkyCube. And he blew up!

His Minecraft server gained thousands of members and no one was able to do anything to stop it. People made videos and reports were made to twitter. But he kept growing and by November 5th his server opened up.

As soon as people joined the server they would have microtransaction shoved down their throat and immediately the server was shown to be obviously pay to win. So his scam was a huge

success right? Well no as the server only ever really had like 20 players at once. And also at the same time Twitter had created Twitter Blue which meant his verification was now worthless.

He realized he had to stand out a bit more and so he botted himself an extra 100k followers before being smacked down by the ban hammer. His entire scam had not really worked. Obviously he would have made some money off of this but certainly not what he likely hoped for.

These were the most horrific crimes committed by Minecraft YouTubers.

SailorsBounty
