

This day we will review NitrogenSports , it is one of the biggest sportsbooks in bitcoin community.

- Provably Fair 0/10

The website is not a provably fair needed type. It is a sportsbook so there is no need for trust in the betting system , they can't cheat you out of a soccer win after all :D So the game is neither provably fair nor need to be because it is not a dice game , it is a sportsbook.

- House edge 0/10

Once again this is not blackjack , dice or even lottery , this is a sportsbook which has decent odds comparing to non-bitcoin websites and give you multiple choices to bet which gives you higher advantage over house comparing to non-bitcoin sportsbooks but the house edge is not the house edge you have in dice websites , it is more of a spread and that can't be named house edge. Even tough I can't call it house edge , I can tell you this is the best odds you can find in sports betting if you remove the '%500 bonus but if you withdraw your account will be closed' websites that works with \$.

- Games Offered [describe the games] 10/10

Ohhh where should I start :D They do have NFL , they have baseball , they have soccer , basketball , hockey , tennis , cricket , golf and many many more sports , and even esports and oscar odds are a bet choice if you want to. As I am writing this I found over 70+ different things you can bet (considering every league in soccer and basketball league , only those count for almost 50)

- Deposits Arival time 10/10

Deposits are instant , there are no waiting time , as soon as you send it you can refresh the page and see it.

- Withdrawl time 4/10

They have one weird deal with withdrawal. If you want to withdraw 1btc then it will take just 1 confirmation , if you want to get between 1 btc – 10 btc then it will take 2 confirmation , if you want between 10 and 50 btc then it is 4 confirmation and over 50 btc it will take 6 confirmation. Not sure why they did something like this but for untrained eye it looks useless to get more confirmation the higher you want to get back.

- Fast UI 7/10

The website is fairly easy looking and not complex even tough there are many games you can bet on , it is very simple to use and doesn't take long to get used to the main page.

- Cashouts 10/10

Even tough it is one of the –if not the oldest- oldest sportsbooks in bitcoin community there has ben very few and rare cashout problems heard , everyone can withdraw their coins easily and not have that problem like many known scam websites that works with \$. Even tough bitcoin is untraceable and \$ can be traced and sued , bitcoin websites especially nitrogensports present higher trust then any fiat sportsbook out there.

- Promos 6/10

They have rewards system called 'Loyalty' , and the more you wager the higher reward system you get. The more you wager the higher you level up your Loyalty too. So wagering quickly gets you higher points then wagering smaller in bits over a long time.

- Contest 6/10

They have blackjack freerolls and tournament , they have 10X Challenge and NFL survivor pool . There could be some more in bitcointalk but these are constant and always there .

- Security the site provides (2fa, email confirms etc) 9/10

They have all the needed security with regards to any bitcoin website. They have 2FA and standart password procedures , we do not need much more as long as the website is not 'hacked' ;)

- Age of the casino 10/10 (very rare to find this old casino/sportsbook)

Not sure if it is the correct date but the bitcointalk topic started at December 2 , 2013 , which is seriously old comparing to bitcoin years :D

- Amount of withdrawn bitcoins

- Official BTT topic ?/10 (don't know how to grade a bitcointalk topic :D it is a simple topic after all)
