Fact Fish x4

Cut out the cards on the next two pages and shuffle. Players are dealt 12 cards. The players then take turns making x4 fact sets. A set includes both factors and a product.   (i.e. a player would need the 3, 4, and 12 card to make a set. Each set must have 4 as a factor.

One player asks another player for a specific card. If the opponent has the card, the player collects it and makes a set. If the opponent doesn't have the card, the player must fish for the card and discard one card. The maximum number of cards a player can have is twelve. The first player to make three sets wins.
