CTDroid Privacy Policy

Personal data collected for following purposes using following services inside CTDroid application.

Geolocation - Current location information

android.permission.ACCESS_FINE_LOCATION
android.permission.ACCESS_COARSE_LOCATION

Location information is used for for the Coordinate Transformation work carried out by the application to derive Sri Lanka national grid coordinates.

Internet access

android.permission.INTERNET

Internet access is used to load data for the map view to display google maps.

Settings

android.permission.WRITE_SETTINGS

Permission to read/write settings is used to get system settings like GPS availability.

Write external storage

WRITE_EXTERNAL_STORAGE

This permission is used to write/read waypoint data to the storage of the device and write location data to kml,csv and gpx files. Also CTDroid use these permissions to read content of code.text file.

I also confirm that the application will not send any collected data to any third party.
